The prophet Nathan said to David, when he was being chided for having Uriah killed at the battle front, and the guilt for taking the life of the "lone lamb" was to be fastened: "Thou art the man!" So must the nodern minister who really amounts to a force in a community for right living stand before those who do wrong, and fearlessly say: "Thou are the man." No man has ever been saved from his sin and convicted of it by the namby-pamby preaching of those who think their full duty is performed when they propound a creed hoary with age and not at all suited to modern conditions, and which is not understood by the average layman, and which he does not care about even if he understands it. Now The Intelligencer fears that The man who wins is the man who this remark will be the subject of criticism, but it is the truth, and the modern Samsons in theology do not indulge in such. For instance Billy Sunday and his powerful preaching, or any of the other giants who are redeeming the world today, never take up their time nor that of their audiences by discussing ancient and thumb worn creeds and doctrines. Modern Christianity applied to modern life is what the average man (sinner) needs. Is this the kind of spiritual food they are receiving? You who sit in the pews know. Has the church lost its power? Is it saving men today? Are in reclaimed from their ways of sin by the average preacher today? Let ie pulpit and the pew think of these

The plan seems to be a good one and doubtless will result in a great gain in the population of North Dakota. But the plan need not be confined to that State alone. Any prosperous rural community can benefit itself if its energetic men and women will help to spread the gospel of country life. Almost every one of our readers can think of some friend or relative now struggling along in some town or city who, if transplanted to modest farm, would be healthier happier and more prosperous than they are at present. Let our readers try the North Dakota plan. Write to your friends, tell them what you are doing and what you mean to do, point out to them that farming today is not what it was 40, 30 or even ten years newspapers and let your old friends and neighbors know how well you are and you will be helping the commun
