Record of Nine Years Shows Splendid Progress--Session Opens

Next Monday.

Mountville Sept. 14.—The Mountville school will begin its next session next Monday, 21 inst. The teachers are W. P. Culbertson, Misses Marie Stokes, Frankie Culbertson, and Mary E. Martin. That the people of Mountville are interested in their school is shown by the improvements they fare making from year to year. We have known this people and school for nine years. Nine years are they had one teacher. Nine years ago they had one teacher and one school room. The school house and one school room. The school house was standing on a two acre lot neither of which was owned by the district. During these years this property has been purchased and improved and today we have a four room building, four teachers, two nice little libraries of over two hundred volumes, well, organ and other equipments. A High School has been established under a recent act which, in the efficiency of the work done last session, stood second among similar schools in the county. Hardly a year passes but that the people make some improvement or advancement in their school. But the improvements must continue because the equipment is bo no means what it sould be and there is still ample room for advancement along other lines. But unless the people prove themselves otherwise than people prove themselves otherwise than what they have been the good work will be kept up. It is expected that the work accomplished during next ses-sion will, in point of efficiency and thoroughness, exceed that of any pre-
