MAN
is a peculiar being in many respects. Sometimes he neglects to let his

WANTS
be known when a hint would be all that is necessary.

BUT
rather than worry some one with what he considers a

LITTLE
thing he will do without what he wants. There is no use doing without staple and fancy groceries, cigars, tobacco, confectioneries, etc.

HERE
in this world when you can obtain them so easily at my store. I do not sell at and

"ALL'S WELL THAT ENDS WELL."

The Safety Well Fixture,

Owned and Controlled by

The Safety Well Fixture Co., of Blacksburg, S. C.

A Southern invention and manufacture. Over 10,000 in use since they were placed on the market. As a water elevator it has no equal. It is the only structure that will raise water, as it has no attachment to any part of the well below the platform.

It is the most durable fixture for the purpose in use. It is substantially constructed, and the buckets never come in contact with each other or the sides of the well, and the groove provided in the wheel is so arranged as to produce but little friction on the rope and none on the pulley.

It Works Easy. The buckets balance each other, so the only resistance to overcome is the weight of the water in one bucket; hence it is the only structure that will raise water from the deep wells without a corresponding increase of friction, and that requires no more power to operate in a well of 100 than in one of 20 feet deep.

It Has None of the Objections Common to Pumps. It has no wooden tubing to wear out, decay and pollute the water, no iron tubing to rust, never has to be primed, pumped or thawed out, and you do not have to pump out a gall of water to get a fresh, cold drink.

It is Entirely Free from Danger. Being provided with a self-acting break, governed by an eccentric, it is impossible, should the hand accidentally slip from the crank, for the bucket to run down. Hence any child can handle it with perfect safety. The unimpeded handling of ropes and buckets will be done away with, and the uncleanliness attending such operation avoided.

Office Clerk of Court, Spartanburg, S. C., Sept. 8, 1897. "The Safety" fixture I bought from you in June, 1896, is the best thing for the purpose I have ever seen, and should be on every well where ladies and children have the water to draw. I am only sorry I have not had one on my well; since the first day I commenced housekeeping.

T. R. THOMAS, Clerk.

BLACKSBURG, S. C., July 27, 1897. So, Well Fixture Co., Well Fixture Co. I have seen you give perfect satisfaction. I would not be without it for twice the cost. It is the best solution of the problem of getting pure fresh water to drink that I know of. I have seen you in use for 8 years. They are simple, safe and durable, and the cleanest thing for drawing water that I know of.

J. T. DARWIN, M. D.

Office Carriage and Carriage, Attorneys at Law, Spartanburg, S. C., Sept. 8, 1897. I have been using "The Safety" well fixture sold by the Southern Well Fixture Co. for more than a year. I am well pleased with it. It is safe, clean and convenient and I prefer it to any well fixture I have ever seen.

CONSTIPATION

"I have gone 14 days at a time without a movement of the bowels, not being able to move them except by using hot water injections. Chronic constipation for seven years placed me in this terrible condition; during that time I did everything I could but never found any relief, such as my case until I began using CASCARETS. I now have from one to three passages a day, and I feel as if I would give \$100 for each movement; it is such a relief."
