Published Every Morning Except Monday Semi-Weekly Edition on Tuesday and Friday Mornings

Daily Edition—\$5.00 per annum; \$2.50 for Six Months; \$1.25 for Three Months. Semi-Weekly Edition—\$1.50 per annum; 75 cents for Six Months; 50 cents for Four Months.

IN ADVANCE

Member of the Associated Press and Receiving Complete Daily Telegraphic Service.

A Larger Circulation Than Any Other Newspaper in This Congressional District.

The Intelligencer is delivered by carriers in the city. If you fail to get your paper regularly please notify us. Opposite your name on label of your paper is printed date to which your paper is paid. All checks and drafts should be drawn to The Anderson Intelligencer.

THE WEATHER

Washington, Jan. 23.—Forecast: South Carolina—Rain Saturday, Sunday colder and generally fair; moderate to brisk southwest and west winds.

THOUGHT FOR THE DAY

Shared solitude, divine retreat choice of the prudent, envy of the great by the pure stream or in the waving shade. We court fair wisdom, that celestial gift. The genuine offspring of the loved embrace, (Strangers on Earth) are Innocence and peace. —Young.

Good government has flaws for the bad man.

An infernal machine—the neighbor's graphophone.

The man who does need credit is the man who gets it.

Rag time has at last succumbed to the tango, a worse evil.

Get out your split log drags. After this rain they will do good.

From what Villa says, we believe that he doesn't like that fellow, Huerta.

Haven't we had fine weather for breaking up the ground for the new crop.

The old time school teacher with his "hitory wythe" is a thing of reminiscence only.

The big interests were so impressed with Pres. Wilson's golf that they eat out of his hand now.

Anderson has the privilege of paying a plenty for its illuminating gas, but we can't do without it.

Anderson will get a lot of advertising—good or bad—out of the conventions this year. Let it be good.

Another reason why we are glad the legislature is in Columbia and not here—those suffrage bills.

Anderson is sad in the news which comes from the bedside of that splendid Christian man—Henry Claude Townsend.

Anderson is my town. If the asylum is to be investigated, let it be done decently and in order and cut out the politics.

Anderson should at once take steps to get one of those textile schools to be created by the State—if the Senate passes the bill.

We believe that humanitarian mill presidents have more heart for their employes than the hired workers of the child labor organization.

The Darlington man who committed suicide certainly had an idea of the eternal fitness of things. He committed the act in the cemetery.

Try cuffs are now demanding that they be given the position of street cleaners. That is one job that will not be denied them by even the most ardent "ants."

We can't understand why the Interurban took off the night trains. Are they not come to town a little with the chance of creating business sometime?

JUST PRINTERS.

The St. Louis Globe Democrat Comments on a news item from the Illinois penitentiary at Joliet, to the effect that among the 1200 inmates, there is not one printer. The newspaper produced by the prisoners has therefore to be set up outside the institution. The Globe Democrat remarks: "The printing craft is not supplying its quota to the penitentiaries of the country."

The Globe Democrat notes that it was not always thus in the days before linotypes, when the tramp printer infested the land.

Printers as a whole do seem singularly free from the criminal taint. They are unpretentious simple minded, living in modest houses in side streets. Few of them own "dress suits" and their names rarely appear in the select columns of high society.

A printer on newspaper work spends his time putting into type the history of the world. All forms of human activity pass through his brain and hands before the record is spread before the world. His mind is a storehouse of human experiences, and he looks at life with the maturity that grows out of this background of intelligence.

A man before whom this daily picture of crime and punishment is spread must be a fool indeed, if he did not acquire a pretty just estimate of the real values of life. From thousands of human stories that come to his attention the value of law abiding conduct is to him axiomatic.

All callings have their faults. The printer sees too much human fillety. The joy, the achievement, are commonly not dramatic enough to make good news stories. It is not strange that the average printer becomes somewhat cynical in this mental atmosphere. But is it the possibility of a clear eyed, thinking man, who in a quiet way puts much folly out of the way by his perfection of his usefulness.

A MARKET HOUSE

The Daily Intelligencer has heard favorable comment on the proposition to make it easier for Anderson County people to deliver meat in the city—either to butchers or to the public. The people of Columbia are working on the same line. In that city a new market house is to be built in the middle of Assembly street, which is 150 feet wide.

Senator Weston now has in the legislature a bill to permit the city to build in the street—as the streets are the property of the State.

Columbia will spend \$40,000 for her market house. One to suit Anderson's needs could be built for much less.

It is to be hoped that Anderson people will remember how long those hot summer afternoons will be next summer before the proposed new baseball league.

We are willing to back up Pres. Wilson in everything except in letting a negro police court judge hold on in Washington. No negro should preside over the trial of a white man.

The "compulsory education" bill has no great fault but its name.

IT'S JUST AS EASY.

Washington, D. C. Jan. 23—Many people have an idea that there some thing mysterious and occult about the work of the Weather Bureau in forecasting the coming of storms, frosts and floods. Not a few think that the observers must necessarily get their idea by reading the planets, the stars and the moon. As a matter of fact the forecaster of the Bureau fortells the coming of disturbances in a businesslike way, very similar to that in which a man who has ordered a shipment of goods would estimate the date of its arrival.

Suppose a business man had ordered a carload of pineapples from the Hawaiian Island. He would know the average time it would take the steamer to make the trip to the Pacific port, the average time for unloading and loading into refrigerator cars, and the average number of days to be allowed these cars for their trip across the continent to New York. His estimate, would be subject to error because the steamship might however be delayed by fog, or the cars might meet with an accident.

