

BRIEF NEWS NOTES

WHAT HAS OCCURRED DURING WEEK THROUGHOUT COLONIES TRY AND ABROAD

EVENTS OF IMPORTANCE

Gathered From All Parts Of The Globe And Told In Short Paragraphs

Foreign—

It is stated in Mexico City that the Banco Unico de Mexico will be established next January with a capital of two hundred million dollars, owned jointly by the government and the public.

Officers of Philippine Island inter-island vessels have notified their owners that they would strike July 31 if salaries are reduced. Insular officers have intimated that they would use coast guard cutters to handle the inter-island traffic if the threatened strike becomes effective.

Officials of the British Red Cross headquarters say that a recent press announcement emanating from Geneva that the Spahlinger vaccine treatment against tuberculosis had been purchased by the Red Cross had not been authorized by that organization.

President Obregon of Mexico shows improvement. The high temperature of the past few days has almost disappeared and he will soon be back at his post.

Provincial newspapers throughout Prussia which heretofore have been serving as official organs for local governments will have to conform in their German republic or forego their revenues from official advertising. A decree to this effect has just been issued, effective immediately.

Pope Pius received Henry Morgenthau, former ambassador from the United States to Turkey, and had a long conversation with him under conditions in the Occident.

Lord Newton, speaking in the British house of commons the other afternoon, declared England and Scotland were the dirtiest countries in Europe. He said that in the city of London alone 200 tons of soot falls every year on each square mile.

Free State troops have captured Ballyhough and Ballyhumis, it was announced recently.

Canadian railroads from the Atlantic to the Pacific may be tied up with a strike nearly equal in extent to that of the United States as the result of strike ballots which were being counted at Montreal.

Washington—

Charles Hall Derry of Macon, Ga., will be appointed by President Harding and assigned as vice consul in the United States consular service.

Senator Culberson of Texas, apparently defeated in the recent Texas primary, wired his friends that he would take no part in the run-off, and told his friends to exercise their own judgment as to whom they would support.

Royalties received from the production of oil and gas on government-leased lands are now running around half a million dollars a month, and for the last fiscal year aggregated \$5,765,507, it is announced by the bureau of mines.

Co-operation of the government in advancing the American radio program was recently pledged to the National radio chamber of commerce at the annual meeting by Secretary Hoover. Mr. Hoover, however, was unable to attend and sent a substitute.

The direct primary system, which some powerful political personages would abandon in state and congressional elections should be extended so that candidates for president and vice president would be nominated by a straight vote of the people under a bill which Representative Schall, blind congressman from Minnesota, announces he has prepared for introduction in the house.

The trial on the criminal charge of conspiracy to defraud the United States and the shipping board in connection with war contracts pending in the District of Columbia against Charles W. Morse, his three sons and eight others, will not await the determination of any civil controversies between the defendants and the government, United States Attorney Peyton Gordon declares.

The purchasing power or exchange value of farm products slumped four points between March and June, to 72 per cent of the 1913 basis in the latter month.

Immediate steps for acquiring a maximum production of coal from non-union and strip mines, adequate distribution of the supply through government control of coal cars and preventative against profiteering, have been affected by the administration, according to a United News staff correspondent. Secretary Hoover will be virtual fuel director.

The first formal negotiations for the funding of the allied war debt by the United States was recently made by Jean V. Parmentier, refunding representative of France.

Hoboes of America are going into politics. "A hoboes' lobby"—to be known by the more modern term of "legislative committee"—soon will take its place with the social, labor, farm and other so-called lobbies. The purpose of the lobby will be to secure for the unemployed of the nation government unemployment insurance of at least \$1 a day.

The Polish diet has rejected a motion of want of confidence in President Pilsudski introduced by members of the Right. The vote was 25 in favor of the president, against 137.

