

CALOMEL IS MERCURY, IT SICKENS! STOP USING SALIVATING DRUG

Don't Lose a Day's Work! If Your Liver Is Sluggish or Bowels Constipated Take "Dodson's Liver Tone"—It's Fine!

You're bilious! Your liver is sluggish! You feel lazy, dizzy and all knocked out. Your head is dull, your tongue is coated; breath bad; stomach sour and bowels constipated. But don't take salivating calomel. It makes you sick, you may lose a day's work.
Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel crashes into your bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.
If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone. Your druggist or dealer sells you a 50-cent bottle of Dodson's Liver Tone under my personal money-back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.
Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular. You will feel like working; you'll be cheerful; full of vigor and ambition.
Dodson's Liver Tone is entirely vegetable, therefore harmless and cannot salivate. Give it to your children! Millions of people are using Dodson's Liver Tone instead of dangerous calomel now. Your druggist will tell you that the sale of calomel is almost stopped entirely here.

LIFTS FIRE OUT OF HOUSE

Autoist Rescuer Also Saves Dinner From Blazing Stove in New Jersey Town.

A. R. Gerber, a local clothing merchant, was the hero at a fire to which he was called as he was passing through Hartford in his automobile on his way home from Philadelphia. When a woman ran from her house and yelled that her kitchen was on fire Gerber didn't need any second alarm. Slamming on the emergency brake, he jumped from his machine before it was stopped and found the gasoline stove ablaze.
Calmly moving some furniture out of his way and taking the woman's dinner from the stove so it would not be ruined, he pulled the blazing stove right out the back door and landed it where it could do no further damage except to itself.—Mount Holly (N. J.) Dispatch Philadelphia Record.

Whenever You Need a General Tonic

The Old Standard Grove's Tasteless chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.—Adv.

Precautions.
"I'll run in with you and get a bite."
"Wait a minute till I lock the dog up."
The farther the waters of the oceans get from the equator the less salt they contain.

The General Says:
Why send your money away for bargain roofing, when you can get the best roofing at a reasonable price of your own local dealer whom you know?

Certain-teed Roofing
is guaranteed in writing 5 years for 1-ply, 10 years for 2-ply, and 15 years for 3-ply, and the responsibility of our big mills stands behind this guarantee. Its quality is the highest and its price the most reasonable.

RATION AND ATTENTION FOR DRAFT HORSE

An English Shire.

(By D. O. THOMPSON, Purdue Experiment Station.)
The average farmer has not learned the fact that to attain the weight of a ton at four years a draft colt must make an average daily gain of about one and a quarter pound from the time it is born. Many colts that at weaning time give promise of developing into good drafters never become more than 1,300 to 1,500-pound horses, largely due to the fact that they were not properly fed. In the management of the draft colt it is better not to let the colt follow the mare while she is at work, but to keep the colt to a box stall, making sure that there are no loose boards or open places in the walls in which the colt might injure itself, and it is well to handle the colt from birth and get it accustomed to

being handled with the halter. Coax him along, do not drive.
The following rations have been found valuable in growing draft colts:
Until weaning time, in addition to the mare's milk let it have such blue grass pasture as is available and give it access to a box containing a mixture of oats, three parts; bran, three parts, and oil meal, one-half part. After weaning, there is no better place for the colt than blue grass or clover pasture, provided it is supplemented with light grain ration and the colt given proper attention, and as a rough feed when the colt is in the barn dry, sweet alfalfa or clover hay free from dust with a limited supply of such other roughages as corn stover, oat straw, timothy hay, or perhaps a small amount of high quality corn silage.

GROWING WINTER OATS

Reduces Feed Bill and Prevents Washing of the Soil.

Variety Most Commonly Used in South is Red Rustproof—Winter Turf is Hardy and Valuable for Pasture or for Hay.

