A stopped Watch.

One that will not go AT ALL—does not run as much both as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our repair department is so close at hand there is really no excuse for carrying anything but an accurate timepiece, no matter what the first cost was.