Storms, like pineapples, as a rule do not originate in the United States. They come to us, some from the Philippines, Japan, Siberia, Alaska, Canada or the Gulf of Mexico. The Weather Bureau gets cable telegraphic or wireless notice of a foreign storm. Station after station, or vessel after vessel reports the storm's arrival, in its neighborhood, so that the general direction and rate of progress can be determined very early. In fact the arrival of some storms can be foretold ten days in advance. The forecasters watch for the re-

gion of low barometer which is the storm center around which the winds blow. This whirl or eddy moves bodily forward with the general eastward drift of about 650 miles a day in our latitudes. As the lines of equal pressure (isobars) around the low center crowd closer together, the winds attending the storm increase in force. The forecaster determines the direction of movement of the storm and its velocity.

When weather disturbances are reported, the forecasters know from experience about how long it takes them to reach our Pacific Coast, and then how long after they will reach the Atlantic Coast. For example, if a storm coming from Siberia drifts eastward around the North Pole and reappears in Alaska, it should appear in Washington and Oregon in about two days; should get to the Great Lakes in six days and to the Atlantic Coast in seven or eight days.

Unexpected conditions may delay storms or drive them from the straight track just as a refrigerator car may be thrown off its schedule or be shipped by accident on a wrong road. Some of these deplete themselves by running to regions of high barometer which are of greater magnitude and extent than the storm itself. Some of them, however, travel completely around the world.

To keep tab on cold waves that come into the United States from Canada and Alaska, the Weather Bureau studies the Canadian Weather reports. England sends reports from Iceland, the British Islands and Continental Europe, and daily reports come from St. Petersburg on the conditions in Russia and Siberia.

The same businesslike system used in tracing the track of a storm is applied in determining the arrival of frosts.

Floods forecasts are made in much the same way. Information as to the amount of rainfall at the head waters of streams that cause floods are covered by telegraphic reports sent by local observers. As this rain reaches the main channel, the height of the waters in the channel is determined by successive gauging station. Past records establish how much a height, say 20 feet at Dubuque, Iowa, will produce at Davenport, another station 80 miles down the Mississippi. This plan is followed all the way down the Mississippi, and at each point full allowance is made for the effects of water from tributaries, and from additional and local rainfall. As a result of these observations in the recent flood, the people of Cairo had warning a week or ten days in advance. The Pittsburg district can be given only 12 to 24 hours notice because a flood is upon them within 24 hours after a heavy rain storm.

HONOR ROLL

Those whose names appear on this roll have made an average of 90 or more on examination and have not fallen below 98 on reports.

Tenth grade—Davis Glenn, Gilman Thompson.

Ninth grade—Frank Marott, Marion Compton.

Eighth grade—John A. Johnson, Dewitt Gleen.

Seventh grade—Gatha Davis, R. M. Davis.

Sixth grade—Mildred Heller, Lucile King.

Fifth grade—Haskell Marrett, Hoyt Wooten, Wilton Davis, John Will Grubbs, Janie Rae Isbell, Julia Davis, Marie Grubbs.

Fourth grade—Boderick Heller, Landrum Hanvey, Elma Brock, Iris Lovinghood.

Third grade—Fred Isbell, Prue Davis, Mariner Thompson, Lester Glenn, Claire Heller, Gladys Lovingood.

Second grade—Lucile Callahan, Wyatt Grubbs, Cecil Isbell, Lush Patrick, Kate Pullen.

First grade—J. C. Brock, Janette Brown, Viola Callahan, Rubie Cobb, Hubert Davis, Willie Glenn, Jimmie Hanvey, Mattie Nixon, Leland Wiggins, Clarine Wooten, Dennis Worley, Lester Worley.

G. S. Ryder, Principal

James M. Moss of Wallula was among the business visitors to the city yesterday.

ABOUT FOLKS YOU KNOW

E. R. Horton, of Belton, was in Anderson yesterday for a few hours.

J. B. Spearman of Piedmont, spent yesterday in Anderson on business.

J. E. M. Hall of Iva was among the business visitors to Anderson yesterday.

A. W. Pickens, of Pendleton, Founte, was in the city yesterday for a few hours.

Mr. and Mrs. L. O. Robinson of Level Land were shopping in Anderson yesterday.

Mrs. R. A. Lewis, of Belton, spent a few hours in Anderson yesterday with friends.

L. P. Sullivan of the Fork section was among the Anderson farmers to spend yesterday in the city.

J. N. Gambrell of the Hopewell section was in Anderson yesterday for a few hours.

Starr Whitlock, a Pendleton constable, was the city yesterday on official business.

W. D. Bewley was among the business visitors from Anderson in Belton Friday.

D. A. Bottom of Greenville, spent yesterday in the city, a guest at the Chiquola hotel.

W. R. Taber, the well known Southern passenger agent of Greenville, was among the visitors in Anderson yesterday.

W. E. Pinson, who once made his home in Anderson but is now a merchant of Central, was in the city yesterday.

A shopping party from Pendleton, consisting of Mrs. J. J. Siton, Miss Lizzie McPhail and Mrs. E. G. Siton spent yesterday in the city.

R. H. McFadden of Blacksburg spent yesterday in the city. "Mac" is becoming more and more adept in the art of prevaricating every day.

J. B. Felton has returned from Columbia where he attended the meeting of the superintendents of education of South Carolina. Mr. Felton says the meeting was interesting and very instructive.

Miss Mary Darby of Polzer and Miss Claudia Etzezeale of Anderson R. F. D. are the guests of Miss Lottie McCoy on Brock street.

Lacy Moore of the Southern Railroad, was among the guests at the Chiquola last night.

Mr. and Mrs. Lee Owens of Pen-

Condensed statement of the financial condition of the BANK OF ANDERSON, Anderson, S. C., at the close of business January 13, 1914 as shown by the regular report made to the State Bank Examiner.
