Burglary Insurance That Insures

Burglars fear detection, consequently they do most of their work in the dark. It is a matter of record that well lighted towns, streets, and well lighted stores and dwellings are burglarized but seldom. Why is it that Bank and Jewelers usually leave a light burning in their places of business every night?

Burglars are Desperate

Would it not be wise and prudent to have a light placed on your back porchwith the switch in your bed room, or some other convenient place?

The cost is very trivial. Phone No. 223 and let us tell you how little it will cost.

Your Home Mortgaged?

Many are the homes that have been saved by life insurance. Very often the proceeds of a life insurance policy are used to pay off a mortgage, thus leaving a clear home. When a man places a mortgage on his property he needs life insurance. A mortgaged home should never go unprotected. Life insurance is as essential as is fire insurance. A mortgage is an intolerable foad for a family to carry with the chief money-earner gone. When a home is mortgaged a life insurance policy for the amount of the mortgage should be immediately secured by the head of the family. A life insurance policy admirably supplements a building and loan account; for, if death does occur, the amount sought in time to be accumulated by means of the building and loan association is immediately available.

When all else is made uncertain by death

A Mutual Benefit Policy

comes to the rescue.

Peace of Mind

The sense of security which a life insurance policy gives enables a man to do better work, while the habits of thrift which it develops always reflects credit upon him in other directions. Today men generally realize more fully than ever before that life insurance is necessary for all. The poor man should carry life insuarnce, and the rich man should carry life insurance. As the first president of the nation so aptly stated over one hundred years ago:

dictates to every man the necessity of settling his temporar concerns while it is in his power."

There is loday no more certain, more safe, or more wise way in which to settle one's "temporal concerns" than by securing and maintaining an adequate amount of life insurance. What's more, a man must do it now "while it is in his power."

Says this old-time Eczems remedy is applied like cold cream.

Any irritation or breaking out on the face, arms, legs or body when accompanied by itching, or when the skin is dry and feverish, can be readily overcome by applying a little be daulphue, says a noted dermatologist.

He states that bold salphur instantly allays the angry itching and irritation and soothes and heals the Eczema right up leaving the akin clear and amooth. Bold-sulphur has occupied a secure position for many years in the treatment of cutaneous disorders because of its parasite-destroying property. Nothing has ever been found to take its places in treating the irritable and inflammatory skin affections. While not always establishing a permanent care it never fails to subdue the itching irritation and drive the Eczema away and it is often years later before any couption again appears on the skin.

Those troubled should obtain at any drug store an ownee of held-sulphur, which is applied to the affected parts in the same manner as an ordinary cold cream.
