Fish and Blood and Potash Fertilizer

Labor will be scarce this year unless there is a decided change, and that makes it necessary for you to fertilize heavily so you can make full crops on the land you get cultivated. Farm products will bring good prices this year, prices that will justify you in fertilizing liberally, and while Potash is high it will pay you to use some. You want good crops while prices are good. Three crops have been made without Potash and now gray lands are needing it and one per cent of Potash will help the crops on red land.

Potash is a medicine; it wards off diseases and keeps the plants healthy and strong, and when a plant is healthy and strong it will grow and blossom and fruit and you'll have abundant crops. There is as much difference between a healthy plant and a sickly plant as there is between a healthy pig and a sickly pig, so far as profitable returns are concerned.

Potash keeps your crops healthy and healthy crops are the only ones that pay. Keep the crops healthy while the prices are good. Make good crops when crops are worth something. Strike while the iron is hot.

We have the Potash and don't you forget it, we have the Fish and Blood Fertilizer. When you get the Fish and Blood and Potash goods you get the best to be had in fertilizer. If you don't make a crop with that it will not be the fault of the fertilizer for there is nothing better.

And now, finally, when labor is scarce and high and prices for farm products are fine, don't stint the fertilizer—make all you possibly can on the land you cultivate. Fish and Blood and Potash goods may be the solution of your farming troubles this year. We have the Fish and Blood and Potash goods—they are for sale—come to see us. You know where to find us.

LOCAL AND PERSONAL

Born unto Dr. and Mrs. F. S. Porter, January 27, a fine son.

We are sorry to report that Mrs. W. T. Jeanes of Pickens slipped on the ice and broke her arm Sunday.

Homer Sutherland has not joined the "Mexican" corps of the army as was stated last week. He has joined the medical corps.

Mr. George Bryant and Miss Cora Hendricks of the Crow Creek section were married by Magistrate W. S. Gantt on January 27th.

The most interesting reading in THE SENTINEL this week is the new advertisements. There are several and it will prove interesting and pay you to read them.

Up to January 16th there had been 14,261 bales of cotton of the 1917 crop ginned in Pickens county. At the same time last year there had been 15,478 bales ginned.

It was reported here Sunday that Ben F. Parsons came near being asphyxiated in the bath room of his home at Greenville Saturday by escaping gas. We are unable to learn particulars.

Among the soldiers who visited home-folks in Pickens recently were Frank Welborn of Camp Jackson, Robert Welborn and Furman Holder of Camp Sevier. There may have been others we did not see.

The Boy Scouts of Pickens last week distributed copies of President Wilson's Flag Day address. This was done in order that the people may see more plainly what the United States is fighting for. The Pickens Boy Scouts are a live bunch.

Willie Thompson, a Pickens boy who is in the hospital branch of the army, has been transferred from Camp Greenleaf, near Chattanooga, to Fort Worth, Texas, where he is in the Post Hospital, Medical Department, Tallaferrero Aviation Field No. 2.

Gen. Frank G. Mauldin had the misfortune of sustaining a broken ankle recently. While riding his horse on official duty at Camp Cody, N. M., the horse fell and rolled on Gen. Mauldin's foot. While the injury is not serious it entails quiet as the broken bone is in a plaster cast.

Rural Policeman B. B. LaBoon assisted by Officers Sullivan and Austin of Greenville, destroyed a still and 1,000 gallons of beer on Eastatoc last week. Allison Powell was captured at the same time. He was given a preliminary trial before Commissioner Robinson and bound over to Federal court.

Frank McFall, the handsome and accommodating cashier of the Pickens Bank went into a drug store recently and inquired of Douglas Yongue for some talcum powder. "Yes sir," says Douglas with a doctored expression and pharmaceutical accent, "do you want Mennen's?" "No," replied Frank with monetary gesture, "women's."
