Robert Hammonds of the Williamson section was in the city yesterday.

Roy Burris of the county was in the city yesterday.

W. M. Burris of the Mountain Creek section was in the city yesterday.

FOLEY KIDNEY PILLS

INSPECTS SITES FOR THE GRAIN ELEVATOR

NORTH DAKOTA MAN FIRM IN BELIEF THAT ONE WILL PAY HERE

GOES TO COLUMBIA

Mr. Richards Will Spend Some Time in This Section Before Returning Home.

Edward H. Richards of Willow City, N. D., who is spending some time in Anderson in conference with local business men with reference to the advisability of erecting a grain elevator here, leaves this afternoon for Columbia, where he will spend a short while on business and in sightseeing. He will return to Anderson the latter part of the week for the purpose of closing up a few details with reference to the elevator matter, after which he will leave for his home and begin preparations for moving to Anderson.

Yesterday Mr. Richards, in company with various business men, inspected a number of available sites about the city for the elevator. He also secured a large amount of data with reference to the cost of electric power, freight rates on grain, the cost of labor, etc., all of which will be of value to him in perfecting his plans for the elevator.

Mr. Richards is extremely well pleased with what he has seen of Anderson. Before he takes his departure from here he intends making several trips into the country for the purpose of meeting farmers and conferring with them in regard to the grain situation. From data which he has in hand, he is satisfied that grain elevators in Anderson would prove a paying proposition, that is, if the farmers continue to plant the amount of grain which they are said to have in the ground at present.

Within the next few days steps will be taken toward securing papers of incorporation for the proposed grain elevator company, after which a formal contract will be drawn up and signed with him and after which steps will be taken looking toward the securing of the balance of the subscriptions needed to capitalize the grain elevator.

Mr. Richards states that he will bring his family here within something like six or seven weeks after he gets back to his home city, which is on the Great Northern railroad and within 50 miles of the Canadian border.

Petition

First Petition For Street Paving Comes From Theatre Company.

The first petition for street paving, under the proposed law for the assessing of abutting property owners to pay for permanent street improvements, was filed at the city hall yesterday by the Anderson Development Company, owners of the new theatre building.

The petition reads as follows: "I beg to inform you that this company is ready to pay its proportionate part for paving on Peoples street and hereby makes formal application for paving on such street. We have conferred with the other property owners on said street in our vicinity and they will also make the same proposition. We are very anxious to have this paving done as soon as possible, and if necessary will be glad to make a deal to have the same done at once and make a settlement for the same later after the voting of bonds, putting up the cost on same ourselves temporarily."

"Yours truly,
"ANDERSON DEVELOPMENT CO.,
By Porter Whaley, Sec."

THIS IS A BAD MONTH.

The indoor life of winter, with lack of outdoor exercise, puts a heavy load on kidneys. Nearly everybody suffers from rheumatism, backache, pain in sides and back, kidney and bladder ailments. A backache may not mean anything serious, but it certainly does not mean anything good. It's better to be on the safe side and take Foley Kidney Pills to strengthen and invigorate the kidneys and help them do their work. They help rid the blood of acids and poisons. Sold by Evans Pharmacy.

MAKE HOTBEDS NOW FOR PLANTING TOMATO SEED

TIMELY SUGGESTIONS FROM MISS GARLINGTON, THE LOCAL AGENT

THE DIRECTIONS

Tomato Clubs Will Be Organized Throughout Anderson County Immediately.

Girls in Anderson County contemplating joining the tomato clubs are advised that now is the time to make hot beds for the planting of tomato seeds. Tomato clubs are to be organized throughout Anderson County beginning this week, by Miss J. Conway Garlington, who has come to Anderson County to take up the duties of tomato and canning club demonstrator.

How to Make Hot Bed.

The hot bed may be made, as follows: Select a well drained location, where the bed will be sheltered, preferably on the south side of a building or fence. Make an excavation 18 inches deep the size your bed is to be. Throw in fresh horse manure and pack by tramping. The manure heap should be about even with the surface of the ground or 18 inches deep. The manure furnishes the heat to start the plants. Put on top the manure four or five inches of a good garden loam, which has cover the bed with glass plants and cover the bed with glass hot bed sash. If sash can't be secured, canvas may be substituted for the glass. The temperature will run high for a few days, but no seeds should be planted until the temperature falls to about 80 degrees F. which will require three or four days.

A bed made about five feet nine inches wide and about six feet long will be plenty large enough to grow plants for a tenth acre garden. This size bed will take two hot bed sashes which measure three feet by six feet. The frame to support the sash should be about 15 to 18 inches high at the back and six inches lower in front in order to drain off the water. The slope should be toward the south.

During bright days the bed will heat very quickly and it will be necessary to ventilate by raising the sash on the opposite side from the wind. Toward evening close the sash in order to get the bed warm before night. Water the bed in the morning on bright days as watering in the evening or cloudy days will have a tendency to injure the plants and increase the danger of freezing and damping off. Ventilate the bed after watering in order to dry off the plants.

