

Do you know why it's toasted?

To seal in the delicious Burley flavor.

It's toasted.

YOSEMITE PARK IS FLOWER LAND

Visitor Can Enjoy Flowers of Several Seasons in a Visit.

Abundant snows on the higher levels of Yosemite National Park have brought a bumper crop of flowers this season.

Attention is called to this fact by the announcement that special provision has been made for the protection of the lavish display from depredations of the thoughtless visitor.

Yosemite topography, with thousands of feet difference in altitude in places within hailing distance of each other, makes it possible for the visitor to enjoy flowers of several seasons in a single visit, says a bulletin from the Washington, D. C., headquarters of the National Geographic Society.

Leaving the rich San Joaquin Valley at Merced for the beautiful trip by train through the Canyon of the Merced River, scarred by the gold diggings of '49 the traveler turns his floral calendar backward with each mile of climbing into the Sierra Nevada, passing rapidly from full summer to late spring at El Portal, where the official gateway to Yosemite National Park is located. A few miles farther, at the Gates of the Valley—that famous spot where El Capitán stands on the left. Three Graces and Bridalveil Falls on the right, with a vista of Yosemite Valley between—he finds spring in full glory.

And on the same day, visitors to Glacier Point, "just upstairs" from Yosemite Valley, on the rim of the granite wall enclosing the Valley and 3,254 feet higher, will be our skiing and tobogganing on four feet of snow.

By the time summer gets to Yosemite Valley, it is springtime at Glacier Point and when summer gets to the Point, the Sierra is enjoying the brief season which passes for both spring and summer and Yosemite Valley has progressed well towards autumn.

Snow Plant is a Park Wonder Most interesting of all plants to the visitors is the snow plant—and no other is so jealously guarded by the Park authorities. When word of a new stalk is received, a sign is dispatched hastily and erected near it—hands off! In its early stages the snowplant is more like a scarlet asparagus tip than anything else. As it matures, the leaves near the upper end unfold and reveal bells much like those of a hyacinth. The name snowplant is misleading, according to such a high authority as Jepson, who says the plant has nothing to do with snow, and that the name probably originated because it appears early in spring and is likely to be caught in a late flurry, which makes the richness of its coloring all the more conspicuous, causing the uninformed to think that the plant pushed its way through the new snow.

Contrary to the common assumption, the snowplant is not a parasite, but lives on decaying vegetable matter absorbed through its intricately laced white fibers which serve the plant in place of roots. It is unique in that the food absorbed is at once transmitted into the scarlet stalk and leaves, differing from other plants which are veritable chemical laboratories, demanding chlorophyll to assist them in digesting their daily meal.

There probably are more than 1,000 different species of flowering plants, shrubs and trees in Yosemite. Some of them, like the marsh buttercup, seem to bud beneath the snow and then burst into bloom as soon as the icy covering melts on the high levels of the park a thin patch of snow will disappear under the influence of a hot sun and the patient botanist in a few hours can see the buttercups unfolding into full blossom. This undoubtedly is due to environment, nature having taught the bowers of the high altitudes to adapt themselves to the brief season of warmth.

Indian paintbrush, thick clusters of pink bells on the manzanita, wild lilac, azaleas along the river bank, dogwood, lavender shooting stars, and many others appear in early spring. In June comes the gorgeous Mariposa lily, varying in color from a white to a deep red,

and resembling a cultivated tulip. Then there is the Washington lily, throwing its large white blooms high above the chaparral. Lupines reach their prime in August—there are so many different kinds in Yosemite that some of them never have been classified. You can see them in open stretches in the meadows, looking like miniature forests, topped by brilliant petals. The fireweed also grows in luxuriance.

"Monkey Flower" Comparatively rare among the flowers of Yosemite, and as beautiful as any orchid, is the mentzelia or blazing star, yellow petals, orange center, with a fringe of long stamens, giving it an exotic appearance. Curiosities among the park's flowers are the yellow monkey flower and purple elephant head, the former taking its name from the plaintive and humorous little face outlined on it, while the latter suggests the flapping ears and long trunk of an elephant.

Another interesting plant is the quinine bush, the bitter leaf of which is used by the Indians as medicine.

SCOUR STOMACH INDIGESTION

Theford's Black-Draught Highly Recommended by a Tennessee Grocer for Troubles Resulting from Torpid Liver.

East Nashville, Tenn.—The efficacy of Theford's Black-Draught, the genuine, herb, liver medicine, is vouched for by Mr. W. N. Parsons, a grocer of this city. "It is without doubt the best liver medicine, and I don't believe I could get along without it. I take it for sour stomach, headache, bad liver, indigestion, and all other troubles that are the result of a torpid liver.

"I have known and used it for years, and can and do highly recommend it to every one. I won't go to bed without it in the house. It will do all it claims to do. I can't say enough for it."

Many other men and women throughout the country have found Black-Draught just as Mr Parsons describes—valuable in regulating the liver to its normal functions, and in cleansing the bowels of impurities.

Theford's Black-Draught liver medicine is the original and only genuine. Accept no imitations or substitutes. Always ask for Theford's.

SCILLY ISLANDS FLOWER GARDEN

Famed For Mid-Winter Roses and Pirate Tales—Scene of Wrecks

The Prince of Wales now owns the flower garden of the British Empire, the Scilly Islands, newspaper dispatches say, and soon they will welcome him to their shores.