Through a hole blown in the wall by a mine, 105 prisoners escaped from the Dundalk jail, county Louth, Ireland. The shock of the explosion shook the town, shattering the windows of the county hospital and the dwellings of the town's best residential district.

Former Secretary of War Baker was recently called before the special grand jury investigating alleged war frauds in connection with the sale by the war department of the old Hickory powder plant at Jacksonville, Tenn., to the Nashville Industrial corporation.

A national emergency, growing out of an industrial conflict, has been declared by the government for the first time in the peace-time history of the United States. As a result of the coal and rail strikes, the interstate commerce commission, empowered for the first time by the Esch-Cummins law, has assumed control of the distribution of fuel, food and other necessities.

Domestic—

Twenty-five Guardsmen and two officers were ordered to the property of the Yellow Creek Mining company in Bell county, Kentucky, by Governor Morrow.

Former Senator Lorimer of Illinois is in a Chicago hospital being treated for his eyes. Physicians say it will be several weeks before the result will be known.

Louisville, Ky., dealers in western Kentucky coal report that the mine price has dropped \$2 from the price of \$9 and \$10 a ton.

Basett Miles, federal prohibition enforcement officer, and three others have been indicted on a murder charge by the Travis county, Texas, grand jury in connection with the shooting, several months ago, of a man named Peeler Clayton.

Claiming she came to the United States from France on a promise of marriage, Mlle. Marie Porquet, a pretty little French girl, has filed suit for \$500,000 against James Henri de Rothschild, in New York City. Rothschild is said to be a son of Baron de Rothschild of the famous family of international bankers.

Five companies of the 142d infantry of the Texas National Guard detained at Dennison, Texas, and took charge of the railroad shop district.

The auditorium for use at the Montreat (North Carolina) summer conferences of the Southern Presbyterian church has been dedicated with representatives present from every Southern state.

Charges that Prohibition Commissioner Roy A. Haynes and his officers were exerting illegal administrative measures under cover of the Volstead act and were oppressing the proper distribution of medicinal whisky and alcohol were contained in resolutions adopted by the distillers of the country in convention at Louisville, Ky., with an appeal to the president, the secretary of the treasury and the commissioner of internal revenue to see that the federal prohibition commissioner conduct his office in conformity with accepted standards of well regulated and responsible public administration.

The Consolidated Gas company recently boosted its annual dividend rate from 7 to 8 per cent in declaring a quarterly dividend of \$2 a share.

First Lieut. R. H. Strohhouse and Second Lieut. Taylor E. Monroe were instantly killed at Rantoul, Ill., when their airplane fell 500 feet.

During a shooting affray in Meridian, Miss., Mrs. Cora Harvey, 30, was shot in the ankle by either her husband, Walter Harvey, or Claude Wellman, with whom Harvey appeared to have been having some words. But one shot was fired. Wellman disappeared and Harvey refused to make any statement, as does Mrs. Harvey, who was rushed to a hospital. Her injuries are not considered serious.

The city of San Francisco has a brand new liquor store with Uncle Sam as proprietor. S. F. Rutter, prohibition director for California, has obtained permission from the United States district court to sell what he declares to be strictly first class, bottled in bond imported liquor at \$3 a gallon.

David Belasco was severely injured in New York the other day by falling from a stage into the orchestra pit.

Jersey City junk dealer bought the bankrupt Nassau and New York Traction company, valued in 1910 at \$1,650,000, for \$15,000.

"The Wayfarer," a Biblical play, is showing at Seattle, Wash., for the second season. The play, it is hoped, will prove to be the passion play of America.

