

**Got Something
You
Want to Sell?**

Most people have a piece of furniture, a farm implement, or something else which they have discarded and which they no longer want.

These things are put in the attic, or stored away in the barn, or left lying about, getting of less and less value each year.

**WHY NOT
SELL THEM?**

Somebody wants those very things which have become of no use to you. Why not try to find that somebody by putting a want advertisement in THIS NEWSPAPER?

**DR. KING'S
NEW
DISCOVERY
FOR
COUGHS
AND
COLDS**

Romp and playing in the snow is every healthy boy's birthright, but he's apt to neglect precautions against dampness. A cold results—then Dr. King's New Discovery proves its worth. A few doses loosen the phlegm, relieve the tight chest, the healing balsams soothe the throat raw from coughing, and the mildly laxative qualities expel the cold germs and the child is healthy and happy again. All druggists. Try it.

**THINGS TO REMEMBER IN
CONSTRUCTION OF SILO**

The walls must be airtight. The walls must be smooth inside. The best type of silo is round. The roof should be waterproof. The materials out of which the silo is built should be strong enough to withstand great pressure. The cost should be from \$2 to \$5 per ton capacity if the total capacity is to exceed 100 tons. A silo should be placed as near as possible to the place where the silage is to be fed. One hundred tons of silage will feed 25 head of stock for 200 days. A silo 14 feet in diameter and 35 feet high will hold 100 tons of silage. Any kind of good silo is a valuable piece of property on the farm where live stock is to be fed.

TREATING WOUNDS OF STOCK

Disinfectant of Some Kind Should Be Handy in Every Barn—Potassium Permanganate Is Good.

There should be in every barn a quantity of disinfectant that may be readily mixed with water and used in the cases of wounds sustained by any of the stock. Potassium permanganate is excellent, and can be purchased at any drug store in powder form and used in water in amounts such as will color the water a light red. It has the advantage over many antiseptics of not irritating a wound. But any of the commercial antiseptics will keep a wound free from infection if used early, and the formation of large running sores will thus be prevented. A scratch or wound small as it may be at first may quickly become infected and then it will not heal until the infection has been freed from the germs that are causing the trouble. But if treatment is begun at once the trouble can usually be prevented by bathing two or three times a day with an antiseptic solution which will keep the wound clean so that it will rapidly heal. The best home treatment of old sores is to bathe them two or three times a day with hydrogen peroxide and syringe them out with warm water followed by a small quantity of the same antiseptic.

BUILD THE FENCE PROPERLY

Absolutely Necessary to Construct It Well in Order to Secure Maximum Amount of Service.

To get the maximum of service out of a fence it is absolutely necessary that it should be well built. The corner posts must be placed solidly in the ground in such a manner that they cannot be heaved by frost or drawn loose by the pull of the fence. The fabric should be strung tightly to the end posts, but it ought not to be tightly stapled to the line posts. It should be fastened to line posts in such manner that the wires may move in a horizontal direction to take care of the contraction and expansion due to changes in temperature, and to distribute the force of a blow along the fence line so that the strain will not come entirely on any one or two posts or any one point of the wire. A barbed wire should be placed a short distance above the top of the woven wire to prevent cattle and horses from crowding it down when reaching over or rubbing against the fence.

NOVEL BUG-SWATTING DEVICE

Pump Attached to Cultivator Throws Liquid or Powder Onto Plants, Killing Insects.

Keep swatting the bugs if your profits are to be all that seed, soil and attention should combine to make them on your farm. Two Texas men have recently patented the bug-swatting attachment for cultivators shown

IMPROVEMENT OF THE SOILS

Lime and Phosphorus Play Important Part in Operation of Vegetable Garden as Elsewhere.

Vegetable growers should be just as much interested in economic soil improvement as any other class of farmers. They should realize that lime and phosphorus play just as important a part in their operations as they do in the production of general farm crops. This is especially true wherever the less productive soils are found.

PROFIT IN SHETLANDS

Increasing Demand for Sturdy Little Fellows.

Smallest Animals Bring Best Price, Consequently No Effort Should Be Made to Increase Size—Take Care of Themselves.

There is noticeable an increasing demand for Shetland ponies and the raising of the little fellows proves exceedingly profitable. The smallest animals bring the best prices, consequently no effort should be made to increase the size of the breed; the animals should not be too tenderly cared for, should not be housed too tight or fed very

Splendid Saddle Pony.

heartily. Only a trifling amount of grain is favored for them, and shredded fodder is advised.

