

NEAR RIOT CAUSED BY DEMONSTRATION

Celebration in New York Is Broken Up by an Anti-British Demonstration. Voice of Gompers Is Drowned in Uproar.

New York, Sept. 29.—Police were called to Carnegie Hall tonight to eject a crowd of men and women who forced their way into the building during the tercentenary celebration of the landing of the Pilgrims.

The intruders, carrying banners with anti-British inscriptions, created great disorder with shouts of "Hurrah for America! Down with England!"

The disturbance reached such proportions that it was impossible for the speakers to continue and it was decided to adjourn the meeting without further attempt to complete the new program.

A group of women who said they were members of an organization known as "The American Women Pickets for the Enforcement of America's War Alms," led the intruders. Some of the banners they carried bore the names of British delegates to the tercentenary celebration and characterized the delegates as "British spies."

The disturbance started when the British anthem "God Save the King" was reached on the program. Several boys and girls in a chorus of the musical program left the stage, saying they would not sing the number and that they did not know it was on the program.

Two men, wearing United States army uniforms and carrying the American flag, also left the stage. Leave Stage

When the piano and organ that accompanied the chorus broke into the strains of the British anthem, shouts arose in various parts of the hall. The instruments continued, however, and part of the chorus and audience started singing the words of "America." At the same time many of the chorus left the stage.

When the music stopped, Samuel Gompers, president of the American Federation of Labor, tried to speak, but his voice was drowned in the uproar and he gave up the attempt. The meeting was then called off. Immediately after, several of the women went to Mr. Gompers and apologized for interrupting his speech. They said the demonstration was not directed at him. Mr. Gompers made no reply.

Secretary of State Bainbridge Colby was scheduled to speak, but he had not arrived when the disturbance began.

Mrs. Gertrude Corliss, president of "The American Pickets," declared after the meeting broke up that "this organization knows there is a plot to make the United States a part of the British empire and that this subversive institution is a party to it."

Notice of Application for Charter.

Notice is hereby given that the undersigned intend to file with the Hon. W. Banks Dove, Secretary of the State of South Carolina, a declaration for a charter for The Farmers Co-operative Cotton Grader Company which proposed corporation is to have its principal place of business at Greenville, S. C., and the general nature of the business which it proposes to do is that of manufacturing and selling a cotton grader, with all the rights, powers and privileges of business corporations generally. The capital stock of the proposed corporation is to be \$50,000.00 divided into 5,000 shares of the par value of Ten Dollars per share.

Notice is hereby given that a meeting of the subscribers to the capital stock of said proposed corporation will be held at the office of Richey & Richey, Laurens, S. C., on October 11, 1920, at 10 o'clock a. m. for the purpose of completing the organization of said corporation by the election of directors and officers, and for the transaction of such other business as may regularly come before said subscribers.

MAKE FERTILIZER BY NEW PROCESS

Southern and Western Men Organize Company to Commercialize New Discovery. May Revolutionize the Fertilizer Industry.

Emporia, Va., Sept. 30.—Southern and western business men organized a company here today for the purpose of manufacturing fertilizer by a new process which they believe will revolutionize the fertilizer industry and make this country forever independent of the German potash monopoly.

North Carolina feldspar, analyzing twelve per cent potash, will be used as the source of potash and Tennessee phosphate rock will be used as the source of phosphate. A deposit of feldspar in Warren county, North Carolina, estimated to contain not less than nine million tons, and 150 acres of phosphate and in Tennessee, estimated to contain approximately nine hundred thousand tons of brown phosphate rock are under option and will be purchased.

The new process is the discovery of A. L. Kreiss, a California engineer and chemist, who was instrumental in establishing the potash industry in Nebraska during the war. The process is the result of efforts upon the part of Mr. Kreiss and his associates to have the Nebraska industry established after the armistice was signed.

The process consists of having ground feldspar, phosphate rock and a soda flux together, the fusing making available for plant growth the potash in the feldspar and the phosphate in the phosphate rock. By their feldspar requires a terrific heat for fusing and phosphate rock almost as much. Properly crushed and mixed with soda a temperature of only a hundred and fifty degrees is necessary, the lower temperature making the process commercially feasible. Using the raw material which it contains, the new company will produce as its primary product potassium phosphate and 6 per cent potash, only a nitrogen carrier being necessary to make a complete fertilizer.

The process is declared to be much cheaper than the old process and the product has an alkali instead of an acid reaction.

The new company is known as the Emporia Potassium Phosphate Company and its officers are as follows:

President A. L. Kreiss, Merriam, Neb.; vice president R. F. Graves, Raleigh, N. C. and Southhill, Va.; Secretary A. F. Dodd, Emporia, Va.; treasurer G. L. Vincent, Emporia, Va. The company will begin business with a capital of two hundred and fifty thousand dollars, a site with buildings having already been purchased. Stock holders are numbered from several southern and western states.

GOLD MINE UNDER GOTHAM'S STREETS

Construction Engineer, While Excavating Discovers Stuff He Believes is Gold.

New York, Sept. 29.—A construction engineer who is old enough to know his way about noticed as he emerged from an excavation at 43 Broad Street that a lot of blue clay mixed with sand had stuck to his shoes. And as he scraped what did his startled eyes behold? Specks of metal shining in the dirt—yellow specks.

The engineer got the top of a tin can and dumped the scraping into it. Then he went over to the pump that sucks the seepage of the excavation where piles are being driven for the foundation of the Combustion Engineering Building. He half filled his improvised pan with water and began rocking it.

