SITUATION LARGELY OUTGROWTH OF COUNTRY'S HEAVY EXTRA EXPORTS TO EUROPE

NEW YORK, Feb. 16 .- Demoralization in foreign exchange markets has affected the big financial interests to such an extent that a meeting of in-ternational bankers may be called soon to readjust conditions, financial experts said today.

Sight drafts on London sold down to 4.79 a pound sterling today, the lowest in a generation, but recovered before the end of the market session. The drop in exchange was followed by ent of another small importation of gold—\$2,500,00—that amount having been released by the Bank of England from the large sum now to its credit in Ottawa. erally steady and closed steady at a net advance of from 3 to 9 points.

Liverpool cables were better than due on the New York close of last night, but evidently created very little buying power, and after opening at an advance of 4 to 6 points, prices here eased off under scattering liquidation. Continued nervousness over the shipping situation, and predictions of heavier apot offerings with the advance of the season for new crop preparations appeared to be the factors must talked of on the setback.

Offerings were not heavy and were well enough absorbed on a decline of 2 to 3 points from last night's closing figures, to turn the market stead-ier. Last prices were within a point

or two of the hest.

Another aspect of the financial situation was the heavy trading in bonds for future delivery. Brokers were almost unanimous in the belief that this denoted further European liquidation of American securities, mainly for German account.

Member of London Scottish Regiment Describes Clean-up Day in Army

(By Associated Press.) LONDON, Feb. 16.—A description of ne soldier's monthly "official bath" the soldier's monthly "official bath" is sent from the front by a member

of a London Scottish regiment; "Yesterday we had a noval exper-ience," he says. "As none of us had seen roap or warm water for over five weeks we were ordered to take an official bath. We were taken to a town in the rear of our lines and escorted to a large building, where facilities had been arranged for the purpose. In the first room we were numbered off into squads of ten men or so. In a second room we emptied our pockets and laid aside our boots, bonnets, putteer and sporrans. In a third room we threw the rest of our clothes into a heap, and then made a double-quick to the showers. There were two men to each shower, and we were allowed ten minutes under the hot water with a generous supply of laundry scap.
"At the end of our ten miutes, we

hurried on to a drying room, where each man got a huge towel as thick and rough as a carpet. Then we rushed off to a dressing room, where ar

ed off to a dressing room, where an attendant gave us anything we wanted in the way of brand new underwear, shirts, and socks, while on hooks at one side were our clothes, which had been thoroughly fumigated. "After we had got back our bonnets, boots and other property, we were ushered into a room where a squad of barbers awaited us. When they were through, we marched, spic they were through, we marched, spic and rpan again, into a tea room for tea and cigarettes. (Could anything be better arranged?"

Another event which was muchly before the eyes of our people this week was the informal social given by the West Pelzer high school girls in the school auditorium Wednesday evening, 7:30 to 11 o'clock. A number of visitors were present, and there were games in which both the young and old joined and mingled their happy laughter. The old blue back speller carried the older ones back to the old log school house that stands upon the hill. Some others of the bygone school days, who partook of this childhood pleasure were: Mr. and Mrs. I. M. Clarrett and Mrs. I. Ledges. We wish to say to all friends of peace that the dreadful war now raging affords no just cause for discouragement, no discredit to past ef-forts, and no reason to doubt that still greater efforts in the future may be effective and useful.

The war itself is teaching the gos-per of peace through a lesson so sheeking and so terrible that the most indifferent can not fail to atpusic teacher, as well as to the school children who have been so an-

Not only have the destruction of life, the devastation and the sufficient ing in the warring countries pail in all experience, but the cessation of production, the closing of markets, the blocking of trade routes, the interruction of exchanges, have affected industry and caused ruin and poverty in all the peaceful countries of the world.

The universal interdependence of nations has been demonstrated and the truth forced upon every mind that the peace of all nations is the vital concern of every nation.

To cast our weak protest now among the tremendous forces that are urging on the great conference.

That question the beligerent nations only will have the power to answer; but every one in the world will be entitled to be heard upon at, for it will be a question of civilization, the most momentous of our era. It seems incredible that after this the stricken people will set their feet in the same old paths of policy and suspiction which must lead them again to the same result.

Finding expression through a great multitude of voices everywhere the general putile optonion of mankind should influence the minds of the negotiators who settle the terms of peace and inspire them to a new departure in the establishment of justice as the rule of international relations tice as the rule of international re-

Quite a number our people are en-

parture in the establishment of justice as the rule of international relations.

While we must not be overconfident of our individual qualifications to point out the détailed methods through which the result may be accomplished, we may still advocate measures which seem, practicable and appropriate to the purpose.

We can see that definite rules of national conduct should be agreed upon; that a court of competent jurisdiction should be established to judge of national conformity to those rules; and that new sanctions should be provided to couple respect for the judgments rendered.

Above all the motive and spirit or the new institutions should be clearly and fully, no; the promotion of ambition or the extension of power, but the safeguarding of human rights and the perfection of individual liberty.

Toward this high end the courage and hope and conviction of the humblest citizen of the most distant hand may contribute.
