

### GREEN SEA NOW FORGING AHEAD

Interesting Report Made of Progress by John P. Derham

At the recent meeting one of the matters of greatest interest was the report made by Mr. John P. Derham, concerning the Green Sea school.

He made the report for Green Sea school district No. 7, in Horry County, as follows:

Madam President: The president of our local association is not well enough to attend and requested that I attend in his stead, with Miss Veronica Mills, delegate. I regret that I have no written report and not all the facts, as to the doings of our association. We have collected, since Mar. 15th, 1922, to date \$184.00, which has been expended as directed by the association. I am unable to say what balance is on hand.

Our association was organized by Miss Thomas more than a year ago. We have met more than twelve times during the past year. Prior to this time we have been collecting money, realized in different ways, through the efforts of the teachers and the ladies in the community, which money has been expended for wood, replacing broken window panes, brooms, chalk, chairs and such other necessary expenses as arose. I am going to state our experience for the benefit and encouragement of other rural schools: We have a problem in the country different from that of cities and towns. We live in an agricultural community, six miles from the nearest railroad station, which is in North Carolina, and eight miles from the nearest in South Carolina. Not one dollar's worth of corporate property, farms alone, excepting two small country stores. About ten or fifteen years ago we had a school with two teachers. This number increased from time to time, until we were using our old school building, the church and upstairs of an old store. We have spent, for a new building, \$25,000.00. We are due on the same \$22,000.00. We have a special school levy of 16 mills and a levy for building of 20 mills.

We have eight good classrooms, a teachers' room, a musical room and good cloak rooms. Also, an auditorium 48 by 70 feet, with gallery, not complete. We have eleven grades, eight months' term, with nine months in sight.

I feel that we are dependent largely on the association for an understanding of our problems and the development of a community spirit that is so essential for the well-being of the children, their mothers and fathers. We thank Miss Thomas, the organizer, and Mrs. Freeman, who has charge of the work in Horry County, for their efforts along this line.

### THE APPROACHING MOSQUITO SEASON

Senior Sanitary Engineer J. A. Le-Prince, of the U. S. Public Health Service, who, because of his long experience fighting mosquitoes and mosquito-borne diseases, is as well qualified as anyone to speak on this subject, makes the following comment and suggestions relative to the approaching mosquito season in the South:

It is pleasing to note the increased interest and activity developing in many places with regard to mosquito control.

For many years we have been satisfied with the partial protection from the mosquito pest obtained by screening our houses. But the public are evidently no longer satisfied to pay fifty million dollars a year to be driven behind screens and in many localities they have not only decided that the pestiferous and disease bearing mosquito must go, but are actually eliminating both species. In one southern State over two hundred communities were busy last year with mosquito elimination.

Last month the propagation season

### CONWAY SHIPS MANY BERRIES

(Continued From Page One.) The result of the efforts put forth is now seen in a thriving association of planters who feel an abiding interest in the work of growing and shipping the fruit.

The crop would have been much larger than it will be if it had not been for the freeze at Easter time. The light frost since that time was not very damaging. There will be larger sized berries and perhaps just as large a crop so far as the light frost since Easter was concerned.

Some crates were picked and shipped away last week, to be placed with solid crates at Chadbourne, N. C. Among those who sent off some crates last week were: W. E. Sessions, J. A. Stalvey and N. T. Collins. Before the crop comes in sufficiently to make up a carload, the practice is to ship the berries off to Chadbourne, where they are taken by Paul Brown and usually at fair prices. This is not the only way, however, in which the first crates are handled, as some of them are shipped off to commission men by express and returns are sent to the growers by the commission men.

The Horry County Strawberry Growers' Association was organized at Conway this year. It has not been in existence more than two or three months. It will do for the strawberry growers what the tobacco and cotton associations are doing for the cotton and tobacco planters.

The association has employed Mr. Hal King to work here for the association this year. He will take care of the berries as they are brought in by the growers, giving receipts for them and looking after the crates until they are placed in the cars and shipped away, or else sold on the local market to some buyer who may make a satisfactory bid for them.

A committee consisting of N. T. Collins and W. E. Sessions will have charge of the selling of the crop to buyers who may be on the market, either here or at Chadbourne; or if no satisfactory bids are received for the lot here, they will attend to the shipments of them to the northern markets.

An important move was recently made when it was arranged to obtain the services of an expert strawberry grader from Clemson College. It is stated that the grader will not be able to spend all of his time at Conway, but he will divide his time between Conway and some other place; but his time here will be sufficient to get the berries properly graded. This is an important matter in the interest of quick selling of the berries and getting a fair market price for them according to their size, quality and flavor. It is intended to train the growers here in the process of grading so that no expert will be needed hereafter.