If it is impossible to make a hot bed the plants can be started in shallow boxes in the house. Get shallow boxes from a store, and fill with good, rich soil and sow the seed as described for the hot bed. Bore two or three holes in the bottom of the box for drainage. Keep the box as near a window as possible and at living room temperature. Close attention should be given to watering as the air of a living room is usually dry and will soon dry out the soil. The plants must be developed in the light or they will be weak and spindling. They should be transplanted to other boxes or to a cold frame, which is made in the same way as the hot bed except that the manure is left out and canvas may be substituted for the glass sash.

Miss Garlington addresses the following statement to the women and girls of Anderson County:

As it will be impossible for me to visit all the schools containing older girls by the last of January I am giving directions for making a hot bed.

If you want to join the club make your hot bed and plant Stone tomato seed, making the rows four inches apart and plant the seed four inches apart in the rows.

Plant the Stone tomato seed. Try to get ten girls at your school to join. I have one rural association already promised to join.

Write me at once if you wish to join as the seed should be in the ground. I am in Anderson County to help you, so call on me.

Chamberlain's Cough Remedy—The Mother's Panacea.

"I give Chamberlain's Cough Remedy to my children when they have colds or coughs," writes Mrs. Verne Shager, Vandergrift, Pa. "It always helps them and is far superior to any other cough medicine I have used. I advise anyone in need of such a medicine to give it a trial." For sale by all dealers.

When You think of GOOD Clothes Think of Parker & Bolt

\$233.17 IN CASH FOR RELIEF IN ANDERSON

RELIEF ASSOCIATION HAS ALSO RECEIVED OTHER CONTRIBUTIONS

MORE NEEDED

Old Clothes and Food Supplies Have Been Contributed—All Can Be Used.

Old clothes, food supplies and cash to the amount of \$233.17 have been contributed to the relief fund of the Anderson Relief Association, according to a statement given out yesterday by G. H. Geiger of this organization.

The cash contribution column took a long stride forward when city council made an appropriation of \$100 toward the work of relieving suffering among destitute families of the city.

Following were the new contributions received yesterday by the association:

Frank Burris, food supplies; Joseph Lundkovsky, food supplies; Carl Ebernick, food supplies; Miss Genevieve Simpson, \$2.00; Mrs. E. C. McCants, \$1.00; St. John's Methodist church, \$19.00; A. R. P. church, \$11.00; check, \$5.00; city council, \$100.00.

Rev. J. M. Garrison, the pastor of the A. R. P. church, stated that the collection amounted to \$17.80, but that the church had used \$6.72 of this amount for charity.

Contributions Good. Officers of the Relief association are gratified over the manner in which the public has come forward with contributions to this worthy cause. A considerable quantity of food supplies has been contributed and a large amount of old clothing has been sent in to headquarters for the use of the association in clothing these applicants for help who are without sufficient clothing to protect them.

While the contributions have been generous, the association can use yet almost any amount of food supplies, old clothing and money.

FOR A BAD COLD

The surest way to stop a cold is to liven the liver and cleanse the bowels, and the nicest cathartic to do this is a 10-cent box of Cascarets. Take one or two Cascarets tonight and your cold may be gone by morning.

AGENTS MEET AT CLEMSON

Semi-Annual Gathering of Demonstration Men This Month.

CLEMSON COLLEGE, Jan. 16.—The semi-annual meeting of the farm demonstration agents for South Carolina will be held at Clemson College the last week in January, the sessions beginning Tuesday, January 26, and continuing through the remainder of the month. This meeting will be of more than usual importance because of the nature of the problems to be studied.

Part of the time will be devoted to discussions of policies to be carried out by the county agents during 1915. This of itself, in view of what has been spoken of as the agricultural "situation" confronting the state, would lend special importance to the meeting. But in addition there will be discussed certain new lines of work of great magnitude which the agents will be entering this year for the first time.

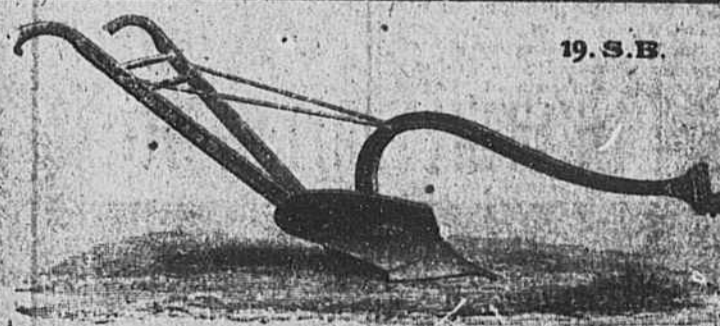

The morning and afternoon sessions will be given over to papers and discussions by the agents themselves. In the evenings there will be addresses by men of prominence. As yet the program has not been definitely compiled.
