

WILL NOT DOWN.

Imperialism Will Continue to be Important Issue.

EX-SENATOR EDMUNDS

Says the People Have Not Yet Settled It, and His Party Must Answer for Its Mistakes.

In an extended interview published in the Boston Herald Monday last...

"I think the government's course in regard to Cuba has been wrong and unnecessary. We have not made good our promises to Cuba, and there was nothing to prevent us from doing so."

"My plan would have been to give them complete independence, as we promised to do; let them set up their government, then come into the United States as a sovereign nation."

"I should dislike to compare anything to that horrible Transvaal affair, but I do think it likely that we may have a repetition of the experience which befell us in the Transvaal."

"No, I should dislike to compare anything to that horrible Transvaal affair, but I do think it likely that we may have a repetition of the experience which befell us in the Transvaal."

"I have no objection to our going to Cuba, but I do think it likely that we may have a repetition of the experience which befell us in the Transvaal."

"I have no objection to our going to Cuba, but I do think it likely that we may have a repetition of the experience which befell us in the Transvaal."

THE COTTON CROP.

East of the Mississippi River Things Look Better.

In North Carolina, heavy rains over the southern counties damaged cotton, and in Texas and northern Louisiana the drought conditions became intensified over extensive areas...

In Texas, picking is in active progress, but in no other portions, although open bolls are reported from all the most easterly sections...

In North Carolina, the past week was characterized by very heavy rains from Monday to Wednesday, inclusive, which were followed by fair, warm and very favorable weather.

Cotton improved generally during the week; late cotton was revived, is vigorous and will reach sufficient size to give a good yield with a late autumn; old cotton seems to be holding its fruit well, and very few reports of shedding have been received...

In South Carolina, with few exceptions, the crop is in good condition. There are a few fields infested with lice, some with rust, and there is a little shedding, while on sandy soils cotton seems to have stopped growing...

In Georgia, in the northern and middle counties an abundant rainfall during the week has put new life into all crops, and the cotton crop, in particular, was greatly benefited.

In Alabama, general favorable conditions prevail, but the temperature averaging very nearly normal, while the drought, which had prevailed for nearly three weeks in northern counties, was generally broken by fairly copious rains...

In Florida, frequent showers, followed by hot sunshine, over a portion of northern and central districts caused cotton to shed and, to some extent, suffer from rust.

In Louisiana, general favorable conditions prevail, but the temperature averaging very nearly normal, while the drought, which had prevailed for nearly three weeks in northern counties, was generally broken by fairly copious rains...

In Mississippi, moderate to heavy showers were quite general over the southern half of the State and in a few of the north-central counties...

In Missouri, moderate to heavy showers were quite general over the southern half of the State and in a few of the north-central counties...

In Arkansas, general favorable conditions prevail, but the temperature averaging very nearly normal, while the drought, which had prevailed for nearly three weeks in northern counties, was generally broken by fairly copious rains...

CHARLESTON WAKING UP.

The City Council Ends the Dispensary Law as an Ordinance.

The Columbia Record says much interest has been excited, especially in dispensary circles over the proposed action of the city council of Charleston in passing an anti-liquor ordinance...

Before the state board of control he declared that while the city enforced the law as well as possible, yet he didn't think the passage of such an ordinance would be constitutional, as the city has no jurisdiction in such cases...

The following is from the Charleston Post: "As was stated yesterday in the Evening Post, the ordinance is practically a re-enactment of the dispensary act itself."

The ordinance gives the mayor and the police the right to make the dispensary obey the law as well as the people generally. The dispensary act before the council of the liquor traffic in all the details of the prevailing system and the beer dispensers, the regular dispensers and the illicit dealers will all get a taste of the new ordinance in course of time.

It is understood that the police authorities will give their attention to the city has no jurisdiction in such cases more than that it had in burglary or murder or serious crimes. The state board withheld the profits from Charleston, and that seems to have brought about a change of opinion as to the constitutionality of the ordinance...

The following is the weekly bulletin of the condition of the weather and crops in the State issued yesterday by Director Bauer of the South Carolina Agricultural Experiment Station:

Moderate and nearly normal temperature prevailed during the week ending 8 a. m. Monday, August 12th, with a maximum of 96 degrees at Greenwood and a minimum of 62 degrees at Greenville.

In the southeastern counties a few localities in other portions of the State the amount of sunshine was deficient, but generally it was just right for cotton and other crops. Damaging high winds occurred at a few points, blowing down some corn.

General and beneficial rains occurred on the 5th, 6th and 7th. There were also scattered showers near the close of the week. At a few points in the middle Savannah valley more rain is needed, while over the northeastern counties the rainfall was excessive and to some extent harmful.

1851 PURMAN UNIVERSITY 1901.

GHENVILLE, S. C. Two courses are offered leading to the degrees of Bachelor of Arts (B.A.) and Master of Arts (M.A.) Library and Reading Room, Physical, Chemical and Biological Laboratories.

For rooms apply to Prof. H. T. Cook, Greenville, S. C.

Presbyterian College of South Carolina.

Next Session opens Sept. 26, 1901. Special rates to boarding students. Limited number can be accommodated in Dormitory. \$100.00 will pay for board, room, tuition, and tuition for Collegiate year.