The variety planted here is the Klondike. It is one of the finest strawberries ever grown. It has been grown here ever since the industry started, and it is said to have a good reputation, all its own, on nearly every market in the New England cities.

The growing success of Conway as a strawberry shipping point, and the increasing demand for the Conway berry, which is said to be many times better than the berries raised at a number of places, will be watched with much interest. It is certain to gain a big impetus from the way the growers are going about their business affairs this year. They are using modern methods of handling their crop and marketing it, and these are the methods that bring success.

The work of finishing up the brick walls at the store of the Farm Implement Co., was commenced again last week, after a delay of several months, following the erection of the party wall between their property and that of H. H. Woodward, in the rear of the city hall. A nice front will be completed, it is said.

It takes hard work and a long time of it to carry anything over in a big way. Don't forget that.

of the malaria conveying mosquito began again in the southern portion of the Gulf States, and within the next sixty days, while the farmers are busy planting their crops, the mosquitoes will be busy planting mosquito eggs in such stagnant water as they can find within flight range of your home.

In many localities the public are now ready for mosquito protection, and, in fact, paying for partial screen protection, but they do not get together to discuss their local mosquito problem and determine just what it is. Nobody steps to the front to see that a proper start is made.

What sort of a mosquito problem have you in the community in which you live? Some small communities in rural districts are worrying along with a high sick-rate and discomforts that are not at all necessary and which cost more to support than to eliminate. Your State Health Department has trained mosquito men out in the field to help and to show you how your community can get most results for least expenditure. Mosquito freedom is just like everything else—first we must decide that we want it and then we must go out and get it.

### HOW MERCHANTS AND BUSINESS MEN MAY SAVE THEIR VALUABLE TIME

(Written by a Lawyer) If you are a merchant or business man of any kind, and are not using in your office the Timesaver Law blanks, now being produced by The Horry Herald, you are missing one of the short cuts to success and efficiency. These blanks are designed by H. H. Woodward, of the Conway bar. The printing of them is supervised by him. The blanks now offered to the general public, for their use and convenience, are the result of Woodward's experience as a lawyer running over a period of twenty years.

During all the time that Woodward has practiced his profession at the bar, he has been the owner of a job printing plant. While studying law and handling cases, he also had experience in the years gone by at the printer's case. He learned how these blanks should be printed in order to carry out the idea of ease in filling out the blanks and thus save valuable time in the law office. He designed for his own use in the law business, from time to time, during the more than twenty years that he has practiced law, the blanks that would answer the requirements of the law and at the same time could be filled out with the least amount of labor. He strove to make them easy to understand so that a stenographer or office clerk could fill them out correctly with the least amount of instruction and experience.

The large stock of law blanks now carried at The Herald offices and which stock is growing still from day to day so as to cover, on a larger scale, the whole field of the law, is the result of these efforts directed along this special line.

These blanks are used by merchants, notaries, magistrates, lawyers, fertilizer men, installment men, and many people in private life, who want to use a land deed, a note or mortgage in some transaction that is important. The stock includes those blanks which the layman will use without going to a lawyer. These are printed and fixed to suit just such a situation as that. He is apt to get the document right by reason of the fact that the foundation is right. Too many times it is the case that a layman, undertaking to be his own lawyer in the matter of a land deal or chattel mortgage, will leave off something that his blank he uses does not indicate should be done, by reason of the ignorance of the printer who got the blank out.

In such cases as that which is mentioned in the last foregoing paragraph, the law blank furnished at The Herald office reduce mistakes to a minimum. The blanks are easy to fill in and they are easy to understand. They take the least amount of work and worry in getting ready for the signature and probate.

The customers of the legal blank department of The Horry Herald has been an ever increasing thing. It is increasing now. There are many who still use the old and antiquated forms made by printers years ago who did not know the meaning of the word law. Designed hurriedly by some attorney, who was not connected with the print shop, the lawyer hastened through with his work of making out the copy, then the printer, not knowing what the law required, hurried through with the printing of the copy and the result was a conglomeration of terms and phrases which would then, and still does, form a riddle to the uninitiated in such work.

Why go on and lose time every day in the counting room in trying to figure the old forms of mortgage of real estate, crop mortgage, chattel mortgage, notes, and things like that when you can get the modern kind by ordering from The Horry Herald.

The company behind The Horry Herald guarantees satisfaction, no matter who the customer is, and no matter where he does business. The stock, as already stated, contains blanks for the busy business man who wants to close his business affairs quickly and feel that he has done it right and according to law. For all such The Herald can furnish the things he is looking for. The stock has blanks in it, of course, that are intended for the use of lawyers only, as they cover matters that laymen have nothing to do with. These are just as good for the lawyer as the others are for the layman. The blanks for the busy lawyer are intended to save his time and make it possible for him to serve his clients in quicker time, and always be on the job.

