CO. D HELD TIGHT.

.

A soldier who attracted much attention from the cheering crowds was Capt. Arthur Lee of Laurens. Governor Cooper, who is a citizen of Laurens, has received information from sources outside of the One Hundred and Eighteenth Infantry that Captain Lee and his company for near ly 24 hours held with their flank exposed to a murderous fire, the left of the line of the Thirtieth Division, waiting for the Twenty-seventh Division to come up. This company faced a position on the Hindenburg line that the British and Australians had found most difficult. Captain Lee and his men took their objective and waited for the Twenty-seventh Division to come up. The machine gun fire of the Jerries was too hot and the South Carolina boys held the line with their flank unprotected for many hours. Captain Lee is one of the smallest men in the army of his rank, but it doesn't always require size to make a fighter. -The State.

I HEAT by Nature's own method-circulation. Sending up great volumes of moist, balmy warmth, I draw in through the outer section of my register the cool air my heat displaces. This is re-heated, purified by my fire and sent forth again to add to your comfort.

I SAFEGUARD the health of your family. Just as running water purifies itself, so my method of circulating heat means pure warm air to breathe.

I SAVE you money by heating your whole house with no more fuel than you need for heating two or three rooms with stoves. Thousands of my friends say I save one-third to one-half. I burn coal, coke, wood, lignite
