FORT HILL, S. C., July 28 -Today is a red letter day in the history of South Carolina. It marks consummation of the dearest wish of the farmers, the backbone and sinew of the Palmetto state. Today, in the presence of a huge crowd, and with solemn Masonic rites, the corner-stone of Clemson college, the realization of the dream and heart's deframous sons of South Carolina, John C. Calhoun, was laid.

The long continued rains had degenerated all the roads leading to Fort Hill into mud puddles, and yet through these roads pushed thousands of eager people, some on foot, others on horse or mule, and the balance in every variety and species of vehicle that could be thought of. Even ox carts could be seen in the long procession that wound through the valleys and over the hill-tops to historic Fort Hill. Excellent stock, most of it was, too, for the farmers of Pendleton are famous for the fine horses and mules they raise and own. Many persons rode distances of twenty and thirty miles to be present. A happy crowd it was assembled at

A happy crowd it was assembled at the grounds. Almost everybody was splashed from head to foot with sticky red clay mud. The rain persisted in falling, and yet nobody seemed to mind these set-backs to the perfect pleasures of the occosion. Stalwart, broadshouldered men, bonnie winsome lasses, comely matrons, and men, whose hair comely matrons, and men whose hair was whitened with the snows of many winters, and whose faces shone with

the wisdom of learning and experience, all were bright and smiling. Their sunny faces seemed to fill the place of the hidden king of day.

The chemical laboratory is the only uilding of Clemson college which has been completed. It is a very pretty structure. It was filled all day with curious spectators, who wished to see the place in which hereafter South Car-olina boys will learn to analyze the soil and find out what is necessary to bring it to higher productive powers.

The mechanical building is very nearly completed. It, too, sheltered large crowds during the frequent showers. The house of the secretary and treasurer of the board of trusteess, and one of the professors cottages have been completed. All the buildings are of brick, and put up in handsome and substantial style.

The venerable old building which was the home of Calhoun and Clemson, was the central object of interest. It was filled all day with persons admiring the old pictures and furniture. A hand-some oil painting of the benevolent Clemson, and an antique harpsichord, upon which Calhoun's daughters used to play, were especially admired.

The clouds lower and the skies weep. This weather is but typical of the struggle which preceded the establishment of this college. I congratulate you that the struggle ended

gratulate you that the struggle ended triumphantly for the common people.

Around the corner-stone which was laid to-day many hopes and grand aspirations are twined. The idea at the root of the struggle for this college was

that men should not be trained simply as men and then left to fight for a

knowledge of pursuits; but that men should be trained in the pursuits them-

raising of cotton. This college wil! do more than simply to teach men how to

farm without diversification. Any de-pression like the present low price of

NEW YORK, July 29.—After a long period of anxiety the bull traders in cotton futures had an inning today. For some time the day for issuing no tices for delivery on August afternoons was looked forward to with some fear as it was believed that sellers would send out a large volume of notices of delivery and swamp the market. Today was the first day for issuing notices, and the general rule is that most of the notices are sent out as soon as the time of issue arrives. A comparitively small number of notices were sent out, however, indicating that most of the sales were for short account. This encouraged the bulls, who started to buying hortly after noon, and the shorts rush ed to cover. BURLINGTON, 1a., July 25.—When the St. Louis Long Line train arrived in this city, it bore a very melancholy party consisting of Mr. and Mrs. J. R. Berger and their dead babe. The mother carried the corpse in her arms where it had died six hours before while en route it having beeh taken sick after leaving St. Louis. So afraid was the poor wo man that the corgse would be taker from her that she covered its face with a handkerchief, and allowed herself to make no sign of grief, thus riding for

A Boiler Explosion Vicksburg, Miss, July 30.—A small poller used in the repair shops of the Hill City oil mill exploded yesterday, fatally injuring the engineer, Albert Spier, and the fireman, Albert Fisher. A boiler weighing 2000 pounds flew into the air and fell into the house of Marx Lowenburg, 300 feet away, going through the roof floor and gening and through the roof, floor and ceining, and one was hurt, the family having left the table when they heard the report caused by the explosion.

Collision in Colorado.

One million people are dependent upon the fields; yet these people know not how to recuperate their fields so as to make them compete with the virgin DENVER, Col., July 24.—The narrow gauge cast-bound express from Salida Col., on the Denver and Rio Gande Col., on the Denyer and the Grade Railroad, collided with the broad gauge Salt Lake express going west, a few miles from Carlisle, early this morning. The trains were running at full speed and were heavily loaded. The engine and front coaches of both trains were fields of the West. This college will train men so that it will not be necessary to send to Yankeedom for me-chanics, and so that they may know how to strengthen our worn out lands. How is all this to be done? By practical completely wrecked and four persons were killed. The killed are: George A. Ardell, engineer; A. H. Parros, con-ductor; C. M. Cole, express messenger, demonstration; first, it is to be demon-strated to the students and the people of the state that it is practicable to raise supplies at home, and do it more cheap-ly than the same could be bought. MACHENERY

Exhibited side by side with its leading competitors at the State Fair, 1890.

The Superintendent and Committee of the Mechanical Department, in inspecting those features not included in the Fremium List, deem worthy of special mention the Sallor Seed Cotton Elevator, Distributor and Cleaner exhibited by W. II. Gibbes, Jr., & Co. Jr., & Co.

The system operates most efficiently, and much improves the sample, facilitates the glinning of wet cotton, and saves largely in labor and cost of handling.

The Committee recommend to the farmers of the State an investigation into the merits of these devices.