For young lawyers, nothing better can be suggested for them than the use of the blanks printed and for sale by The Horry Herald. The young lawyer will be at once impressed with the neatness of the work, but more than all, he will be surprised at the aid he can get from using the blanks. They will teach him little things of practice that he hardly had the chance to know, and understand before. But just the same, the old lawyer needs these blanks, for he is at a time of life when less work is what he pines for and it takes less to fill out and use the blanks that the Timesaver system offers than it does to use the ancient kind you generally see in his cabinets.

Constant improvement and service is what is being aimed at in making and selling these blanks. Prompt service the same day the order is received is one of the things that will be appreciated. When a business man or a lawyer is in need of some blanks to use in some transaction he does not want to wait. He needs the goods right then. He does not want to deal with a printer who will run the risk of sending him the wrong thing, thus causing him delay and irritation. The thing to do is to order from a concern that is owned and managed by a lawyer. You are apt to get what you order, because the lawyer knows what you mean.

Successful business men, and lawyers too, have been using these for the past twenty years. They have been able to forge ahead by reason of saving time and having their papers properly made up. You can do the same thing by sending in an order for some of the best forms you have ever seen. If you are not already a user of these forms, get a letter off today to H. H. Woodward, or The Horry Herald. Address in either way, and your letter will have attention at once. Write for a price list and alphabetical index to these blanks. You can use the list as an order blank, as a new list will be shipped with the order.

The Horry Herald has one of the finest plants for this work in Eastern South Carolina. The improvements in our equipment make it possible to produce more blanks on short notice, even if the last edition should be out. Do not be afraid you will be neglected if you write and send us an order, and the blanks should happen to be out of stock that day; for the matter of producing more is nothing as compared to former practices in making these blanks.

Write today for samples of any blank you would like to see. Ask for a list of them, in which you can look up those you need.

The Horry Herald also prints these blanks in quantities with the name of the user printed in at all the necessary places, and with the name of the county at the top and on the back. Get their quotations on any kind of work that you may want. Send your orders for letter heads, note heads, bill heads, statements, trespass signs, folders, remittance sheets, tally sheets, orders, tickets, sale bills, receipts notices anything in any line of work that you may need. See how quickly the order can be filled and satisfaction is guaranteed.

### BOLL WEEVIL WARNING OUT

"It may not come this year, but Spartanburg county is bound to be much harder hit by the boll weevil than last year," declared Ernest Carnes, county farm demonstration agent.

"This has been the experience in all other sections where the boll weevil has appeared," he went on, "and I know of no reason why this county should be an exception. Last year Spartanburg county made about two-thirds of a normal crop of cotton, and in the due course of time it will probably be cut to one-fourth of a crop. In times past Spartanburg county has made 80,000 bales of cotton; last year the crop was around 60,000 bales. I believe that the year is coming—it may be this year, or it may be later—when the total crop of the county will not be more than 20,000 or 25,000 bales.

"That is why we are urging the farmers of the county to diversify their crops. The farmers must have more than one money crop, because from now on cotton will be too uncertain."

"How much of his acreage should a farmer plant in cotton?" Mr. Carnes was asked.

"By no means more than a third of his acreage should be planted in cotton," was the prompt reply. "To plant more than that will be running a risk that will be inexcusable."

"After Spartanburg has been as hard hit by the boll weevil as Greenwood or Newberry, or other counties in the upper part of the State, all the farmers will begin to fight the boll

weevil then," he went on, "but until this time arrives so many farmers will neglect to take the necessary precautions that even those who do will not be safe. It will take an experience amounting to almost a disaster to make all the people realize the situation. People will never learn by the mistakes of others, apparently, and that is why we are looking for a much heavier boll weevil damage than we have yet had. It may come this year, or it may be deferred—much will depend on the weather and other conditions. It has been demonstrated that cotton can be grown under boll weevil conditions, but this can be done only when all the people in a large area are working together to fight the weevil. Where even a few are careless the efforts of the others amounts to little. Eventually those who are too lazy or too careless to fight the weevil properly will be driven from cotton growing altogether and then those who are willing to do the work can succeed.

"As I said, the big damage is bound to come, though no man can say for certainty that it will come this year. But it is coming—don't doubt that for a minute."

### MADE WATER HAUL

H. N. Sessions was sent to investigate a reported violation of the game laws said to be going on along the Waccamaw river, near Cox's Ferry, one day last week. He found nothing of importance when he went and returned without making any arrests. He was attending to this in place of the game warden, Mr. W. S. McCaskey, who had illness in his family and could not get out to run down the report which had been made here at Conway concerning the matter.