For catalogue or information apply to M. A. FINE Commercial Course. Write for catalogue or information of any kind to A. E. SPENCER, Clinton, S. C.

How Royalty Pays Twice.

It is not out of place to mention, especially as the fact is never sufficiently remembered when royal royalty comes are discussed, that royal persons are not followed by their master's carriage for hours with no signs of fatigue.

Wolves will travel 60 miles in a night. Nansen saw Arctic foxes on the ice nearly 600 miles from land, and found their tracks in the snow on the parallel of 85 degrees north. Eskimo dogs can travel 45 miles in five hours, according to Green, who says that he once drove his dog team seven miles in half an hour.

A Siberian dog, on good ice, will draw about 90 pounds; our ordinary dogs, at full speed, run at the rate of from 33 to 49 feet per second; setters and pointers, about 18 to 21 7/10 miles per hour, and they can maintain this speed for two or even three hours. Fox hounds are very fast, and in a recent trial one of them beat a thoroughbred horse, covering 4 miles in 36 minutes. Greyhounds can run at the rate of 50 to 75 feet per second. A greyhound once exceeded 63 feet per second.—N. Y. Sun.

A Lesson from America.

During the Paris exposition an American firm obtained permission to drive an automobile through the Bois de Vincennes near Paris. The city of Paris has two artesian wells which required respectively nine and six years to be driven. The American well was sunk to a nearly equal depth, 1,935 feet, last summer in two and a half months. The French were surprised by the rapidity of the work, as well as by the homeliness and simplicity of the apparatus.

The American company has since offered to donate the well to Paris as an addition to its water supply, and some of the French scientific journals express the hope that the practical lesson which the new world thus offers gratuitously will not be without its fruit.—Youth's Companion.

The Kitchen Garden.

Whether the "garden" be a two-acre plot, or a city back yard 20 by 30 feet, there are certain things that should be planted for the comfort and convenience of the family. Herbs come first, that garnishings and soup or sauce flavors may always be at hand.

On the young woman who espied one of the young women wiping her knife with a napkin. "Would you do such a thing as that at home?" asked the preceptress, sharply.

"No, indeed, I would not," replied the young woman who has clean knives at home.—Chicago Chronicle.

Viennese Muds.

A peasant woman in Vienna is seldom seen in winter without her muffled and caped. The French were surprised by the rapidity of the work, as well as by the homeliness and simplicity of the apparatus.

It was a barber who had long served on the cracks of an Atlantic liner whose saloon was visited by one of the young women who had clean knives at home.—Chicago Chronicle.

A Haughty Barber.

It was a barber who had long served on the cracks of an Atlantic liner whose saloon was visited by one of the young women who had clean knives at home.—Chicago Chronicle.

Nicola's Latest.

Nikola Tesla rushed into the newspaper office with the light of triumph on his face. "Eureka! I have it at last!" he shouted.

Light as a Cure.

At a meeting of the Academy of Sciences in Paris on December 3 M. P. Garnault reported that in certain diseases light exercises a specific curative action. The most successful treatment under concentration light occurred in cases of rheumatism and articular rheumatism, various kinds of ulcers and chronic catarrh of the nose and ear.—Youth's Companion.

Taking No Chances.

Hotel Clerk—I am sorry, sir, but you will have to give satisfactory proof about those scars on your hands. Ham de Fatte—Why, can't a man have scars?

Attachments.

Polonius—Attachments are quickly formed in our profession. I remember—Ade, 'tis true! "Why that note of melancholy in thy tone?"

But Nothing is Done.

Mrs. Pettit—Whenever express a desire for anything my husband never objects. Mrs. Jg. Nord—Same with me. I can express the desire as often as I please. It never disturbs him.—Philadelphia Press.

Put Him to Sleep.

Poet—Did you get my box of sonnets that I sent you? His Friend—Oh, yes—delightful! I couldn't sleep till I'd read 'em.—Tit-Bits.

A Town Burned.

Early Wednesday morning fire broke out at Chipley, Fla., a railway station, and destroyed property worth \$100,000. The fire was of an incendiary origin, and made the third that has visited that town within the past 60 days.

How to Save Your Figs.

A gentleman on the Sand Hills lost all of the first crop of figs by the depredations of numerous Jay-birds, woodpeckers and sparrows infesting that region. When the second fig crop came on the feathered host prepared for another banquet, but were frustrated by a simple device. Rings with fluttering pennons of colored paper were fastened around and about the tree. The birds came, halted in an adjacent meeting and retired baffled. This seems an effective fig protection and may be commended to the attention of the department of agriculture.—Augusta Chronicle.

A Fatal Stroke.

A terrific electrical storm visited the Greenville section Monday night, doing considerable damage in the mill village of the American Spinning company. A six-room house was struck and Miss Oltora Inami and Miss Busbee were almost instantly killed.

The Worst Evil.

The worst evil that we have to contend with in this world is inactivity.—Chicago Daily News.

Cupid in Command.

Of the 400 American teachers who sailed on the transport Thomas from San Francisco to Manila, sixty of them on reaching Honolulu were married. The teachers had been chosen from the many normal universities of the country and were strangers to each other. Their acquaintance and courtship extended over a period of less than ten days.
