TEACHERS' COLUMN.

The Convention in Columbia. On last Tuesday, in answer to a call from Hon. W. D. Mayfield, State Supt. of Education, a good number of School Commissioners and others interested in common school work met in Columbia. Such a convention has not been called for years, and this move of Mr. Mayfield was certainly in the right direc. tion. Many of the leading educators of several of them are not engaged in agreat interest in it, as good and patriotic men should do.

The first to be discussed was the necessity of having the examinations for teachers certificates' made more thor-The importance of having qualified teachers was carnestly insisted above Alliance is made up of farmers upon, and there is no doubt that the ex- of Lexington County, hence the aminations this year will be more thorough than they have been for years.

were considered.

The question of levying an extra tax .141 under the Act of 1888 was the third subject for consideration. Here again there were too factions. The minority urged that the special tax in county districts would be two small and that it would create too much opposition. The majority were in favor of the tax (Thursday). Polls open at 8 a. m. and and a resolution favoring it in the school districts was passed over the minority. This time the strongest party refused to give way. In our opinion the weaker party were right and it will not take a long time to show it, provided the tax is levied.

The question of holding institutes for the training of teachers during the summer was also discussed. Several of the most important educators in the State took part in this discussion, among whom were, Profs. Joynes, R. Means Davis, Clinkscales, Archer, Morrison and others of not less importance. The training of teachers was urged as a necessity, as it is only through the Institute that they can be trained. One commissioner, we will not mention his name here, opposed the Institute on economic grounds, and insisted that the Association meets the demand. When a resolution was offered, however, favoring the holding of institutes this summer. Yes, the convention in Columbia was a good one, and will do nuch to increase the efficiency of the schools of the State, The Commissioners and Boards of Examiners should do all in his work, for he is certainly in earnest. In many things he is surely right, and may be in all that he has so far advocated.

Newberry has a system of schools that is does credit to the town, and the schools are supported by taxation. The convention seemed to forget one thing, and that is that a country district is not as rich as a town district.

Take Newberry for illustration. Here the assessment of property is over a million dollars. A tax of 2 mills will raise over two thousand dollars. Take a four miles square district in the country, and the assessment, on an average, would be about sixty thousand dollars, not much more than one-twentieth as much as in town. The town district raises over two thousand dollars, while the country district would not raise

This amount would be for two The next thing to consider is: Would the people be willing to help by private subscription after they shall have voted the special tax and found it insufficient? Some schools are paying their teachers \$400 or more, and we see then that private subscription must be

If an extra tax is not sufficient to run the schools and pay the teacher good salaries we had better let it alone. Where it is sufficient we are highly in favor of it. Governor Tillman, in his inaugural address, advised that the right be given to levy as much as 5 mills. When we get the right to do this, then we will be in favor of the certain, and is becoming more so every year. The Herald and News had a talk be on hand and show by our presence that we are alive to the work.

ance. He said in substance, in regard to the position of the Alliance to the third party, that he thought it a matter of doubt as to whether a third party could be formed out of the Alliance without a change in the constitution of the order. He said it seemed that the Western people were more in favor of the third party scheme at present than those of the South. By the action of the National Alliance, a convention was authorized to be called, and had been called to meet in February, 1892. This convention will contain representatives from all the agricultural associations, and he could not say what action that convention would take.

He thought that it was sufficient for Alliancemen to await the action of the Supreme Council which will meet next December at Chicago. His individual opinion of the question was that it was matter of small moment, so far as Alliance success is concerned, whether a third party is formed or not. He thought that the probabilities were that opposition to the Alliance would do more towards the formation of a third party than the Alliance would itself.

Goggans, Lawson The Mosley, Miss Hattie Wi Poter, William Wi Palmer, Tom You Persons calling for the President Keitt spoke in a very en-couraging manner of the Alliance and

perous condition than ever before since its organization. He thought it was growing and would continue to grow. When she was a Child, she cried for Castoria.

Old Jack Frost played the very mischief in these coasts last Saturday and Sunday nights. With malice aforethought and on mischief bent, he boldly ventured right into the lap of Miss Spring, and while cosily resting in her lap, he noiselessly drew his long icy blade, and with two fell swoops, right and left cuts, he slayed the entire peach crop. Now Miss Spring sits and weeps because she granted the old frested "tooger" the privilege of sitting in her lap. Yes, and many more of your sex do the same thing, my dear Spring-weep and weep over their follies when it is too late.

"Grip!" Don't talk about grip. was a little of the sickest man with the grip you ever did see last week, and I am calm and serene yet. I had more grip to the square inch than any other mortal except my larger half. I had the grip in my head, my eyes, my ears, my nose, my mouth, my back, my chest, my arms, my hands, my legs. my feet—all over, from the crown of my cranium to the soles of my pedestals. The grip was so awful strong that it came near crushing all my tender little bones. Oh, horrible taste of the grip! Reader, did you ever taste nasty measles? If so, you have had a foretaste of la grippe. The only palliating arrangement connected with this French animal is that the doctor really did allow me to eat lots of candy. Tal ta! mon ami la grippe.

It seems that the State's Newberry correspondent was about correct on the school district "agitation question." It did truly "agitate," but it seems that the agitation was confined to a select few. However, as a result of the agitation, a paper stating the fact, and asking the School Commissioners to lay off a school district four miles square with the town of Prosperity as the centre; was circulated for signatures. Now I would do nothing to retard the advancement of any educational plans or theories, for I have always been on the line of educational advaucement, but a school district at this place and at this time strikes me as a very unfortunate position for the town alone. If it dealt with the town alone, I would not have a word to say in opposition to the scheme, but would rather huzzah for the young creature. But this school district has to deal with Griffin, Fed Griffin, Scott Waughn, Jas T Vaughn, Jas T Walker, Jerry Wallace, Jeff Wallace, Phil Hai stock, Jno Hailstock, Peter Hailstock, Wile Hair, Drayton Wallace, Spencer Watkins, Jas F Watkins, Jno

speech, containing m

survey will bring into the school district, outside of the incorporation, about thirty-five white and sixty-five colored families. This arrangement will give the negroes a clear majority when it comes to a vote, and they can vote a six mill tax just as easy as a two mill tax. Makes no difference to cuffie, tle more the merrier. The colored people will be compelled to have a larger and a better house nearer the centre than the one they now have. How shall this be done? It takes money to build houses. Where will it come from? Let the tax-payer answer, I mean the taxpayers of the proposed school district. There is no use of trying to disguise the fact, that there will be an extra tax levied to support these schools. There must be a colored as well as white school, and both must run the same length of time. An additional

fact. A school district without a school to send their children probably where they do not desire. These people have good schools and good teachers. Let them alone. It seems to me that we had better build up our own school until it shall have attained to that high position that it once held before it was ruined by internal dissensions. Excelsior Academy, 21 miles outside of town, a very flourishing school, is a monument of our internal dissensions. Let us remedy these things around our own firesides before we say to our neighbors, come, go along with us and

we'll do you good.