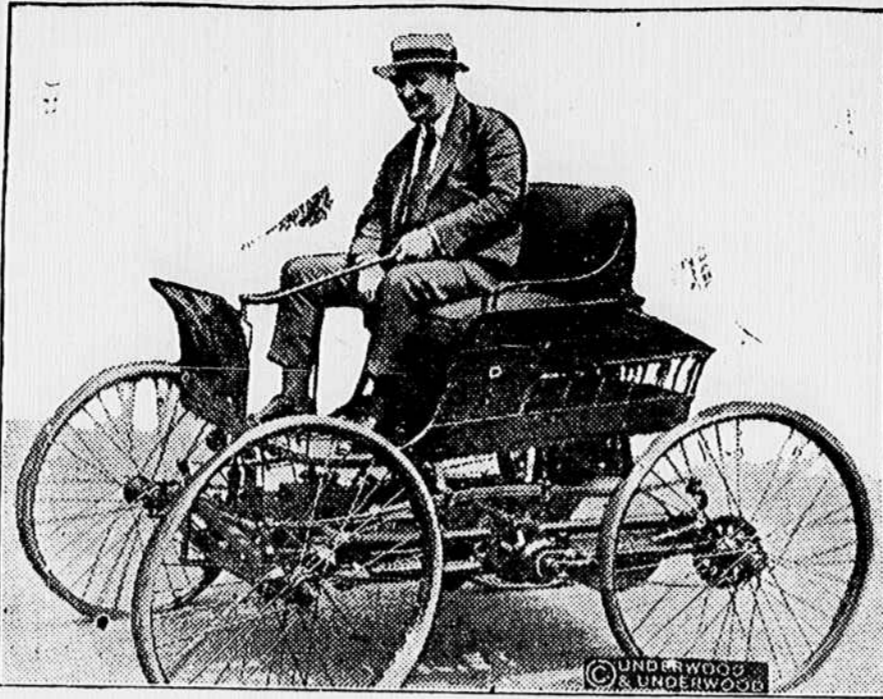

A well dressed man jumped from a ferry boat in the Hudson river at New York the other afternoon. He had sent newspaper reporters an invitation to be present. He requested that his body be incinerated and the ashes sent to fertilize the lawn of the broker with whom he had lost his lifetime savings.

One miner was wounded and about a dozen others narrowly escaped serious injury at Bryson Mountain, Tenn., when a party of alleged strike sympathizers fired a fusillade of shots at them as the miners were en route to work.

Mildred Brewer, 16 years of age, was cleared of the charge of murdering A. Portis McKeithen at Montgomery, Ala., but will be held as the ward of the state until she reaches maturity.

New York retail coal dealers predict that coal, this winter, will go to \$25 a ton unless there is a speedy adjustment of the coal strike.

OLDEST AUTO IN UNITED STATES

America's first car, built by Elwood Haynes in Indiana and successfully tested out near Kokomo, Ind., on July 4, 1894, was recently taken from Smithsonian Institution back to Kokomo for the twenty-eighth anniversary on July 4. Photograph shows Congressman Fred Purnell from that district in America's oldest car in front of Smithsonian Institution. This is the first time any article on exhibition in the Institution has been removed.

NEAT TRICKS IN GREASING AUTOS

Vexatious Problem to Insert Lubricant Through Plughole Larger Than Gun Nozzle.

CHEMIST'S CORKS ARE IDEAL

Special Guns Are Part of Equipment on Many of Most Modern Cars Having Lubricating Systems—Clean Out Yearly.

One of the most vexatious greasing problems is to insert grease through a plughole larger than the nozzle of the gun. To keep the grease from going everywhere but into the hole, obtain a cork about the size of the largest plug on your car. Bore a hole in this cork so that it will slide over the stem of the grease gun, and when you are filling a large hole simply push this cork down to fill the oversize opening. Chemist's rubber corks are ideal for this purpose. A rag or some string packing wound around the stem of the gun can be forced down to act as would the cork.

Cars Have Greasing Systems.

