Breathe Hyomei for Two Minutes and Stuffed Up Head will Get Relief. If you want to get relief from catarrh cold in the head or from an irritating cough in the shortest time breathe Hyomei. It will clean out your head in two minutes and allow you to breathe freely. Hyomei will end a cold in one day, it will relieve you of disgusting snuffles, hawking, spitting and offensive breath in a week. Hyomei is made chiefly from a soothing, healing, germ killing antiseptic, that comes from the eucalyptus forests of inland Australia where catarrh, asthma and consumption were never known to exist. Hyomei is pleasant and easy to breathe. Just pour a few drops into the hard rubber inhaler, use as directed and relief is almost certain. A complete Hyomei outfit, including inhaler and one bottle of Hyomei costs but little at druggists everywhere and at Laurens Drug Co. If you already own an inhaler you can get an extra bottle of Hyomei at druggists.

**WOMEN WILL REPLACE MEN IN MANY JOBS**

More Man Power is Needed and Women Can Take Their Places. Work Will be Started. Washington, Sept. 23.—Machinery designed to force out non essential employment and muster women of the nation to take their places was put in motion today by 1,000 community labor boards reaching into every section of the country. The boards are acting under detailed instructions from the government working through the United States Employment Service. Each board will soon publish lists of industries in its locality in which men should be replaced by women. The lists will be based on surveys of all industrial plants in each board's district. The surveys will be minute. Each job will be studied to determine whether a woman could fill it.

Publication of the lists is expected to cause employers to comply and substitute women as a result of the normal pressure thus exerted. Where moral pressure fails, stronger measures may be undertaken. The employment service, working through the war industries board has power to shut off the supply of raw materials from any plant.

This move is a result of the enlarged army program under which 1,000,000 men will be sent to France by next June.

It is expected to weed out of non-essential employment every man in the nation. The corollary is the probable induction of hundreds of thousands of women not only into non-essential war industries but into munition factories as well.

Officials say the number of women may run into millions.

The women are imperatively needed to insure an adequate supply of material and munitions to the fighting men in France. Because of the nation-wide labor shortage, the munition program faces serious delay.

This is made plain in the instructions to local boards sent out by the employment service.

"To the extent that we fall behind in the supply of material we shall have to make up the deficit from the living bodies of our young men," reads the instructions. "This is not rhetoric. It is precise, cold military calculations."

"As soon as the facts are realized, Americans are going to cease carrying on business as usual and swarm into war work."

The use of the term "non-essential employment" in the instructions to community boards has a special significance. Although a man is working in a munition factory and even is making shells he still may be classified as a "non-essential worker." This will occur when the community boards survey shows that the man's job can and should be filled by a woman.

The program then, really means the women of the nation are to be mustered to help turn out the shells with which our soldiers will blast their path toward Berlin.

In making the surveys the boards will lay emphasis on the jobs and not on the industry as a whole.

The employment service which now has a corner on all employment in the United States will assume responsibility for listing and filling with women the jobs which its community boards must on.

Every precaution will be taken to guard the health and safety of the women workers.

Two women members will be added to the personnel of each community board. Boards are composed of representatives of both employers and employees.

**ACT QUICKLY.**

Do the right thing at the right time. Act quickly in time of danger. In time of kidney danger, Doan's Kidney Pills are most effective. Plenty of Laurens evidence of their worth.

Mrs. C. A. Wier, 25 Mill St., Laurens, says: "I had kidney trouble two years ago brought on by hard work and too much lifting. I had a dull, bearing-down backache and a tired, worn-out feeling. Dizzy spells added to my misery and everything got black before my eyes. When I bent over it was almost impossible for me to straighten and I was nervous and had severe headaches. Mornings I was lame and sore and my ankles swelled terribly. My kidneys were weak and didn't act right and I was in pretty bad shape. I began taking Doan's Kidney Pills and when I had taken half a box I felt like a different person. Continued use entirely cured me."
