ROSA OF TANNENBURG.

In a great stone castle in the midst of the deep pine forests of Germany, there lived, a great many years ago, the knight of Tannenburg, and his daughter, Rosa. It was in the days when the lawless nobles of the country were constantly quarreling with ene another, each burning his neighbor's grain and stealing his cattle wille the

In an upper room one warm summer day, Rosa and her father satitogether. The knight had just come home from the wars, badly wounded, and Rosa, a fair-haired girl of 17, sat by him working over her gayly colored

tapestry. "Father," she said. "Tell me the story of how you got the chain round

Rosa had heard the story a hundred times before now, but she never tired of hearing it any more than the old knight of telling it.

"When I was a page at court," began the knight, stroking his long, gray beard, 'a great tournament was given in honor of a French prince who came to visit our emperor. There I saw your mother for the first time and so lovely was she that she was elected to be the queen of beauty, and was to give the prize, a golden chain, to the victor. I loved her from the moment I saw her and her beauty gave me such strength and daring that I came out first in the games, much to the chagrin of the young baron of Odenwald, who opposed me fiercely in the tourney. He was like myself, a suiter for the hand of the queen of beauty, and when I finally won her for my bride he swore that he would have his revenge on me."

"But," interrupted Rosa, "his castle is only lifteen miles from us, and he has done us no harm vet.' Yes," answered her father, "that

A loud clamor in the courtyard inter-rupted the story, and on looking out of saw the very man they were speaking of, the baron of Odenwald, and his soldiers marching up to the coatlest of the former restored to him. The knight's soldiers were still at the wars and the few old men left to guard the castle had been easily overpowered by the fierce baron.

Rosa screamed with terror. She heard the tramp of armed feet coming ending after all of the story of the goldup the stairs. In came the haughty baron of Odenwald and ordered his men to bind and c rry off the wounded and helpless knight of Tannenburg. The unfortunate knight was hurried off, Rosa turned out of the castle, which was looted, and then locked up, and the poor girl left weeping and dis-

All night she wandered through the dark pine forest till she came to a charcoal-burner's hut, where she was taken in and kindly treated. Days passed by and Rosa longed to see her father once more, and perhaps help him to escape. Accordingly, one day she stained her basket of mushrooms on her arm, started off for the castle of Odenwald.

Rosa accepted this offer eagerly, and her duties, none too light, began that very day. She had to light the fire in the morning, dress the children, help the porter's wife cook the most unsavory soup for the prisoners of the castle and do many other things. One day the porter came to his wife and told her that he was obliged to go away with the baron for some days and that she would have to take the prisoners' food to them, besides cooking it. "No, indeed," replied his wife

Together they went down a winding flight of stone steps, opened a door heavily bolted and barred and down a long dark corridor, dimly lighted by the porter's lantern. On one side were small stone cells behind whose iron gratings wild, cruel faces gleamed in the light of the passing lantern. Hideous oaths and fearful laughter followed them, and Rosa shrank, frightened, to the porter's side.

Do not fear them," he said, "they cannot possibly escape. This man, however, is good and gentle, and you can go right into his cell." He stopped in front of one of the gratings and held up his lantern. Rosa's heart beat fast and loud. There, on a wretched heap of straw, lay her father, asleep, pale and emaciated. She longed to call him, but remembered she must be silent before the porter, and they left him sleeping and walked back through the long corridor, bolting the heavy

door behind them. The next day Rosa took into the pris on the bowls of unappetizing soup, pushed one under every grating and finally came to her father's cell. Unlocking his door she rushed in and knelt by the sick man's side. "Father! father !" she cried. "Rosa!" exclaimed the knight, recognizing his daughter in spite of the brown stain and rough dress. He took her in his arms and together they wept over their terrible misfortune. Then Rosa told her father all her adventures since he had been carried off, until the sound of the great bell of the castle coming dim and muf fled through the dark dungeon wall warned her that it was time to go back

The castle of Tannenburg was like all castles of that time, strongly fortion a sharp stone projecting halfway there was no time to be lost, and, jump-ing into the bucket, told the men to let her down gently till she reached the boy. Soon the child was safe in her arms and the bucket with its occupants, carefully brought up to the mouth of the well.

It was not many hours after that the baron of Odenwald, sitting in the great hall of the castle with his guests, heard the story of his son's narrow escape from death and of Rosa's plucky act.
"Bring the girl here!" he commanded, and Rosa was brought in, her

"Baron of Odenwald," answered Rosa, boldly, "there is one favor I will ask of you. Give up your prisoner, the knight of Tannenburg, to me."
"No, no! Not that!" frowned the baron.

A murmur went around the hall from the guests—"your word;" "your hon-or"—and the baron turned pale with chagrin and rage. Ry his order the wounded knight was brought up from the dungcon. Astonished and almost blinded by the bright light he gazed around him whilst Rosa quietly put her hand in his.

The bottom crop is a heavy ne, the middle crop very poor, having been shed, while the new growth is putting on a top crop in places. As a whole, its present condition cannot bo said to be promising, nor yet extremely poor, both conditions prevailing according to locality. Sea island cotton shedding some, still blighting, is well fruited and beginning to open.

There is general improvement in corn that has not reached maturity, with a few reports of exceeding fine crops, but the contrary is the rule. Fodder pulling is well under way, and being finished in southeastern counties. A fair yield of fodder has been saved. Tobacco cutting and curing is about

of death from its sorrowing mother she has some sense of consolation which is denied to the sad hearted woman who has never been blessed with the joy of clinging little arms around her neck and a dear, ten-der little head nestling against her loving bosom. It is sad indeed, that motherhood,
