**Grand Opening**—Sugenheimer & Groeschel.

The following is the registration of voters up to six o'clock yesterday afternoon: White, 65; colored, 73.

The heavy wind on Thursday blew down considerable fencing in the county. A portion of the new county fence was prostrated.

The alarm of fire on Wednesday morning was caused by the burning of the roof of the dwelling of Mr. George W. Crawford. The fire was caused by a defective flue in the chimney. The engines were promptly on hand, and the flames were extinguished before any damage was done.

**COLD SNAP.**—A tidal wave from the Northwest struck Winnboro on Thursday night and made things lively. Ice formed freely everywhere. Although full reports are not in, it is found that much damage was done to the fruit-rop and the early gardens. Small grain was also injured. The prospect up to this time has been very promising.

**FIRE IN THE WOODS.**—A fire broke out on Thursday afternoon in the woods on the land belonging to Dr. T. B. Maddon, near town. The wind being high, the fire was well-nigh unmanageable, and was not subdued before a large space of woods had been burned over. The fire resulted from the carelessness of some negroes on an adjoining piece of land.

**THE DAVIS SEWING MACHINE.**—Mr. W. C. Reynolds, the traveling agent of the Davis Sewing Machine Company, is stopping in Winnboro for a short time, looking after the interests of his Company. He is ready to give any instructions and assistance to parties having these fine machines in use, and also to those who may purchase during his stay here. He will be found at the store of Mr. J. O. Boag, the agent for Fairfield county. The Davis is such a good machine that it needs no new praise from us. Wherever it has been used, it has given entire satisfaction.

**THE COLUMBIA REGISTER.**—We have received a copy of the *Columbia Weekly Register* in its enlarged form. It is now an eight-page paper, thirty-four by forty-eight inches, containing fifty-six columns of reading matter, making it the largest weekly paper ever published in the State. It contains the most important telegraphic news of the week, editorials on the leading topics of the day, the latest market reports, the cream of the news from the metropolitan newspapers, carefully compiled State news, poetry, humorous articles, miscellaneous reading matter, Columbia local news and a condensation of all that is going on in the busy world. To those who are unable to afford a daily paper, or whose mail facilities are weekly, the *Weekly Register*, at its low price—two dollars a year—supplies a means of information on current events adequate to every requirement.

A severe tornado passed over Brown Summit, N. C., on Thursday. Several houses were blown down, scattering furniture broadcast. One boy was killed and many persons seriously injured by falling timber. Trees and fences were blown to pieces. Great damage was done by the tornado in its passage.

**ROCKY MOUNT CHIT-CHAT.**

The Great Water Power—Something that Only Needs Capital to Develop into a Great Source of Wealth.

Much has been said and written about the water-power near Columbia. We concede all that is claimed for it, but think the water-power of Rocky Mount exceeds it. From what is known as the "guardlock" near Doig's old mill-site at the head of the "great falls" on the Catawba river, is the best water-power in South Carolina, perhaps in the Southern States. Four hundred feet from the "guard lock" a fall of fifteen or twenty feet can be obtained, and when Rocky Creek is reached—a distance of about two thousand feet—the fall is from fifty to seventy feet, with water enough to run ten acres of machinery. The masonry on the canal will compare favorably with any work of similar character for neatness, strength and durability. Portions of this work has been lashed by the turbulent waters of the Catawba river for three score years without displacing a single stone. This portion of the canal is still owned by the State. One great drawback is inaccessibility. It seems that this portion of Fairfield and Chester is doomed to eternal isolation. Another is our poverty. We are too poor to build railroads or erect factories. We doubt very much the *will* if we possessed the means, as we think there is not enterprise enough among the people here to build a respectable chicken coop. In *ante-bellum* times these things could have been done, as there was plenty of money "lying around loose" to have erected cotton mills and built railroads; but our great ambition then was to make more cotton, to get more money with which to purchase more land and negroes, to make more cotton. Since the war we have made a slight change. We now make more cotton with which to purchase more corn and bacon, with which to make more cotton. Verily, we are an enterprising people. We digress. Be it known to all mankind that we should be exquisitely happy to have men of enterprise and capital to come and settle among us and develop our resources. We will take them by the hand and bid them God-speed, and if it should be necessary forget that they were ever Radicals or that they burned our dwellings.
