

# Preserve Eggs With Water Glass

(Solution Silicate Sodium.)

**DIRECTIONS:** Select clean fresh eggs (do not wash eggs, it injures them). Heat to the boiling point and cool nine quarts of water; to this add one quart Water Glass and mix thoroughly. This is sufficient to preserve about twelve dozen eggs. Place eggs in a crock, jar or pail, small ends down. Pour over them the solution, keeping at least two inches of the solution above the top layer of eggs at all times. Put on the cover and keep all in a cool place until required for use.

**NOTE:** When eggs taken from the solution are to be boiled, pick the shells at the large end just before boiling to prevent cracking. Fresh eggs may be saved six to ten months by this method.

50c a quart. We have fresh supply.

Yours to please,

This Is Very Pleasant

Greenville News.  
The Pickens Sentinel issued a capital War Savings edition yesterday, twelve pages, full of advertisements by patriotic business men and firms. The Sentinel expects to buy War Savings Stamps with the money derived from these advertisements. Business men of Central contributed a page in thirty minutes through E. L. Henderson, which is certainly fine business. This issue of the Sentinel is a credit to the grand old Independent State of Pickens. The News congratulates Editor Gary Hiott on the achievement.

Get these facts in your mind and keep them there:

**R. A. Cooper**

said in his speech at Barnwell, and again at Hampton, that he could not and would not promise a reduction in taxes.

**John L. McLaurin**

says that he can and will reduce taxes, by doing away with useless offices and useless machinery of government, and using the same broad-gauged business understanding that inspired him to give South Carolina the state warehouse system.