Shetland mares are remarkably prolific, are bred regularly every year. The colts are naturally hardy, the ponies are seldom sickly. They are ready for any ordinary work at two and a half years.

C. A. Waugh, writing in Country Life, says: "Mature Shetlands sell all the way from \$75 upward, with the bulk of the animals going at \$125. At the latter figure there is a clear profit of \$90 in the transaction for the breeder. Besides, if he produces his own feed, he has received full market value for it, and at the same time has fed it out at a cost much less than that of delivering to the local market. In addition the feed has produced the same proportionate amount of manure that it would produce were it fed to any other animal on the farm."

In winter only a rough shelter is needed for the sturdy creature. The Shetland has a heavier coat of hair than any other domesticated animal;

Handy Team Around Farm.

at least ten months out of the twelve he can run out, and "the stormiest weather will find him with his back to the storm, digging in the snow." He practically takes care of himself.

In looking over the list of members of the American Shetland Pony club it is of interest to observe how many women are enrolled, and that a number of the pony farms represented are owned and managed by women.

TIME FOR CUTTING TIMOTHY

Most Palatable and Nutritious if Harvested Just Before Ripe, Says Missouri Station.

Timothy hay to make the most palatable and most nutritious feed should be cut before ripe. Investigations made at the Missouri experiment station showed that timothy cut during the period from blossoming time to the shedding of the bloom was preferred by cattle to riper hay and that they received more nutrition from it. It is usually the custom to harvest the timothy crop when it is nearly or quite ripe, but the above mentioned investigation would go to prove that earlier harvesting would be more advantageous.

TEACHING THE COLT TO EAT

Young Animal Should Be Encouraged to Nibble at Crushed Oats and Bran in Equal Parts.

Encourage the colt to eat early, preferably feeding crushed oats and bran in equal parts. Let him have alfalfa and clover hay as soon as he will eat it.

Experience shows that a ration of corn and alfalfa gives better results than a ration of corn and timothy or prairie hay.

OBTAIN BEST MILK RESULTS

Cow Should Not Be Milked Hurriedly at One Time and Then Quite Slowly at Another.

To obtain the best results the cows should not be milked hurriedly one time and then quite slowly at another. Neither should milking be stopped every few minutes. After the flow is started the milking should be steady until finished.

It Always Helps

says Mrs. Sylvania Woods, of Clifton Mills, Ky., in writing of her experience with Cardui, the woman's tonic. She says further: "Before I began to use Cardui, my back and head would hurt so bad, I thought the pain would kill me. I was hardly able to do any of my housework. After taking three bottles of Cardui, I began to feel like a new woman. I soon gained 35 pounds, and now, I do all my housework, as well as run a big water mill. I wish every suffering woman would give

GARDUI

The Woman's Tonic

a trial. I still use Cardui when I feel a little bad, and it always does me good." Headache, backache, side ache, nervousness, tired, worn-out feelings, etc., are sure signs of womanly trouble. Signs that you need Cardui, the woman's tonic. You cannot make a mistake in trying Cardui for your trouble. It has been helping weak, ailing women for more than fifty years.

**NOTICE
of the
COUNTY TREASURER**

The Books of the County Treasurer will be opened for the collection of State, County and Commutation Road Taxes for fiscal year, 1915, at the Treasurer's office from October 16th to December 31st, 1916. After December 31st one per cent will be added. After January 31st, two per cent will be added, and after February 28th, seven per cent will be added till the 15th day of March, 1917, when the books will be closed.

All persons owning property in more than one Township are requested to call for receipts in each of the several Townships in which the property is located. This is important, as additional cost and penalty may be attached.

All able-bodied male citizens between the ages of 21 and 60 years of age are liable to pay a poll tax of \$1.00 except old soldiers, who are exempt at 50 years of age. Commutation Road Tax \$1.50 in lieu of road duty.

The Tax Levy is as follows:

For State purposes	1.6 1/2 mills
For Constitutional School Tax	3 mills
For County Purposes	.9 mills
Total	5.5 1/2 mills

Prompt attention will be given those who wish to pay their Taxes through the mail by check, money order, etc.

Persons sending in lists of names to be taken off are requested to send them early, and give the Township of each, as the Treasurer is very busy during the month of December.

ROSS D. YOUNG,
County Treasurer.
