After you get angry and stop your paper just poke your finger in water, pull it out and look for the hole. Then you will know how sadly you are missed. A man who thinks a paper cannot survive without his support ought to go off and atsy awhile. When he comes back half his friends will not know that he was gone, and the other half will not care a cent, while the world at large kept no account of h's movement. You will find things that you cannot endorse in every paper. Even the Bible is rather plain and hits some hard licks. If you were to get mad and burn your Bible the hundreds of presses would still go on printing it; and when you stop your paper and call the editor names, the paper will still be published, and what is moreyou'll read it on the sly .- Ex.

TWAS BITTER COLD.

A Night's Experience in the Lumber Regions of Maine. "In February, 1840," said Capt. R. L. Zeby, of Uniontown, "I had an interest in some lumber way up in the Piscataquis region, and I had to go up there and see how things were getting along. It was a long journey, but the sleighing was like glass, and I had one of the best horses that ever stood inside the thills, On my second day-out the thermometer stood at 20 degs. felow, and was inclined to go lower. I knew I would reach one of those queer little villages common to President Cleveland has decided to stop over one hour in Charleston on his reof the agent of the lumber property, Mr. Jesse M. It was a starlight night, but the air was filled with that peculiar frezen mist frequently noticeable on very cold nights. As we neared the river this haze became denser, until finally it was with difficulty I could see anything ahead of me. It was like passing through a storm of scaly ice. Suddenly, as I was thinking that we must be almost on the margin of the river, there can a crackling sound, a load splash of water, and the next second my horse was floundering about in water, which also covered

The water splashed about soon drenched the rest of me, and in less time than I can tell it I was coated with a rapidly thickening armor of ice. I guess my noble beast must have floundered at least a minute in that hole before he knew exactly what had happened. When the situation did come to him he became quiet, threw his fore feet up, and lodged them both in the ice with a con-certed blow like a trip hammer. The ice was thick, but beneath that blow an immense cake was broken off and was car-The trite proverb anent whistling girls ried down in under the edge of the ice and crowing hens may as well be hung below. off this fatal spell, and that was all. "I don't know how far I was from the agent's house when I froze to death, but the next thing I remembered I was suffering such tortures as a victim of the rack might feel. He never felt worse. Suddenly, at my feet, the pricking of a million needles assaulted my flesh. Torturing me at that spot a moment, until I writhed in agony, it dashed quickly up my leg, stopped an instant, as if gloating in my misery, and then crawled with that awful pain slowly upward, until it seemed that tiny jets of the fiercest flame were being blown into my body, heart and brain. The intensity of this agony was not constant. If it had been I would have died again in a short time. It came James Van Tassell, a merchant of in waves, so to speak. Is Undersold on Staple and Fancy Groceries!

TO the citizens of Laurens County I announce that my stock of goods, consisting of Flour, Meal, Cora, Bacon, Molasses, Grits, Sugar, Coffee, Rice, and everything usually kept in a first-class Grocery House, has just arrived fresh from the great dealers. Cigars and Tobacco a specialty. All I ask is to give me a trial. The goods are here and must
