Calomel Good but Next Dose may Salivate
 It is Mercury, Quicksilver, Shocks Liver and Your Bones
 Calomel salivation swells the tongue, loosens the teeth and starts rheumatism. There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tonic—a perfect substitute for calomel. It is a pleasant vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.
 Calomel is a dangerous drug, besides it may make you feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tonic instead and you will wake up feeling great. No salts necessary. Your druggist says if you don't find Dodson's Liver Tonic acts better than treacherous calomel your money is waiting for you.

DENIES COUNTERFEITS
FLOOD NATION
 Asks "Plate Printer" To Furnish Evidence Upon which Its Statements Were Based.
 Washington, April 17.—Secretary Mellon today called upon the Plate Printer, official organ of the Plate Printers' Union employees at the bureau of engraving and printing to furnish him immediately with any evidence which that publication had based its statements that the country was flooded with millions of counterfeit bank notes, bonds, war savings and other stamps, war bonds and coupons. Any such evidence, he added, would be investigated at once. The Plate Printer recently published an article connecting what it declared was a flood of counterfeits with the recent reorganization of the bureau by President Harding involving the removal of Director James L. Wilmoth and other officials.
 In a letter to Frank J. Coleman, editor and business manager of the Plate Printer, Mr. Mellon said that "statements of this sort, reflecting as they do upon the government bonds in the hands of investors, are calculated to cause widespread uneasiness upon the part of such holders, and at the same time if uncontradicted might tend to injure the credit and standing with the public of the securities of the government."
 Mr. Mellon added it has been the custom of the treasury to send out circulars describing every counterfeit issue when discovered.
 "No information has come to the treasury," he said, "of any over issue of counterfeiting of United States bonds or coupons attached to the same."
 "As regards war savings and other stamps, bank notes and other forms of currency, attempts are made from time to time to counterfeit the issue or raise the denominations of genuine issues. The treasury is constantly on the alert to stop such attempts. In substantially every case where efforts have been made on any considerable scale the guilty parties have been apprehended and brought to trial and their activities ended."
 "The secretary of the treasury desires to state in the most emphatic terms that the public need have no apprehension as to the genuineness of the government securities and currency outstanding."

ATTRACTION AND IMPRESSIVE PROGRAM
Rendered Easter Morning.
 The services opened with an Easter talk and Bible reading by the president of the league, Miss Eva Shell. Special music was given by the choir—"Lo, He Comes!"
 Four little children, Robert Wells, Mavis Clear Curry, John Alvin Curry and Lois Abercrombie gave an Easter prayer in song that touched all hearts.
 The ten Virgins was given very effectively by ten beautiful young girls about fourteen years of age. These held their lamps in their hands and sang as the organ played softly.
 Mr. John Wells gave an Easter reading, "If a man die shall he live again." "Peter and the Angels," a story of a boy's faith, was read by Mrs. Watson.
 "The three Marys at the tomb," was given by Miss Margie Ropp, Mrs. Pace and Mrs. Alvin Curry. Their Easter costumes, the urns containing spices, their beautiful pantomimes, solemn words, dim lights and sweet music made this a most impressive number

MEDAL CONTEST AT GRAY COURT
 Young Ladies Contest for Medals Offered by Temperance Society.
 On Friday evening at the Gray Court-Owings school house a large crowd assembled to hear six young ladies contest for two medals offered by the Woman's Christian Temperance Union, through Mrs. Festus Curry, superintendent of medal contest for the local union.
 The rostrum had been very beautifully decorated by the teachers. The color scheme was red, white and blue and a large white bow just above the heads of the girls also a small white bow in each girl's hair represented the great army of white ribboners who fight the liquor traffic.
 The teachers and some of the pupils gave beautiful music and Mr. Bryson, one of the high school boys, read the program.
 Temperance and patriotism were the themes of the recitations given so well by the young ladies and each one did so well that one of the judges afterwards declared that each one should have a medal. It will not be known until commencement as to who got the medals. The following young ladies spoke: Misses Margaret Rogers, Foy Owings, Doree Bryson, Evelyn Owings, Kathleen Moore, Louise Curry.
 Twelve young ladies had been in the contest. A preliminary contest was held cutting the number down, hence the two medals given.

No Worms in a Healthy Child
 All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks, will enrich the blood, improve the digestion, and act as a general strengthening Tonic to the whole system. Nature will then throw off or dispart the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

SPECIAL EASTER SERVICE
AT GRAY COURT M. E. CHURCH
 of the program and as they slowly wended their way from the tomb all felt that we had indeed had a peep at that sacred ground where the Marys walked so long ago.
 Much credit is due Miss Geter, one of the Gray Court-Owings school teachers, as she worked up the program.

Travel of Light and Sound.
 Sound is said to move at the rate of 30 miles a minute, and, compared to light, it is slower than a snail. If we should hear a clap of thunder half a minute after a flash of lightning, we could calculate that the discharge of electricity was about six and a half miles away.
Graphite.
 Down to 1850 graphite was obtained chiefly from the Borrowdale mine in Cumberland, England. Since then a supply has been drawn from eastern Siberia; from Ticonderoga, New York state; Buckingham, Quebec; and Bohemia. Graphite is also produced in Ceylon, and Madagascar. Artificial graphite is also being manufactured.
