**His Sign Said So.**  
One evening at 7 o'clock a man with a wife and 11 children, many of them grown up, appeared at the entrance to an entertainment hall, bought two tickets and demanded that the entire family should be admitted. The doorkeeper declined to admit the family with two tickets only.  
"But all these are my children," said the man.  
"Of course," said the doorkeeper; "but some of them are too old to be admitted free."  
"Too old? What's that to do with it? Don't it say on your bills that children under 12 are admitted free with parents?"  
"Yes."  
"Well, I've only got 11 children, and if 11 children aren't under 12 I'm beat."—Everybody's Weekly.

**Wall Colors and Light.**  
In painting or papering the walls of a room the question often arises what color reflects the most and what the least light? Recent experiments in Germany gave the following results: Dark blue reflects 6 1/2 per cent. of the light falling upon it; dark green, about 10 per cent.; pale red, a little more than 10 per cent.; dark yellow, 20 per cent.; pale blue, 30 per cent.; pale yellow, 40 per cent.; pale green, 46 1/2 per cent.; pale orange, nearly 55 per cent.; pale white, 70 per cent. Glossiness and varnish increase the amount of light reflected.—Harper's Weekly.
