GERMAN FOREIGN SECRE-TARY SAYS DECLARATION IS MISUNDERSTOOD

DOES NOT MEAN A BLOCKADE

Says All Questions As to Its Validity Promised on This Theory Are Excluded.

BERLIN, via The Hague to London, Feb. 9.—(10:35 p. m.)—Gottlieb von Jagow, the German föreign secretary. Jagow, the German foreign secretary, who was visiting Berlin in the absence of Emperor William on the eastern from today explained to the correspondent of the Associated Press the nature of the recently announced German naval measures to be taken against hostile commercial shipping, over which, he said, there seemed to be misapprehension abroad owing to delay in the transmission of the memorandum accompanying the proclama-tion. The phrase "submarine block-ade" as used in the foreign press, the secretary said, perhaps also was re-sponsible for this misapprehension.

"The announcement was not a declaration of a blockade," said Herr von Jagow. "All questions as to its validity promised on this theory are excluded. The proclamation designated waters around Great Britain and Ireland as a war area, announces Germany's intention to conduct many's intention to conduct war op-erations in this region, and particu-larly to destroy commercial ships of

the enemy.
"England months ago declared the whole of the North Sea a war area. German warships heretofore have destroyed merchant ships belonging to the enemy only when there was every certainty that their passengers and crew could get away safely. But in the future this, forbearance must be subordinated to military considera-tions and since England, by measures inadmissible under international law, has paralyzed neutral commerce with Germany in an attempt to force upon the German civilian population death

by starvation."
"Anyhow," continued Herr von Jagow, "hostile merchantmen have no claim to consideration if, as in part already has been the case, they are armed or offer resistance to the Ger-man naval forces. Since the British admiratty on January 31 instructed British merchantment to use neutral flags, neutral ships, even without taking into consideration the unavoid-able accidents of war, run the risk of being mistaken for hostile mer-chant ships and of falling victims of attacks intended for these ships.
