Mrs. Alice Wright of Seneca has returned home after a brief visit in the city.

"The Home Garden In The South"

HALF-ACRE GARDEN SUFFICIENT FOR AVERAGE FAMILY

Office of Information, U. S. Dept. of Agriculture.

WASHINGTON, April 2.—A garden of one-quarter to one-half acre is sufficient for an average family and should produce enough vegetables for use throughout the entire year.

The location of permanent crops, such as asparagus, rhubarb, and small fruits, should be carefully considered. These crops should be placed on one side, so they will not be in the way when the garden is plowed.

When headachy take Cascarets for the bowels. To-night! Clean your bowels and end headaches, colds, sour stomach.

Get a 10-cent box now. You're bilious! You have a throbbing sensation in your head, a bad taste in your mouth...

Carrots, parsnips, beets, salsify, lettuce, radishes, onion sets for bunch onions followed by celery as fall crop.

Early peas followed by fall cabbage. 2nd, planting followed by fall cabbage.

Late peas large varieties 1st, planting followed by fall cabbage. 2nd, planting followed by fall cabbage.

Early potatoes followed by fall beans—cauliflower followed by fall beans.

Collards, kohlrabi followed by fall peas. Early potatoes followed by fall peas 2nd, planting, followed by fall peas 3rd, planting, followed by turnips.

Beans followed by turnips, followed by spinach. Okra followed by spinach. Tomatoes followed by kale.

Tomatoes, eggplant, peppers, followed by kale, mustard etc. Bush lima beans followed by kale, mustard etc.

Cucumbers, muskmelons, summer squash, watermelon, winter squash, early sweet potatoes followed by cowpeas.

Early sweet corn followed by fall potatoes. Late sweet corn followed by fall potatoes, pole lima beans.

To the left of "Asparagus and other perennial crops," may be located the hotbed, cold frame, and seed bed, being 8, 12 and 16 feet long respectively, and 6 feet wide.

The next two rows, which are 3 feet apart, are to be planted with early peas, one row to be planted ten days ahead of the other, and both rows to be followed by an autumn crop of celery.

The next two rows, which are 3 feet apart, are to be devoted to early cabbage, followed by an autumn planting of beans, and one-half of the next row is to be planted to early cabbage, followed by autumn beans.

The other half of that row is to be planted to cauliflower, followed by autumn beans. The next row, which is 2 1/2 feet from the row of cabbage, is to be devoted to collards or kohlrabi, followed by autumn peas.

The next three rows are to be devoted to early potatoes and after the potatoes are removed autumn peas are to be planted in succession, about a week apart.

Next to the early potatoes comes three rows of beans, planted in succession, and followed in the autumn by two rows of turnips and one row of spinach. The next row, which is 4 feet from the beans, is planted in okra, which is to be followed by spinach.

The next row, which is 3 feet from the row of okra, is to be planted to tomatoes, followed by kale, mustard, etc., for winter use. One-half of the next row is to be planted to tomatoes and one-half to eggplants, peppers, followed by mustard, kale, etc., for winter use.

The next row to the tomatoes is to be occupied by bush lima beans, followed in the autumn by kale, mustard and whatever has been planted in the preceding row. The next row is 4 feet from the row of bush lima beans and is to be devoted partly to cucumbers, partly to muskmelons and partly to summer squashes. The next row is 3 feet from the last and is to be devoted partly to watermelons and partly to winter squashes.

The next row is 6 feet from the watermelons and is to be devoted to sweet potatoes, followed by cowpeas. The next row is 5 feet from the last and is also to be devoted to sweet potatoes.

The next two rows are 3 feet apart and 3 feet from the sweet potatoes and are to be devoted to early sweet corn, followed by autumn potatoes. The next two rows are 3 feet from the former and are to be devoted to late sweet corn, followed by autumn potatoes, and the last row in the garden, which is 4 feet from the sweet corn, is to be devoted to pole lima beans.

Important consideration in planting the garden is the kind of cultivation to be given. Horse cultivation is recommended whenever possible, and where the work is to be done mainly by means of horse tools the garden should be long and narrow with the row running the long way. The garden should have no paths across the rows, but turning spaces should be left at the ends. For hand cultivation the rows can be much closer together, and may run across the garden.

When headachy take Cascarets for the bowels. To-night! Clean your bowels and end headaches, colds, sour stomach.

