President Taft received 561 of steal." the 1078 votes in the convention or 21 more than a majority.

The decision of the Roosevelt people, under direction of their eader, to refrain from voting, left no other candidate near the resident. The announcement of the Taft victory was greeted with cheering from his adherents and groans and hisses from the opposition.

When it became absolutely certain early today that Mr. Taft would be nominated without great difficulty, the leaders in control of the convention deided to give him as running mate his companion on the when organized, to select anothticket in 1908.

All others dropped from the race and Mr. Sherman was the only candidate regularly placed before the convention. A motion from New Hampshire to make the nomination by acclamation was declared out of order. There were many scattering votes on the roll call that

The convention, amid much onfusion, adjourned sine die. At no time was there an indication of a walkout of Roosevelt delegates. They expressed heir revolt by silence.

In the confusion just before adjournment a resolution was adopted giving the national committee power to declare vacant the seat of any man on the committee refusing to support the nominees of the regular convention of 1912.

Sherman's vote was 597.

The revolt of many of Roose velt's delegates in the convention was open from the moment the permanent roll containing the names of the contested delegates was approved. A "valedictory" statement was read in behalf of Col. Roosevelt asking that his delegates sit in mute protest against all further pro-

A great majority of the Roose velt delegates in the Illinois and all in the Missouri and Idaho delegates declined to follow this dvice but Col. Roosevelt's way over the delegations from California, Kansas, Maine, Minnesota Nebraska, New Jersey Pennsylvania, South Dakota and West Virginia was all but absolute.

Most of the delegates from these States announced their purpose of helping to give Mr. Rooseyelt an independent nomination at another hall later in the evening. The split in the convention occasioned no surprise. It was but a fullfilment of predictions that had been made during the past several

The closing scenes of the convention were marked by counter demonstrations for Taft and

Roosevelt. The first test vote after the announce of the Rocsevelt valedictory came on the adoption of the party platform. The affirmative vote was 666. Roosevelt delegates present and not voting numbered 34. There were 53 noes, 36 of them from the La-Follette States of Wisconsin,

"The movement is going steadily ahead," said James R. Garfield, of Ohio. "Those who Garfield, of Ohio. "Those who think this is a flash in the pan are mistaken."

In the opinion of the leaders, the new party enters the field with a formidable equipment. These leaders, however, said as to the men who took a conspicuous part in the campaign for Roosevelt's nomination, each must speak for himself.

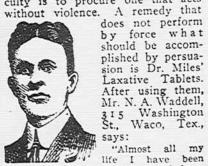

The attitude of Gov. Hadley, of Missouri, was the chief point of discussion along this line. The governor left town without waiting to declare himself.

No definite idea of the plan to be followed could be obtained, and it was said that a period of several weeks may elapse before the program is decided upon. Gov. Johnson in the meantime will act as field marshal and in cooperation with Roosevelt will decide upon the membership of the committee of seven and guide the preliminary lwork of organization.

"Clean up the bowels and keep them clean," is the advice of all physicians, because they realize the danger resulting from habitual constipation. Do not delay too long, but begin proper curative measures. Dr. Miles' Laxative Tablets are a

school house, within said District on Saturday, July 6th, 1912, for the Time for Side= Dressing

This is the time to side-dress your cotton. Ginners will tell you that thirteen hundred pounds of seed cotton that has been side-dressed will turn off as heavy a bale of cotton as fifteen hundred pounds of seed cotton that has not been sidedressed. Two hundred pounds of 4-10-2 applied to an acre of cotton as a side-dresser will increase the yield at least three hundred pounds of seed cotton to the acre. This three hundred pounds of seed cotton, the way you farmers have improved your cotton, will turu off about one hundred and twenty-five pounds of lint at twelve cents a pound will bring you \$15.00-at ten cents a pound, it will bring you \$12.50 and the two hundred pounds of 4-10-2 will cost you \$4.20, and two hundred pounds of 4-7-2 will cost \$3.40. The difference in these figures represents the extra profits which you will make on an acre of cotton by side dressing. Besides the satisfaction of having a fine cotton crop, it helps a man's feelings, and helps his standing in the community, and helps his cant scholarships in Winthrop College and for the admission of new students will be held at the Country when a more control of the time has passed in this country when a man can maintain his respectability and raise

"Bumble bee cotton." The fertilizer you use in side-dressing pays you better those making the highest average at than any fertilizer you use. It prevents the cotton's shedding. The reason cotton sheds is because it has not sufficient plant food. There is only a smail fraction of an ounce of plant food gets to each cotton plant when you fertilize in the Spring, and of this the rains wash away some, the grass gets some, and tuition. The next session will open September 18, 1912. For further inforthere is a verry little left tor the cotton plant.

Now, when your cotton plant begins to fruit, there is an added strain on the plant, and just at the time the strain is greatest on cotton plant the supply of the plant has diminished and is growing less. The result is the cotton sheds its fruit People who do not side-dress their cotton lose from onefourth to one-third of their crop every year by shedding.

The farmers of Anderson county side-dressed more last year than they ever did. You do not put enough corn and fodder in your stalls for your mules on Monday morning to last until Saturday night, and you would not think of purting enough corn and fodder in your stall for your mules in April to last until November, but yet that is what you are doing with cotton. You are trying to give it enough plant food in April to last until November. This plan will work in making cotton, after a fashion, but you will not get the crops and you will not get the clear money that you will get if you side-dress. If you put your stock under a heavy strain, you increase their feed. Now, when your cotton is under an increased strain by reason of its fruiting it will pay you handsomely to give it additional plant food.

Do not confuse th's side-dresser of ours with other sidedressing fertilizer where the ammonia is derived solely from nitrate of soda. This side-dresser of ours has soda to act quickly and blood, tankage, cotton seed meal and fish to carry if any they have, why the said administration should not be granted.

Apply as early as you possibly can. Full supplies of these goods kept at the Farmers Oil
