The Congressional Primary.

The convention which meets in Seneca to-morrow is the offspring of the convention held there on July 7th, to take into consideration the question of nominating a Congress. man for the 3rd Congressional District by the primary plan. The delegates to that convention from Abbeville were instructed by the convention which elected them to supportthe primary plan. This they did, and by their carnest advocacy, with the assistance of the delegates from Oconee and Newberry succeed. ed in passing a resolution fixing a primary election provided the State Convention so amended the constitution of the party as to permit it. The Seneca convention appointed a committee to present the matter to the State Convention. This they did State Convention. This they did and the State convention made the nécessary change. We hear it said that it is possible that the convention which meets to day will proceed to nominate a Congressman. We do not think this can be true. Such a course would stultify us in the face of the Congressional District and of of the Congressional District and of the State. It was we who inaugurated the movement, who carried it through with our friends from Oconee and Newberry against the opposition of the delegates from Anderson and Ptckens.

favor a cause which looks to the re. shapes: pudiation of our own action. We are committed to the primary plan of nomination. We consider that the present convention has but one duty to perform, and that is under the amendment to the constitution of the State adopted by the State convention to fix the time and adopt rules for the government of the primary for the government of the primary election. It is not probable that any election. It is not probable that any one will attempt to gainsay the statement that the large majority of the people of the district are in favor of holding a primary election. If the convention desire then to follow the will of the people by all means let it will of the people by all means let it these bargains should call at once; and also remember that you receive a Waterpopular or however acceptable, will be well received, whose friends bring about a nomination by the present gins. Remember, this is the only reliconvention.

Abbeville, we know that he has no objection whatever, to the primary, and believe his friends will do what they can to have the primary, and carry out the will of the people of the District .- Abbeville Messenger.

Blood and Money.

The blood of man has much to do in shaping his actions during his pilgrimage through this troublesome world, regardless of the amount of present or expectant money in pocket or stored away in bank. It is a conceded fact that we appear as our blood makes us, and the purer the blood, the happier, healthier, prettier and wiser we are; hence the oft repeated interrogatory, "how is your blood?" With pure streams of life-giving fluid coursing through our veins, bounding through our hearts and ploughing through our physical frames, our morals become better, our constitutions stronger, our intellectual faculties more acute and grander, and men, women and children happier, healthier and more

The unprecedented demand, the unparalleled curative powers, and the unmistakable proof from those of unim peachable character and integrity, point with an unerring finger to B. B. B.—Botanic Blood Balm—as far the best, the cheapest, the quickest and the grandest and most powerful blood remedy ever before known to mortal man, in the relief and positive cure of Scrofula, Rheumatism, Skin diseases, all taints of blood poison, Kidney complaints, old ulcers and sores, cancers, catarrh, etc.

B. B. is only about three years old --a baby in age, a giant in power--but no remedy in America can make or ever has made such a wonderful showing in its magical powers in curing and entirely cradicating the above complaints, and gigantic sales in the face of frenzied opposition and would-be money-ed monopolists.

Letters from all points where introduced are pouring in upon us, speaking in its loudest praise. Some say they reeive more benefit from one bottle of B B. than they have from twenty, irty and fifty and even one hundred tles of a boasted decoction of inert non-medicinal roots and branches ommon forest trees. We hold the in black and white, and we also