Many cars now equipped with greasing systems using a special gun which connects with the nipples on the car. This makes it easy to do some advisable cleaning of the grease passages about once a season. Attach the empty gun, release the plunger so that it can be worked like a pump, and then proceed to force air through the grease connections. This will serve to clean out the distributing grooves in which grease residue has probably congealed during the winter. To make still more certain a perfect lubrication, precede the air pressure treatment with a similar treatment of kerosene to flush out the dirty old grease, which will be seen coming out on the opposite side of the spring shackle. Then use air pressure to force out the kerosene before applying fresh lubricant.

Other Places for Grease.

Nor is greasing something to be put only into gun cups and other specified places. Wipe some grease on the wheel shoulders against which the demountable rim rests on the inside. Do this about as often as removal of the rim is required by tire changing. At the same time apply grease sparingly to the rim fasteners and to the rim bolts. By this practice, nearly all rim squeaks are permanently ended.

The chief objection, apart from engineering considerations, is the difficulty of making a double gasket absolutely leak-proof. An ingenious method has been devised to eliminate the extra gasket and accomplish the same purpose. It is necessary first, to equip the car with so-called priming spark plugs. The little petcock intended for injection of gasoline is removed. This leaves a threaded part in the spark plug. In this hole screw a tube three or four inches long with the end of the tube tightly capped. The effect is apparently the same as if the cylinder content were enlarged by the content of the tube—the object sought in the use of an extra gasket.

PLAN TO CLEAN REFLECTORS

Douse Thoroughly With Stream of Water Without Rubbing, Then Polish With Rouge.

Headlight reflectors become easily scratched. To polish them clean thoroughly with a stream of water without rubbing, and then polish with rouge, as it is used by jewelers, applying rotary motion. Because of the silver plate, do not rub hard.

Welding Costs.

Before sending in a broken part to be welded the car owner ought always to get an estimate; otherwise the repair is not unlikely to cost more than a new part. The welders always have an explanation of the excessive charge, but that doesn't help the payer much.

You Auto Know

That valve leakage is one of the most serious losses of economy in the operation of an automobile for, if the valves leak, it is almost impossible to get good compression in the cylinders, and this, in turn, exerts a powerful influence over the entire performance of the car, giving rise to knocks, loss of power and various other ills. Proper care of the valves and regular regrinding are therefore to be numbered among the "expenses" which are really economies, for they will pay big dividends in efficiency and mileage.

Worn valve stems also cause leaks which are quite as serious as those of the valves themselves. In this case the failure of the valve stem to fit snugly into the guide allows air to be drawn past the stem into the cylinder, thinning the mixture to such an extent that the engine fails to run regularly unless the mixture is made richer, while throttling down to less than ten miles an hour is almost impossible. The fact that valve stems need attention is usually apparent from the hissing sound characteristic of this trouble. (Copyright, 1922, by The Wheeler Syndicate, Inc.)

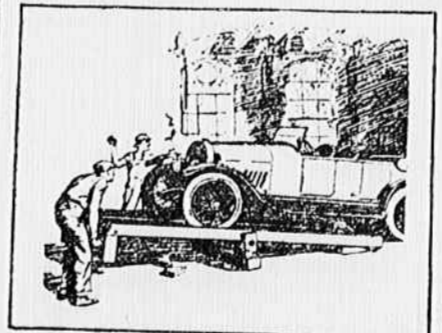

FACILITATE REPAIRS ON ELEVATED STAND

Portable Platform for Auto Work Is Illustrated.

Two Longitudinal Rails of Wood, Ten Feet Long With Center Support, Will Prove Entirely Satisfactory—How Made.

In the small repair shop it is not always convenient or practical to have a work pit or a permanent elevated platform for removing the automobile far enough above the floor to give free and easy access underneath. A stand that is portable and on which an automobile can be placed in an elevated position is shown in the accompanying illustration.

It consists of two longitudinal rails of wood, 10 feet long. A center support with two pivots about 21 inches high forms a trestle on which the automobile is pulled by means of a winding bar, crank, handle, and rope, with

Repairs Are Made Much Easier if the Automobile Stands on This Trestle Above the Floor.

a hook to attach to the front axle of the automobile. Two fixed blocks on the forward ends of the rails with two swinging blocks on the rear ends rigidly support the automobile after it is pulled into place and the forward end lowered.

