 Microbes That Eat Rubber.
 If your automobile tires or your rub- ber boots don't wear so well as they should it may be because microbes are eating them. When perfectly dry commercial rubber is not capable of furnishing nutriment to any form of microbe, but when sufficiently moist it is frequently attacked by certain bacteria or molds which feed on the albuminoids, resins and sugars it con- tains. The red, yellow, brown and black spots which often appear on rub- ber are due to the presence of mi- crobe. At least two varieties of mi- crobe are able to assimilate the hy- drocarbon of rubber and by so doing destroy its value.

Of Interest and Impor- tance to all Women

Timely Knowledge on a Subject Which Most Women Happily Anticipate

Among the helpful influences for the expectant mother is a splendid external application known as "Mother's Friend." It enables her to go through the ordeal in comparative comfort. She applies it her- self. Her own hand guided by her own mind is her only attendant. She uses it just where required. It is deeply penet- rating in its influence, gently lubricates the cords, ligaments and muscles to assist in a perfectly natural and gradual expansion. It gives no sensation beyond a feeling of relief, a sense of security and a conscious knowledge of physical rest and comfort. In the best homes throughout the coun- try and in the best drug stores everywhere, "Mother's Friend" for half a century has been the standard.
 Many a grandmother today is recom- mending this splendid help to her daughter just as did her mother before her. Phone or send to the nearest druggist for a bot- tle of "Mother's Friend." It is perfectly safe, absolutely harmless and wonderfully effective. And then write to Bradford Reg- istrator Co., 535 Lamar Bldg., Atlanta, Ga., for a highly instructive book particularly timely and interesting to all mothers or ex- pectant mothers. It is mailed free. Write today. Don't fail to send for this book
