

We Want to Urge the Farmers

To sow grain this fall and to fertilize it when they sow it. The boll weevil is in Georgia and we don't know when it will be here. The pests and diseases that beset cotton seem to be increasing and doing more damage every year.

If you have a good grain crop a short cotton crop does not hurt so bad. Five acres in wheat and five acres in oats to the plow, ground well prepared and well fertilized, will make things easy for you next year. Where there is grain there will be hogs—wheat, oats, corn and hogs—and you have a mighty fine grub stake. But fertilize your grain when you plant it.

Conditions are Improving

Money is more plentiful, and right now is the time to begin economizing and take advantage of this prosperous age. The way to begin is to buy those things that are necessary to make one comfortable and preserve one's health from the cold winter months that are before us. Don't see how cheap an article you can make out with but buy something that is serviceable, etc., such as this store sells. It may cost you a little more to begin with but will be cheaper in the end. Two-thirds of a persons life is spent in the clothes they wear. So why not make that part comfortable. Come to Hobbs-Henderson Company's Department Store, look over the immense stock we carry and you will find that you can buy just what you need at less than you would have to pay mail order houses and then you would be helping your own town grow.