Get a 10-cent box now. You're bilious! You have a throbbing sensation in your head, a bad taste in your mouth...

HONEA PATH SCHOOL

The Sons of Erin. At the mention of a red-headed Irishman, nearly everybody unconsciously begins to smile. They immediately think of some ridiculous joke somebody has got off on Pat or Mike, or on Bridget, the Irish servant girl.

The mental picture which a great many people connect with the Irish is that of a small thatched cottage, with the pig in the parlor. The picture is just about as true to the Irish as the picture which the Irish connect with America is to the American.

An American traveling in Ireland entered a picture house which had advertised an American scene for that evening. The picture shown was a rough, western scene with Indians running wild through the country. The Irish consider such a picture typical of American life.

Doubtless you have all had a great deal of fun at the expense of Pat and Mike, but have you ever stopped to think what the Irish in America have meant to our country? Bob Taylor in his eloquent tribute to "The Sons of Old Ireland" says, "Without our Irish names, the sky of our national glory would lose half its stars."

In the year 1718, seven hundred and fifty Ulster Scots, the people of northern Ireland, came to the New England States. Between 130 and 1750, half a million more came to America. These people were brave and courageous, standing for liberty and freedom, and were willing if necessary, to sacrifice their lives for their principles.

It was this spirit, born in old Ireland, that inspired the Irish heart of Patrick Henry, and led him to make his famous speech on accession from England. Later came the Declaration of American Independence which was drafted by an Ulster Scot, and first printed by a third Ulster Scot.

We are all proud of the memory of our noble statesman, John C. Calhoun and yet if we erase the memory of the Irish, his name must go too. The South would also lose the names of Henry Grady, and Father Ryan.

The Scotch-Irish have given us six of our twenty-eight presidents—Andrew Jackson, James Buchanan, James H. Polk, Chester A. Arthur, William McKinley, and our present president, Woodrow Wilson; and never have we had a president, no matter of what descent, superior to Wilson.

Coming closer home, the first settler of our own town, David Greer, was an Irishman. No one is more loyal to his native land than the Irishman. On Wednesday, March 17th, was St. Patrick's day, the sons of Ireland, no matter where found, could be seen wearing a bit of green. Though perhaps a long, long way from Tipperary and the beloved shamrock, they will show their devotion to their native land by the "wearing of the green."

On account of illness Miss Arnold was unable to teach several days last week. Mrs. M. B. Wright acted as her substitute. Last Tuesday morning eight of the boys of the second grade entertained us in chapel with a blacksmith song. On last Wednesday afternoon quite an interesting game of baseball was played on the local ground between the high school boys and the town team. The score was 10 to 7 in favor of the school boys.

The preliminary contests to select declaimers as representatives of our school for Field Day in Anderson on April the 9th will be held in the school auditorium Thursday, April the first.

The following are the participating contestants: Emma Ruth Moore, Annie Wiles, Lucile Harper, Mary Cannon, Ethel Medlock, Lillian Carter, Olivia Greer, Myrtice Wilson, Howard Reeves, Raymond Abercrombie, Archie Shirley and Herbert Dunlap.

Ninth grade—Lida Coats. Tenth grade—Lucy Finson, Frances Shirley, Olin Tice. Eleventh grade—Jeannette Clatworthy, Mary Sullivan, Marie Gaines.

"Taking Care of the Children." No parents would consciously be careless of the children. Joe A. Rogmarin, Clarkson, Neb., uses Foley's Honey and Tar for his two children for croup, coughs and colds. He says, "We are never without Foley's Honey and Tar in the house." A distressing cough, sleepless nights, and raw, inflamed throat lead to a run-down condition in which the child is not able to resist contagious or infectious diseases. Foley's Honey and Tar is truly healing and prompt in action. Evans Pharmacy.

CALOMEL IS MERCURY! IT SICKENS! ACTS ON LIVER LIKE DYNAMITE. "Dodson's Liver Tone" Starts Your Liver Better Than Calomel and Doesn't Salfate or Make You Sick. Listen to me! Take no more sickening, salivating calomel, nor blinding, constipating. Don't lose a day's work! Calomel is mercury or quackery which causes necrosis of the bones, Calomel, when it comes into contact with your bile crystals into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated, or you have headaches, dizziness, coated tongue, if breath is bad or stomach sour just take a spoonful of harmless Dodson's Liver Tone on my guarantee.