Every southern farmer should grow enough oats to feed his work stock during at least a portion of the year. In addition to furnishing feed grain at less cost than it can be purchased, fall-sown oats prevent the washing of the soil, by which much fertility is frequently lost. There is still time to sow winter oats in the Gulf states, though this work should be done at once if good results are to be obtained. According to specialists of the department, oats sown in the southern states during October or the first half of November may be expected to produce at least twice the yield of grain obtained from spring seeding.
Winter grain may be sown on land which produced a crop of cotton, corn, or cowpeas the past summer. If this land has not already been plowed, it will be better to make the surface soil fine and loose with the disk or drag harrow than to delay seeding by plowing now. Better results are obtained from sowing with the drill than from broadcast seeding, though if a drill is not available sowing the seed broadcast on well-prepared land usually results in a good stand. If the preceding crop was well fertilized, 100 to 200 pounds of acid phosphate will be all that the oats require this fall, though a little nitrate of soda will help the fall growth, especially if the soil is not already well supplied with nitrogen from the growing of cowpeas or some other legume. A top dressing of 50 to 100 pounds of nitrate of soda applied when growth starts in the spring will greatly increase the yield.
The variety of winter oats most commonly grown in the South is Red Rustproof. Appier, Lawson, Hundred Bushel, Bancroft and Cook are selections or strains of Red Rustproof which are said to be particularly valuable in some localities. The Fulghum is a promising new variety which matures a week or ten days earlier than the Red Rustproof, and usually produces as much or more grain. As the kernels of all these varieties are large, from two and one-half to three and one-half bushels should be sown to the acre. The smaller quantity is sufficient if the seed is drilled early on well-prepared land, while three bushels or more are needed when the seed is sown broadcast late in the season. The Winter Turf or Virginia Gray is a very hardy variety, which is valuable for pasture or hay production, but which does not yield as much grain in the southern states as the Red Rustproof. On account of the small size of the kernels, only one and one-half bushels of seed of this variety are required.
Wholesome Food for Hens.
Experiments have proven that the flavor of the eggs is influenced by the feed supplied the hens, hence it is of the utmost importance to supply the hens with nothing but wholesome food.

HELP SOLVE ONION PROBLEM

Farmers Frequently Inquire as to Proper Storage of Crop—Provide Plenty of Air Space.

(By J. S. KNOX, Arkansas Experiment Station.)
"How shall I store my onions so they will keep during the remainder of the summer and during the winter?"
The above question is one that is frequently asked by the farmers of the country. The following suggestions, if carried out, will greatly help in solving the problem:
Do not allow the onions to remain in the ground after they are mature, but dig them when from 80 to 90 per cent of the tops die and fall over. Three or four rows may be piled together in windrows as they are dug and allowed to remain in this way until the tops are dry, which will require several days, owing to the degree of sunshine. It may be necessary to turn the onions over at intervals of two days until they are thoroughly dry. Do not allow white onions to remain in the sun until they turn green.
As soon as properly cured in the field, place the onions in bags and carry to the storage house. The storage house should be well ventilated, especially until the bulbs are thoroughly dry. If only a few bushels are to be stored, it is a good idea to spread them out on the floor of a building. When placed in this way there is little danger of the bulbs heating or sprouting from moisture. Some of the regular onion storage houses have a series of shelves one above the other, in which the bulbs are spread out to dry. If you have to store them in bags leave plenty of air space between the different bags and be sure the bulbs are all cured before placing them in the bags.

TAKE CARE OF FARM MANURE

Every Reasonable Precaution Should Be Taken to Prevent Loss of Fertilizing Qualities.

Unless barnyard and stable manures are well cared for, a great part of their value is lost to the farmer. Many farmers allow practically all the liquid manure to go to waste, yet liquid manure contains more fertilizing value than solid manure, and every reasonable precaution should be taken to prevent its loss. The loss from leaching is large and can be prevented by the use of good floors and by keeping the stock well bedded. Fermentation is another source of loss. It cannot be wholly prevented, but can be held in check by keeping the manure moist and compact.

