"THE COUNTRY BOY"

At the Paramount Friday, April 23. Synopsis:

in its legitimate form, one of the most popular comedies ever produced in America. If ran for more than a year in New York City and there were more than ten companies on tour, all

playing to capacity audiences.

The title role of "The Country Boy" is played by Marshal Neilan, and the two leading feminine roles are played by Florence Dagmar and Dorothy Green. The play concerns the ed by Florence Dagmar and Dorothy Green. The plot concerns the ex-periences of a young man who leaves his home in the country to make his fortune in the metropolis, but who is too weak to resist the temptations of his new environment. In the end he comes to a full appreciation of the virtues of the country girl and her sincere love, and, returning to the country, regains his self respect.

### Drugs Excite Your Kidneys, Use Salts

If your Back hurts or Bladder bothers, drink lots of

water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the

which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the bleod. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act finfic. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation thus ending bladder weakness.

Jad Salts is inexpensive; cannot iniure; makes a delightful effervescent lithia water drink which everyone should take now and then to keep their kidneys cleen and active. Try this, also keep up the water drinking, and no doubt you will wonder what become of your kidney trouble and

# Squach, Tomatoes and Turnips

and salt.

Varieties recommended: The varieties of summer squash commonly grown in the South are Pattypan, Summer Crookneck, and Vegetable Marrow. Of the winter squashes, the Delicious and Hubbard are among the best.

Dist.

Varieties recommended. Purple Top (Globe, White Globe, Seven Top, White Milan, and Yellow Aberdeen.

Rutabagas: Large quantities of rutabagas are shipped from the northern States and Canada into the southern States each year. While this crop is

To get a crop of early tomatoes the seed should be started about eight weeks before time for setting the plants in the field. In the lower South the plants can be grown in cold frames covered with canvas or cotton cloth, but in the upper South a hotbed should be employed. When only a few plants are needed the seed may be sown in a shallow box in the house. For the best results in growing tomatoes the young plants should be transplated as soon as they reach a height of one and one-half to two inches. Transplant these plants to stand two inches apart each way in a hotbed, cold frame, or box in the house. When the plants begin to crowd it is a good plan to transplant them to flower pots, plant bands, old strawberry hoves or its commonly cultivated in the South, it may be grown as a fall and winter crop to very good advantage.

Rutabagas are planted the same as turnips, except that they require more room and a longer period of growth.

The Purple Top is the most common variety of rutabaga.

The United States department of agriculture's Farmers' Bulletin (647) childred, "The Home Garden in the South" will be sent free to all applicants who address the department at Washington D. C.

strawberry boxes, or tin cans from which the bottoms and tops have been melted."

Tomice plants should be set in the open as soon as danger of frost has passed. If the plants are to be pranted to one or two stems and tied to stakes, they should be set 18 inches apart in rows three feet apart. If the plants are not pruned or staked, they may be planted three feet apart in rows four feet apart. It is advisable, however, to prune and train to stakes, especially for the early crop. As plants so treated will beh ealihier and more easily crultvated and will produce fruit which is earlier and more uniform in size and shape than that produced by plants which have not been trained and prunea. Soon after setting the plants in the field as stake should be driven near each plant, to which it may be tied. Care should be exercised to the the plants so that if will not be injured by the string. A good plan is to loop the string. A good plan is to loop the string around the stake and the under a leaf stem, Go over the patch once every week or ten days and rome a leaf stem, Go over the patch once every week or ten days and rome aliance. Varieties recommended: For early tomathes, Earlisha or Chalk's Early tomathes, Earlisha or Chalk's Early

WASHINGTOS. April 19.—There are two types of squashes, the bush varieties should be planted in hills four fet apart each way and the running varieties eight to 10 feet apart each way. Equashes are prolific, and a supply for the average family will ordinarily be furnished by five or six hills of each sort. Squash seed should not be planted until after danger of frost is over and the soil is quite warm. The cultivation and care of squashes should be the same as that given cucumbers or muskmelons.

The summer squash is prepared for the table in saveral ways. It may be boiled and caten with butter, pepper and salt, or it may be parboiled and then friend. It may also be sliced and bread crumbs or cracker crumbs, stewed or steamed, to be served with a little salt, and then fried in egg and bread crumbs or cracker crumbs, stewed or steamed, to be served with a little salt, or are prepared in the same way for pie filling. They may also be baken and served in the same way for pie filling. They may also be baken and served in the shell or the flesh may be scraped out after beking and served with butter and salt.

Varieties recommended: The va-

The last association meeting was held here some time agc. Miss Garlington was present and talked on the food values of such things as eggs, butter, milk and vegetables. She also told about the fireless cooker. She has promised to come again and tell how to prepare school lunches so that they may contrin the proper food value. She will also bring her fireless cooker when she comes again.

The association is going to have a box party at Mrs. Bill McCuen's Monday night There will be many interesting amusements and every—
