For Sale SULPHATE OF LIME (Land Plaster)

Greaves and Carter (Journal of Agriculture Research, Vol. 16 No. 1, p. 123) say of gypsum: "Calcium sulphate is the most powerful stimulant known. This is not due to a direct nutritive value but to the liberation of plant food. The main influence is upon the bacterial activities of the soil, especially the ammonifying and nitrifying organisms of the soil. In this manner the available nitrogen in the soil is increased. Furthermore, the metabolic processes of the bacteria there are formed acids and other compounds which act as solvents for the potassium and phosphorus of the soil."
