

LEGAL NOTICES

NOTICE OF COUNTY TREASURER

The books of the County Treasurer will be opened for the collection of State, County and School taxes for the Fiscal Year 1914, and Commutation Road tax for the year 1915 at the County Treasurer's office from October 15th to December 31st, 1914.

All persons owning property in more than one township or school district, are requested to call for receipts in EACH TOWNSHIP OR SCHOOL DISTRICT, in which the property is located.

The rate of levy is as follows: State Taxes6 Mills Constitutional School Tax . . . 3 Mills Ordinary County Purposes 3 1-2 Mills Past Indebtedness1 Mill Roads and Bridges1 Mill Public Roads1 Mill

Total 15 1-2 Mills The following are the additional levies for Special School Districts:

Table with columns: Dist., No., Special Levy Mills, Total Levy Mills. Lists various districts like Anderson, Alby Springs, Barker Creek, etc., with their respective levies.

male persons between the ages of 21 and 60 years, except those incapable of earning a support from being maimed or other causes, and those who served in the War between the States, to pay a poll tax of one dollar.

Prompt attention will be given all persons who wish to pay their taxes through the mail, by check, money order, etc.

W. A. TRIPP, County Treasurer.

Delinquent Road Tax Notice. All delinquent road tax collectors are provided with an official receipt book with numbers, and stub numbers attached.

NOTICE TO CREDITORS. All persons having claims against the estate of Foster V. Tribble, deceased, are hereby notified to present them properly proven to the undersigned within the time prescribed by law, and those indebted to make settlement.

J. W. TRIBBLE, Adm'r.

PENDLETON, Nov. 3.—The first killing frost of the season visited this section Wednesday morning. Almost all vegetation is killed, and the late cotton is greatly damaged.

Miss Hlose Sloan from Clemson college was shopping in town last Thursday. Mr. John Burns, who was married to Miss Stella Caughman of Lykesland, S. C., October 28, has returned to Pendleton with his bride where they will make their future home.

WASHINGTON LETTER

WASHINGTON, Nov. 2.—No doubt the people of the "Electric City" will be interested in the following report as to the use of American electrical accessories in Spain, written by Claude I. Dawson, formerly of Anderson, now United States consul of Valencia.

"Certain classes of electric-wiring devices and supplies will soon be in demand in this city. Germany has heretofore monopolized the business through very low prices.

The consulate believes that permanent results can be obtained only by following the accepted method of personal representation; prepare to take orders by sample, quote net prices delivered in Valencia, and compel local dealers to seek supplies in the American market.

Electric-supply manufacturers could participate in a joint agency and sample room for the sale of diverse American industrial products. This has been suggested by this office from time to time as a practical method of increasing sales of articles which are not manufactured in sufficiently large quantities to warrant the expense of special propaganda by a single manufacturer.

The weak of prayer is being observed by members of the Methodist church. The Ladies Aid society of the Methodist church met with Miss Orpha Haste, Monday afternoon.

DAIRY and CREAMERY

DAIRY COW RECORDS.

Records of the performances of dairy cows form the only accurate and safe basis for judging their value. It is the constant aim of progressive dairymen to improve their herds, and such improvement must depend largely upon culling the herd and getting rid of the unprofitable animals.

Early Selection From the Hill Has Important Advantages. Hill selection of seed is urged by every institution interested in the improvement of corn.

Portable Stock Chute. Every farmer has occasion to load some animals into a wagon, and many do this by building a stock chute. Usually these chutes are built as permanent fixtures in connection with feed racks, but are often made so they can be taken from one part of the farm to another.

The scales and the Babcock test are essential requisites for every true dairyman. One dairymen's cows may produce twice the yield and return double the profit of those of another with the same market, simply because he used greater intelligence in his business.

CONCERNING WHEAT.

Wheat is not a uniformly profitable crop. At least it does not compare favorably with the other leading crops—corn, hay, cotton and alfalfa—if we take the cost investigations of the United States department of agriculture at their face value.

There is little question that at least half the total wheat crop of the country is produced with a very narrow margin of profit, and winter wheat may be regarded as a by-product of the farm rotation which in itself is not profitable, at least on most central and eastern farms.

Every farmer has occasion to load some animals into a wagon, and many do this by building a stock chute. Usually these chutes are built as permanent fixtures in connection with feed racks, but are often made so they can be taken from one part of the farm to another.