He cradled it back and forth, sloshing out the water and the lighter materials in the pan until only the bigger grains of sand and the yellow specks were left. Separating the sand and specks with his knife blade, he had half a dozen yellow flakes each a little larger than the head of a pin. After which he experimented further with the knife and his fingers, and repaired to the offices of the Combustion Engineering Building, Inc., at 11 Broadway, and to the inner office of R. C. Beadle, vice president and general manager.

"Bob," he said "we are now miners. I have staked out a claim in the great city."

"Gosh," said Mr. Beadle "what have you found now?"

"Gold."

"Fine? Where?"

"Broad Street."

"Very good place for it."

The engineer explained that he had discovered gold in the cellar of the corporation's new building.

"Splendid," remarked the enthusiastic Mr. Beadle. "The curb market is right the other side of our fence. The brokers can take their customers into the cellar, show them the gold and then sell them stock on the spot. New idea; never been done before. Phil. The Sub-Treasury up the street will also be interested. With the whole world crying for gold think what it means to find an inexhaustible supply right under the financial district, in

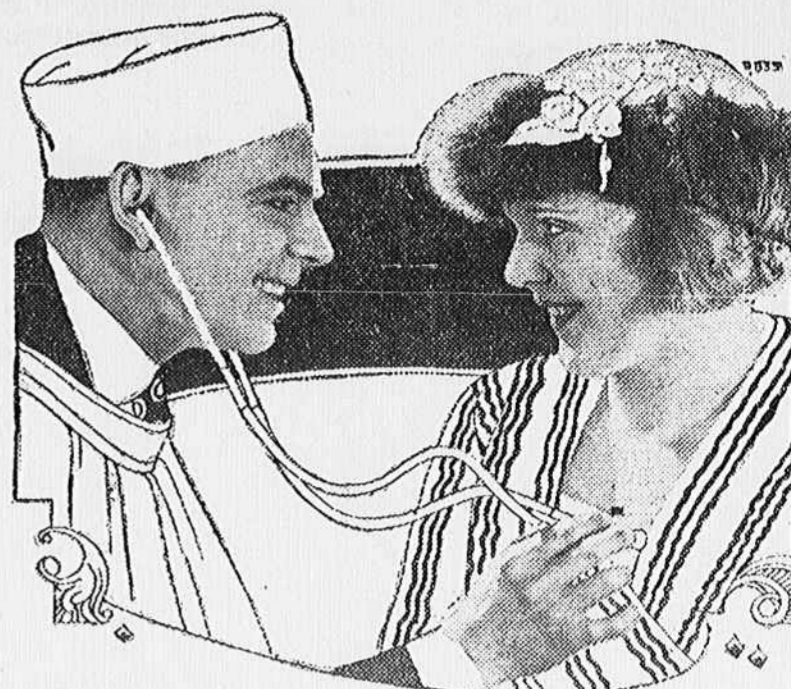

the very shadow of the stock exchange in a place where carting the stuff to the Assay office will cost practically nothing."

No "Fool's Gold"

The friends shook hands. "How do you know it's gold?" Mr. Beadle inquired when minor phases of the discovery had been exhausted. The engineer explained. He had tested it with both knife and finger. Mica was hard. If this had been yellow mica it would have flipped away like a tid-dly-wink under the pressure of the knife blade. It had not. It had merely carried "y." It was soft. It was pure gold.

Mr. Beadle suggested iron pyrites—fool's gold. The engineer shook his head. He did not pretend to be a geologist, although some acquaintance with the science of the constitution of the earth had been along his route through "Sheff" and M. I. T. But if memory was not at fault, fool's gold was also hard and would also have jumped, not bent under the knife.

Princess Theatre Thursday and Friday

Harvest time for CORNS

Any time is harvest time for "Gets-It," the great corn and callus reaper. Takes them right off any toe or foot, easily, quickly, painlessly.

Sold everywhere.

"Gets-It"
The National Corn Remover

FOR YOUR BLOOD

To be healthy and strong, you must have a certain amount of iron in your blood. When your blood lacks iron, nothing can take its place—and you are bound to suffer for iron until you get it. Pale, weak, nervous people, who suffer from headaches, indigestion, rheumatic pains, lack of appetite, and who feel tired, worn-out and depressed, probably need iron in their blood and should take

ZIRON

The Scientific Iron Tonic

Mr. A. R. Erwin writes from Ocella, Ga.: "I am a man of 65; have taken very little medicine of any kind. Two years ago I got a pain in my back, pains in the muscles of my arm and leg; no appetite, very weak, languid, depressed, no energy, nervous and irritable . . . I took three bottles of Ziron, and got all right."

Get a bottle of Ziron Iron Tonic Tablets, today. If the first bottle taken fails to benefit you, your money will be refunded, for all good druggists sell Ziron on a money-back guarantee.

EVER BILIOUS?

Charleston, Miss.—Mrs. R. V. Heins, of this place, says: "I have never had to use very much medicine, because if I felt headache, dizziness, or colds, bad taste in the mouth, which comes from torpid liver, I would take a dose or more of Black-Draught, and it would straighten me out and make me feel as good as new. We have used in our family for years

THE FORD'S

BLACK-DRAUGHT

and it certainly is the best liver medicine I ever saw. It has not only saved me money, it has helped keep my system in shape, and has never weakened me as so many physics do. I recommend it to my friends and am glad to do so." Black-Draught is the old, reliable liver medicine which you have doubtless heard much about. When you feel badly all over, stomach not right, bad taste in your mouth, bilious, or have a headache, try Theford's Black-Draught. At all Druggists.

Always Insist on the Genuine!
