J. R. KINARD,

S. B. AULL.

EDITORIAL NOTES.

Well(s) why did you not get a few more?

The primary's over and yet we are not happy.

R. O. D. and "Gulliver" were more successful than Tim and Jack."

If you want to be successful in politics study law and get on the bench; avoid the farm.

Cochran for Congress; Workman, Kinard and Aull for County Commissioners completes the ticket.

Now is a good time to sow fall广告ments, and have your Letter Heads, Note Heads, Circular Tickets and Envelopes printed.

The HERALD AND NEWS and the CHARLESTON WEEKLY NEWS and CLOUTIER Supplement from new until January 1st, 1887, for only fifty cents.

We are experiencing a big rise in the cotton market. Mr. Holmes is on deck. That is what we want above everything else. Let us speak for 200,000 bales this season.

Wallace—We addressed well, well. You keep the ball rolling in the column, and do a good work of work around now and—where I trust—don't you know they are hot about it—but, we are running it now.

Prof. Richard M. Prentiss, Larue, South, McGehee, McGehee, and other third that I am not probable that we will have any further shocks of earthquakes. Some of the geologists were so Prof. Wiggin who has predicted a return of the shock—but we were reminded very recently of Wiggin's predictions on Monday afternoon at 5 o'clock, and he still has two days to make his prediction true.

ELGIN'S GENERAL STORE.

I always advise you to give our patrons important news by wire when we can manage to supply it for them, but we must be enabled enough to say that we are not so exceedingly generous as to have our money and time on those who have no interest in our paper or business except what they can make or get out of the HERALD AND NEWS without cost that there are those who get information in this way we have no doubt and it was to this class that we addressed ourselves, when in our issue of the 15th instant we said that

geographic distances we turned from time to time in the past year. In the persons of the HARRIS & VANCE, and others, render them to me their services in advertising, particularly in parts of our department, and not welcome to them. Prof. Wiggin who has predicted a return of the shock—but we were reminded very recently of Wiggin's predictions on Monday afternoon at 5 o'clock, and he still has two days to make his prediction true.

On reading that the Legislature had called our local cotton market, we have been fêted in for the past two months, began to make the necessary arrangements for the day of the session. Before the day of the session, however, a fullsome paper was printed the following article:

"This is a novel trapsce notice. We give some hint to whom we are going to govern the country, inasmuch as, and we trust them to do so.

We have now received orders from them, unless it were some other newspaper. Our contemporaries, save one, are too much to intimate that they are ignorant.

As to the amount of money spent for telegrams, I

It may have been ten thousand.

It may be spent more than the other papers of the county. We firmly acknowledge, that having no other income than the sale of our paper, publishing a newspaper. The Observer is not taken to much for telegrams, or anything else.

And then it may be not taken account of. This observer has been running nearly four years, and has never been able to pay a telegram as much as the occasion demanded for the occasion is very rare that will justify an expenditure of money for telegrams by a newspaper.

In less than half past four thousand four hundred and ten words during the session of the National Republican convention at Chicago, which we published, for the benefit of every body who would read them, we had no expense whatever, and the same was the case at the National Democratic convention the same year, and made the same disposition of the bulletins. We expected to pay for these, but when we were in the city the next week, there was no charge for various meetings before and since, we have taken and paid for dispatches—whether more than the other papers of the county we do not know or care, for it is of no consequence. But we have never seen any paper's reading our dispatches, whether "paper" or not. All are perfectly welcome to them."

"Gulliver" says first, "This is a novel tree-pass notice. We presume that those

for whom it is intended will govern themselves accordingly, and not 'read' them."

The only thing that our contemporary had to do was to look after its own skirts. We presume that the others can do the same, unless they have delegated "Gulliver" to speak for them.

Second, "We don't see how anybody could 'use' them, unless it were some other newspaper. Our contemporary surely does not mean to intimate that that has been done?" We suppose our contemporary can speak for itself on this score. If it has not, what is that to them?

Third, "As to the amount of money spent for telegrams? It may have spent too much." "It may be able to spend more than the other papers of the county," and that it might be mistaken about it. The occasion is very rare that will justify an expenditure of money for telegrams by a weekly newspaper." Here we find "Gulliver" setting himself up as judge of other people's business. Men have made fortunes, tradition says, by looking after the fences around their own fireside. The Observer then speaks of what it did in 1881, "during the Republican and Democratic National conventions and on various occasions before and since." But says "Gulliver" we have never objected to anybody's routing our dispatches, whether parcels or not, all are perfectly welcome to them. Exceedingly generous! Telegrams furnished free by "Gulliver" is the latest *ad dictum*. Very fine. Give us sixteen hundred words a week to read about 11 o'clock A.M., and let us know whether your liberality extends beyond telegrams, or not, so that we may inform the public who are not your patrons. If the only money you get is out of the newspaper business, your patrons may conclude that if you would confer upon them the benefit to be had telegraphically, from the overplus of your receipts, that you are casting upon the waters, greater appreciation would be shown to those who sustain you. This, however, is a matter between you, and of no concern to us. We only claim the right to speak of and for our own.**A WATERLOGUE.**

We admit that we have met a perfect Waterlog at the Congressional Primary. We advocated the candidacy of Capt. Jas. N. Lipscomb, because we believed him to be the best, purest, ablest and most competent of the four names before the people. The result of the election only strengthened our confidence in the man. He is ready the equal of any man I could find in the South. He will submit a gracefully to the will of the voters of the stand Congressional District as my Deacon. If the State has need of his services no one will resent them, principally as a devotedly religious man, and everything that may attempt to injure his good government or people. We have no need to find with those in the Congressional District our life or in our own county, the backwoods, and they are alone responsible for the use of it. If they have followed the dictates of the judgment and conscience in the matter, and have acted in good faith to the candidates, they have done well. If not they alone will be the sufferers. We still think that it was wrong to vote for a Judge on the bench for our political position, and as of late that we have not had a very large number of people who are responsible for the use of it. If they have followed the dictates of the judgment and conscience in the matter, and have acted in good faith to the candidates, they have done well. If not they alone will be the sufferers. We still think that it was wrong to vote for a Judge on the bench for our political position, and as of late that we have not had a very large number of people who are responsible for the use of it.