Like Scylla of classic fame, after whom it has been said the islands were named, the rocky shores of these islands have proved hungry monsters of the deep for mariners who dared to guide ships through their treacherous waters, says a bulletin from the Washington, D. C., headquarters of the National Geographic Society.

In 1907 Sir Cloudesley Shovel's fleet was thrown upon the rocks and two thousand men perished. His flagship was lost and two men-of-war sank beneath the waves, while two fireships of his squadron ran aground and the remainder barely escaped. There is an old saying that nine out of every ten natives of Scilly perish in the sea, but this is no longer true since the building of the lonely Bishop Light on an outlying rock to the southwest and numerous other lighthouses in the islands.

The history of the islands has always been tinged with fascinating romance. Through the theory that they the Cassiterides or "Tin Islands," of Herodotus has been abandoned, they might well have been the trading center where the Phoenicians met the early Britains and bartered for tin from the mines of Cornwall. At any rate, they were inhabited in prehistoric times, for the inhabitants have left numerous barrows and Kistvaens, or sepulchral chambers of stone, to tell of their existence on the islands.

The Scillies are generally accorded to be the legendary country of Lyonesse, the scene of many incidents which figure in the Arthurian romances and the Cornish folklore, as well as the land of the fervid and

ASPIRIN

Name "Bayer" on Genuine

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by million. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

OUR CITIZEN'S DEMAND Fully Complied With.—A Conway Resident Furnished It.

There are few items which appear in this paper more important to Conway people than the statement published below. In the first place, it is from a citizen of Conway and can be thoroughly relied upon. In the second place, it indisputably proves that Dean's Kidney Pills do their work thoroughly and not temporarily. Read this carefully:

Wm. H. Chryst, Conway, says: "Because of a cold I had kidney trouble and my back was weak and sore. My head ached and I was nervous and run down. The kidney secretions passed too often and were highly colored. Finally I got Dean's Kidney Pills and one box cured me of all the complaint. I haven't been bothered since."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Dean's Kidney Pills—the same that Mr. Chryst had. Foster-McBurn Co., Mfrs., Buffalo, N. Y. ad-9

tragic Tristan and Iscult. Athelstan made a vow before the shrine of St. Burian that he would go to the islands and conquer them, and upon them the scene of Sir Walter Besant's novel, "Armored of Lyonesse," is laid. There is an account in an early English chronicle describing the flourishing state of Lyonesse and how it suddenly subsided beneath the sea.

Once Haunts of Pirates.

As a matter of geological knowledge the islands are merely the ragged summits of the same granite ridge that forms the backbone of the Cornwall. One old family bears on its coat of arms a horse escaping from the sea, commemorating the fleetness of the charger which saved one of its ancestors from being swallowed up by the waves when this part of the coast sank. In ancient times the Scillies are supposed to have been the haunts of pirates and smugglers, and the forty mile trip from then to Penzance makes the traveler feel that no one less hardy than the Gilbert and Sullivan product of pirate at least should attempt it.

Today the Scillies have some of the finest gardens in England. They furnish the London market with early vegetables, but even more important than these products are the flowers grown on the islands. The air is warm and laden with moisture, and from December to June most of the inhabitants are occupied in picking, packing, and sending away the flowers. Great fields of narcissuses are grown, the fuchsias, geraniums and myrtles are said to become immense in size, and roses bloom in mid-winter. Even the hedges are made of flowering plants. Fishing, the occupation of the early inhabitants, still remains an important one, however, for lobsters must be furnished the London epicure.

Only five of the islands are inhabited—St. Mary's, Treco, St. Martin's, St. Agnes and Bryher—and Hugh Town on St. Mary's is the capital. Above this city towers Star Castle of Elizabethan days.

Until the acquisition of the islands by the Prince of Wales, they have been governed by a lord proprietor since the time of Elizabeth. Though the inhabitants of the islands have greatly benefited under the system inaugurated by the last family of proprietors some peculiar incidents of their tenure have been told. It seems that at one time there were people living on the island of Samson, but in order that the Scillies would not have to furnish sustenance for many people, he transported all the Samsontes, as well as the poor of the other islands, to the mainland, and it is said that his tenants were allowed to keep only one son with them. Consequently many of the children had to be sent to sea or to the shipyards, but those who were left behind grew in wealth and the islands generally prospered as a result of the intelligent despotism.

THE CITADEL The Military College of South Carolina Charleston, S. C.

Ranked as "Distinguished Military College" by the War Department. Offers a four-year course in liberal arts, with electives in civil engineering, science and modern languages. Vacant Scholarships One scholarship in Horry County will be filled by competitive examination July 8th, 1921. For application blanks apply to Col. O. J. Bond, Superintendent.

AUCTION SALE

AT AYNOR, S. C.

ON

Friday, July 8th, 1921

10:30 O'CLOCK, A. M.

BANKRUPT STOCK

OF

AYNOR PHARMACY

You all know when the Aynor Pharmacy was closed by the Sheriff of Horry County. You know about what the stock is and about what the fixtures in the store are. The sale has been ordered on the date above mentioned by the Court of Bankruptcy held in Florence, S. C.

There is no fake about this sale. It is the real thing, and those who fail to attend this sale may miss one of the best opportunities of the time. The entire stock will be divided into lots, both large and small and will be knocked down to the highest bidders. The fixtures will go to the successful bidders for them, and also the book accounts on good people at Aynor.

Following is the official form of advertisement:
