SIDE - DRESS YOUR CROPS.

This cotton that is just now coming up should be side dressed as quick as it can be thinned out. If you side dress it with our 9-6 (nine per cent ammoniac and six per cent potash) it will outgrow and make more than cotton that has been up a month and not side dressed. Where your cotton is up our 4-7-2 or our 4-10-2 is what it needs. The outlook for a big cotton crop is not good now and where you have a fair chance at a good crop you want to help it on as much as possible, and make every lock of cotton you can, as it looks now as if cotton would bring a good price this fall.

Fertilizer

Used in side-dressing pays better than any fertilizer you use. You've gotten rid of the grass so that will take none of it; you have thinned out your crop so that the crop that is left gets all the fertilizer you use; and then your crop gets the full benefit of it just when it is fruiting, when the strain is greatest.

Give your cotton plenty of plant food and it will not shed. It can stand drought better, insects and pests and diseases better, because it is better fed and stronger.

It is estimated that for every dollar you pay out for side-dressing, you get back from three to four dollars. That is the interest for a four months investment. It brings your cotton in earlier and early cotton weights better than late cotton, and then 1300 pounds of seed cotton that has been side-dressed makes an heavy bale of cotton as 1500 pounds that has not been side-dressed. There is more fat on the seed. It pays to side-dress. There is no mistake about it. It should be applied early. You want the best, of course. Get the best, and forget the rest.

Suffragettes to ask Congress to Work For Equal Suffrage.

Washington, June 18.—Officers of the National Woman's Suffrage Association on June 27 will beset Congress with resolutions urging the enactment of legislation providing for equal suffrage. Vice President Marshall and Speaker Clark together with Congressional committees have arranged to receive the suffragists.

The resolutions which will be presented differ from others that have been taken to the capital in that they call upon Congress to do that which most feasible toward equal suffrage instead of urging any particular pending measure.

The delegation will include Dr. Anna Howard Shaw, Miss Jane Adams and Mrs. Desha Breckinridge, the president and vice presidents, respectively, of the national association and members of its congressional and executive committees.

NO REPORT MADE

The Action Subcommittee in Judge Speer Case Suspended.

Washington, June 18.—Absence from Washington of several members of the house judiciary committee today further delayed presentation of recommendations of the sub-committee which investigated charges against Emory Speer, United States judge for the Southern district of Georgia. Chairman Webb is anxious that all members of the committee be present when the sub-committee's report is taken up and recommendations to the house are framed. He expects to be able to get the full committee together within a day or two. It is understood the sub-committee will report that the evidence does not warrant impeachment.

WANT INJUNCTION

St. Louis, June 18.—An injunction to restrain Armado Marsans from playing with the St. Louis Federals was asked of the Federal district court here today by the Cincinnati National League Club. The application was set for a hearing on next Monday.

When the ten days' notice expired, he signed with the St. Louis Federals and with this team he has been playing since Saturday. Marsans played with the Federals today.

Calling for Names.

Washington, June 18.—The reserve bank organization committee today notified members in the Federal reserve system that nominations for the Class A and Class B directors must be received not later than June 22, in order to appear on the ballots to be sent to the district reserve collectors. Wood Restored.
Woodwork which has grown dull with time and the accumulation of dust may be restored by first cleaning thoroughly with kerosene and a flannel cloth, says the Washington Herald. It should then be polished with a mixture of two parts of turpentine to one of linseed oil. Apply this with a soft cloth and rub with flannel until every trace of the liquid remains to have disappeared. Repeat the applications and continued rubbing will give a rich gloss to wood, trim or mahogany furniture.

Shrewd Elopement Trick.
The newest elopement trick was recently worked in Switzerland, where the parents of the couple went on a trip to the top of a mountain. While they were there the couple eloped and were away on an express before the parents could get down the mountain on the railway.