On account of the angle of the incline and the possibility of over-running, the winding drum should be the means of getting the automobile on the rails. Two wedges forward nailed in place will prevent the automobile from creeping to the front. Wedges are also placed under the rear wheels. When not in use, the parts are readily disassembled and placed aside.—Popular Science Monthly.

Mistakes Will Happen. Never misjudge the gear shift of the car for the emergency brake, nor the foot accelerator for the clutch pedal.

WRIGLEY'S for Better Digestion

When you've eaten fully and have a stuffy feeling—or when your stomach is unruly and feels upset—WRIGLEY'S will bring relief and make you feel fit again.

It calms and soothes the stomach and nerves, aids appetite and digestion, keeps the mouth sweet and teeth clean.

Wrigley's P. K. is the new double treat—peppermint sugar jacket over peppermint chewing gum.

Sugar jacket just "melts in your mouth," then you get the delectable chewing center with all the usual Wrigley benefits.

Save the Wrappers They are UNITED POINT SOUVENIR COUPONS Good for Valuable Premiums

The Best Man's Toast.

At the club last night the business girl was the center of a group of interested listeners. Fragments of conversation containing the words "worlds-aids," "simply adorable," "wonderful house," "pearls," "Japan," floated over to the woman and induced her to put down the magazine and unblushingly seat herself on the Chesterfield directly behind the animated narrator, just in time to hear her description of the best man.

"He was very good looking, though rather conceited, and in responding to the bridesmaid's toast said: 'All through our school and college days the groom and I have been the best of friends. In games and sports I have usually beaten him out, but in this great race for a bride the better man has won, and I'm sure he's welcome to her.' Of course the poor thing meant to say: 'I'm sure he's worthy of her.' But he can never, never explain it away, and the bride says she certainly won't invite him to another wedding of hers!"

That's That.

"They claim this foreigner who wants to marry a young society girl has no money."

"That's easy. With the advertising he has received he's worth a fat salary. We'll just sign him up for 40 weeks in vaudeville." — Louisville Courier-Journal.

RYZON BAKING POWDER you use less

Glaced Grasshoppers
A sight that would have captured the heart of John the Baptist, as shown in photographs recently discovered grasshopper gophers in the northern corner of Yellowstone National Park.

These pictures, just received by the geological survey, show imbedded in the ice thousands of strata of grasshoppers of extinct species of a time long before the period in which they insects were considered delectable.

These glaced grasshoppers must have been flying over the mountains in living clouds of millions when they were caught in snowstorms and frozen into the glacier.

Motorists are visiting the remarkable glacier by the thousands this summer.

Beginners Encouraged.

First Young Doctor—How are you coming along? Making good?
Second Young Doctor—Fine! I'm thankful I didn't begin to practice in the days before prohibition, though "Same here."—Judge.

"Saved my baby"

Zollor Springs, Fla. March 5, 1920

Anglo-American Drug Co., 215 Fulton St., New York.
Dear Sir:
I am using Mrs. Winslow's Syrup. It saved my baby from dying of colic, which she had for three months. Some one advised me to get Mrs. Winslow's Syrup and I did. Yours truly,
(Name on request)

Colic is quickly overcome by this pleasant, satisfactory remedy, which relieves diarrhoea, flatulency and constipation, keeping baby healthy and happy. Non-narcotic, non-alcoholic.

MRS. WINSLOW'S SYRUP

The Infants' and Children's Regulator
Formula on every label. Write for free booklet containing letters from mothers. At All Druggists.

ANGLO-AMERICAN DRUG CO., 215-217 Fulton Street NEW YORK
General Selling Agents: Harold F. Elliott & Co., Inc., New York, Toronto, London, Sydney
