URIC ACID IN MEAT CLOGS THE KIDNEYS

Take a glass of Sarsaparilla if your back aches or bladder bothers.

If you must have your meat every day, eat it, but flush your kidneys with Sarsaparilla occasionally, says a noted authority who tells us that meat forms uric acid which clogs the kidneys in their efforts to expel it from the blood. They become sluggish and weaker, then you suffer with a dull aching in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated and when the weather is hot you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, causing you to seek relief. It is a sure sign that the kidneys are clogged. To neutralize these irritating acids to cleanse the kidneys and flush out the body's uric acids, write for a free ounce of Dr. Williams' Pink Pills from your druggist; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act normally. This famous Sarsaparilla is made from the acid of grapes and lemon juice, combined with other ingredients and stimulates sluggish kidneys, also neutralizes the acids in urine so it no longer irritates, thus causing the weakness. It is a sure sign that the kidneys are clogged.
