What Meat?

That is a secondary consideration. The first question is, What butcher? You are not sure of getting a fresh, tender juicy steak from an unreliable butcher.

Some Facts About Potash

POTASH is higher than last year because of scarcity brought about by war in Europe and recent decree by Germany entirely prohibiting further exports, but the increased cost, if proportioned to the amount of fertilizers used per acre, is a small item.

For Potash in mixed goods, our charge at this time is at the rate of \$1.50 per unit potash (present market price \$2.50 to \$3.00 per unit)—in comparison with \$1.00 per unit last season.

Table with 2 columns: Potash weight (200, 300, 400, 500 lbs) and Cost increase (5c, 7c, 10c, 12c more than last year).

Table with 2 columns: Potash weight (200, 300, 400, 500 lbs) and Cost increase (\$1.00, \$1.50, \$2.00, \$2.50 more than last year).

This is a very small increase in charge for Potash when you consider that Murate of Potash is now selling at about \$125.00 to \$150.00 per ton (equivalent to \$2.50 to \$3.00 per unit of Potash) at ports, for cash in large quantities, whereas our present charge of \$1.50 per unit is for goods delivered, time payment.

Our price per unit of Ammonia delivered is \$3.25 against \$3.50 last year. A reduction of 25c. per unit, although Cotton Seed Meal is now selling approximately at the rate of \$3.40 to \$3.50 per unit of Ammonia.

If you want Fertilizers containing Potash, write or apply to our nearest Sales Office.

Ordinarily you would not risk growing your Crop without Potash. Why do so this year when the cost per acre is so little more than in previous years? Can you afford to take such a chance?