BUYING BETTER BEEF SIRES

Continued Good Prices for Cattle Will Result in Greatly Improved Quality in Our Herds.

The outlook for continued good prices for stock cattle has had the effect of encouraging farmers in the Southwest to buy better sires to head their herds. Recently a farmer paid without question \$140 for a Shorthorn of proved quality. Five years ago he would have gone straight up in the air had it been suggested to him that a sire worth \$100 would pay in his herd. It is evident that continued good prices for cattle will result in greatly improved quality in our herds.

WAS NOT A SEA SERPENT

American Museum Gets Picture of Harmless Shark, Mistaken for a Monster.

Stories of persons having sighted sea serpents and other monsters of the deep reach the officials of the American Museum of Natural History frequently, most of them coming in the form of letters during the summer months, when persons more familiar with business offices or their homes than with the inhabitants of the sea are attracted to the resorts.
Most of the letters are based on hearsay evidence, and so it was with some surprise that Dr. F. A. Lucas, the director of the museum, read in one of the letters that an actual photograph of the sea serpent whose actions were described was being forwarded under separate cover. He awaited the arrival of the photograph eagerly. The letter which preceded it said that the sea serpent had made its appearance at the eastern end of Long island and that it had whipped and churned the water near the spot at which it appeared for nearly an hour.
Occasionally its huge tail could be seen above the water; at other times two or three sections of its writhing, dark body could be seen at once. One of the spectators who had fled to the shore from a small boat procured a kodak and snapped the monster as conclusive evidence that sea serpents did exist.
The photograph arrived in the next day's mail, however, and Doctor Lucas found it to be not a sea serpent but what is known as a "thrasher" shark, a species which, it is said, is more afraid of man than man is of it. Its name is derived from the manner in which it thrashes about in the water with its huge tail.

FARMER'S WIFE TOO ILL TO WORK

A Weak, Nervous Sufferer Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Kasota, Minn.—"I am glad to say that Lydia E. Pinkham's Vegetable Compound has done more for me than anything else, and I had the best physician here. I was so weak and nervous that I could not do my work and suffered with pains low down in my right side for a year or more. I took Lydia E. Pinkham's Vegetable Compound, and now I feel like a different person. I believe there is nothing like Lydia E. Pinkham's Vegetable Compound for weak women and young girls, and I would be glad if I could influence anyone to try the medicine, for I know it will do all and much more than it is claimed to do."—Mrs. CLARA FRANKS, R. F. D. No. 1, Maplecrest Farm, Kasota, Minn.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Truly Bostonese.
Contrary to her custom, a Boston woman strayed far enough from home to encounter a mile post, on which she saw inscribed, "1 M. from Boston."
Thinking it a gravestone, she read softly, "I'm from Boston," and then commented thoughtfully, "How simple and sufficient."—Lippincott's.

The Norwegian government has established at Stavanger a domestic science school to afford a complete course in housekeeping to young girls.

What to Do for Itching Skin
Eczema, ringworm and other itching, burning skin eruptions are so easily made worse by improper treatment, that one has to be very careful. There is one method, however, that you need not hesitate to use, even on a baby's tender skin—that is, the Resinol treatment. Resinol is the prescription of a Baltimore doctor, put up in the form of resinol ointment and resinol soap. This proved so remarkably successful, that thousands of other physicians have prescribed it constantly for 20 years. Resinol stops itching instantly, and almost always heals the eruption quickly and at little cost. Resinol ointment and resinol soap can be bought at any druggist's, and are not at all expensive.

WANTED: Agents in growing cities and towns suitable for sub-division and sale at auction. NATIONAL REALTY AUCTION CO., Lakeland, Fla.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of
Charles H. Fletcher
In Use For Over 30 Years
The Kind You Have Always Bought
THE CENTAUR COMPANY, NEW YORK CITY.