### WARRANT NOW CHARGES FRAUD

J. N. Hamilton Claims he Was Under Age at That Time

A warrant was sworn out on March 28th for Herbert Hamilton charging the obtaining of goods by false pretenses on or about April 7th, 1920; W. L. Richardson being the prosecutor in the case.

In the warrant, the defendant is named as J. H. Hamilton, but to his friends and neighbors he is known as Herbert. The affidavit as it appears in the record states as follows:

On information and belief: That at Conway, Horry County, and in the State aforesaid, on or about the 7th day of April, A. D. 1920, one J. H. Hamilton did knowingly and designedly by falsely pretending that he was the owner and possessor of one certain dark bay mare mule, about six years old named Kate, and one mouse colored mare mule about seven years old named Pet, also one thimble skrin wagon (one horse) and one Virginia Make Top Buggy; in that he did execute to the Peoples National Bank a chattel mortgage on the same, and did by the aforesaid false representation and knowing it to be false at the time did then and there fraudulently and deceitfully obtain the endorsement of him the said W. L. Richardson thereto, with intent to cheat and defraud him, the said W. L. Richardson of the value of \$254.00, of the proper goods and chattels of him, the said W. L. Richardson, contrary to the form of the statute made and provided, and against the peace and dignity of the State; and that W. L. Richardson, J. O. Carrette, H. N. Sessions, D. A. Spivey, are all witnesses for the State.

The warrant was served on April 2nd. The case was called in the magistrate court this week and it is understood that the defendant waived any preliminary hearing and gave bond for his appearance at the court of General Sessions in the summer.

It appears that the defendant will strenuously oppose the prosecution, stating that the defendant was under age at the time of the transaction wherein there was a horse trade, or something of the kind, perhaps several trades.

It is stated that this note after it fell due at the Peoples National Bank was paid and taken up by the endorser. Some time along then it appears that there was a prosecution brought against the same defendant and by the same prosecutor on a charge of disposing of property under lien. The paper has not been able to obtain the particulars of the result that came from this first prosecution of Hamilton.

Hamilton is a young farmer of the Bayboro and Adrian section of the

county. At the time when the transactions took place which have led to this charge being brought against him, he was living with his father, J. A. Hamilton of that section. It appears they worked the older man's farms together and treated the property of one of them usually as the property of both. Most of the trading, it appears, was done by J. H. Hamilton.

Horry County is the best county and Conway is the best town for all of us, or it had better be.

### Watch your pimples vanish

Why? Pimple-Poison goes when Red-Blood-Cells increase! S. S. S. builds these Red-Blood-Cells!

You can be sure of this, nature has no substitute for red-blood-cells. Pimple-poison can't live in the red rivers of your blood as long as there are

Every woman, every man, can now have a face clear as a Rose-Petal!

enough rich red-blood-cells in it. More red-blood-cells! That is what you need with S. S. S. on see Pimples staring at you in the mirror. Blackheads pimples, worse! Eczema is worse yet! You can try everything under the sun,—you'll find only one answer, more cell-power in your blood! The tremendous results, produced by an increase in red-blood-cells is one of the A. B. C.'s of medical science. Red-cells mean clear, pure, rich blood. They mean clear, ruddy, lovable complexions. They mean nerve power, because all your nerves are fed by your blood. They mean freedom forever from pimples, from the blackhead pest, from boils, from eczema and skin eruptions, from rheumatic impurities, from that tired, exhausted, run-down feeling. Red-blood-cells are the most important thing in the world to each of us. S. S. S. will build them for you. S. S. S. has been known since 1828, as one of the greatest blood-builders, blood-cleaners and system strengtheners ever produced. S. S. S. is sold at all good drug stores. The large size bottle is more economical.

**S.S.S. makes you feel like yourself again**

**Calco Automatic Drainage Gate Turns Swamp Land Into Farm Land**

Gate is absolutely automatic, permitting water to flow off your land but prevents flood or tide water from backing up on your land again.

One plantation man writes that a Calco Gate converted 1,500 acres of worthless mosquito breeding swamp into productive farm land.

WRITE DEPT. "C" FOR SPECIAL LITERATURE

**The Dixie Culvert & Metal Co. ATLANTA GEORGIA**

**IF SICK, BILIOUS! START YOUR LIVER**

Don't Take Calomel! "Dodson's Liver Tone" Acts Better and Doesn't Gripe, Salivate or Make You Sick—Don't Lose a Day's Work—Read Guarantee

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work.

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out" if your liver is torpid and bowels constipated or you have headaches, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.