Beekkeeping is fast becoming the business of the specialists, and the number of men who devote their entire attention to the business is rapidly increasing. However, there is no reason why the average farmer cannot keep a few colonies of bees to supply honey for home consumption, with perhaps some surplus for sale in good years.

MY CATARRH BALM OPENS UP NOSE AND HEAD—COLDS GO

Breathe Freely! Clears Stuffed-up, Inflamed Nose and Head and Stops Catarrhal Discharge. Cures Sufferers Headache. Try "Ely's Cream Balm."

MRS. W. A. HUDGENS, Editor Phone 37.

The Robert E. Lee Chapter will meet Friday afternoon at 3:45 with the following ladies as hostesses: Mrs. D. S. Vandiver, Mrs. Walter Brock, Miss Margaret Evans, at the home of Mr. George W. Evans on West Whitner street.

Mrs. H. A. Williams of Columbia and Mrs. R. E. Watkins of Pendleton are here for the Anderson-Fruit wedding today. They are guests at the home of Mr. James R. Anderson.

Miss White returned to her home in Augusta yesterday after a visit to Mrs. Stonewall Watson, at her home just north of town.

Mr. and Mrs. Ralph Munnerlyn Durr announce the engagement of their daughter, Sara Katherine, to Mr. Walter E. Redden, the wedding to be December 9th, at the home of the bride at Quincy, Fla.

The Baptist Philanthra class are busy preparing for a doll sale to be given the last of this month, and are engaged in dressing numerous dolls for Christmas. The sale is awaited with interest.

grant balm dissolves by the heat of the nostrils; penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the air passages; stops nasty discharges and a feeling of cleansing, soothing relief comes immediately.

The prayer meeting of the Missionary Society of St. John Methodist church will be held this afternoon at four o'clock with Mrs. Ban Allen, on Greenville street.

Bleish Will Be Here Next Monday and Tuesday—Opera House Equipment Will Be Bought.

A telegram was received in Anderson yesterday morning from C. H. Bleich of Hopkinsville, Ky., in which Mr. Bleich promised that he would come to Anderson next Monday.

On Tuesday, November 11, a meeting of the board of directors of the Anderson Development company will take place and at this meeting Mr. Bleich and the directors will select the opera chairs and the scenery for the new theatre.

HONOLULU, T. H., Nov. 3.—Two Japanese aviators, making exhibition flights here, were stopped by the police today.

The German warship Geler still is in the harbor under repair and the Japanese battleship Hizen and the cruiser Anama are in the cove. It is thought the possibility of sending or receiving signals might have caused the action.

Brown Swiss cattle in their native land are of light or dark brown color, a mouse brown being popular. They are large, heavy headed, thick neck and heavy of bone.

Accordingly and often feed more economically. Again, a daily milk record enables a dairymen to detect the approach of sickness in a cow and thus to take steps to ward it off.

The record of the herd is a matter of the utmost importance. The highest degree of success cannot be attained unless dairymen know the productive capacity of each individual cow.

The scales and the Babcock test are essential requisites for every true dairyman. One dairymen's cows may produce twice the yield and return double the profit of those of another with the same market, simply because he used greater intelligence in his business.

The time and expense required in keeping records are small compared with their value. In some instances one minute to a cow at each milking, or two minutes a day, has been found sufficient to record the weight of the milk and take the sample.

The cost of silage. A field of corn that will yield from fifty to sixty bushels to the acre will make anywhere from eight to ten tons of silage per acre as it comes from the silo.

Accurate and continuous records are necessary for best results. Examples show the impracticability of trying to determine the profitable cows by mere guesswork.

Laughing Aids Digestion. Laughing is a most healthful operation; it is one of the greatest helps to digestion with which I am acquainted, and the custom prevalent among our forefathers, of eating it as table by means and buffoons was founded on true medical principles.

RIMED QUOTATIONS. Think not ambition wise because 'tis grave. —St. William Davenant. The paths of glory lead but to the grave. —Gray.

What is ambition? 'Tis a glorious cheat. —Wills. Only destructive to the brave and great. —Addison. What is all the gaudy glitter of a crown? —Dryden. The way to bliss lies not on beds of down. —Francis Quarles.
