

The Herald and News

Knights of Pythias, Castle Hall, Newberry Lodge No. 75.

STATED CONVENTIONS OF this Lodge will be held the 2nd and 4th Tuesday nights of each month at 7.30. Visiting Knights cordially welcomed. THOS. E. EPTING, K. of R. and S. Crotwell Hotel Building.

Juvenile Ball.

Masters Lewis Crews and Ellie Boney of Spartanburg came down Sunday for the purpose of arranging a game of ball with the Palestine nine of this city. They represent the Spartanburg Junior nine, and hope to pull off two games here about the 11th of June.

A Former Newberrian.

Dr. J. W. Tribble, who lives only twenty-five miles out from Charlotte, met the boys at Charlotte last week and spent a day or two with them. Doc is pleased with his North Carolina home. He inquired particularly about his many friends in Newberry.

Thanks for an Invitation.

We are indebted to Prof. W. S. Peterson, a Newberrian who has the honor of being the successful superintendent of the Lees graded school, for an invitation to attend the commencement exercises of that institution at Lees, S. C., on May 31st and June 1st.

An Honored Guest.

We were delighted to receive a call from Prof. Frank H. Bigelow of the United States Weather Bureau at Washington, who has been in the city during the past few days for the purpose of observing the eclipse of the sun. He had his apparatus stationed at the rear of Dr. Housal's residence, and we hope obtained very satisfactory results.

Meeting County Executive Committee.

There will be a meeting of the County Democratic Executive Committee in the Court House on Saturday, June 2nd, 1900, at 11 o'clock a. m. Business of importance will be transacted, and every member is urged to be present or send a proxy.

A. E. P. Bredenbaugh, County Chairman.

Prosperity, S. C., May 19, 1900.

A Card to the Public.

The visiting astronomers and their friends have desired to express to the people of Newberry their great appreciation of the many kindnesses and valuable aid which they have received from many persons in their preparation for the eclipse observation. They have thoroughly enjoyed their visit and have returned to their homes with the kindest feeling of gratitude to the citizens of Newberry.

F. H. Bigelow.

Off for Louisville.

We have been unable to secure a complete list of all who have gone to Louisville to attend the Confederate reunion, as all did not go together. Sunday Messrs. E. M. Evans, H. H. Evans, L. W. Floyd, C. J. Purcell, A. T. Brown and Nat Gist, left over the S. A. L., and on Monday evening Mr. and Mrs. J. W. White, Dr. and Miss Beattie Gilder, Mr. and Mrs. Jas. Dunbar and Messrs. W. T. Tarrant and M. N. Buford, left over the same line. This morning another party left over the Southern for the same destination.

That Throbbing Headache.

Would quickly leave you, if you used Dr. King's New Life Pills. Thousands of sufferers have proved their matchless merit for Sick and Nervous Head aches. They make pure blood and strong nerves and build up your health. Easy to take. Dry them. Only 25 cents. Money back if not cured. Sold by all Druggists.

Children's Day at Smyrna.

The public is cordially invited to attend Children's Day at Smyrna Presbyterian church, Saturday before the first Sunday in June. The exercises will begin promptly at 10 o'clock a. m., and it is hoped that the crowd will all be here by that time, as the children will be very entertaining. Dinner will be served on the grounds. The candidates are invited.

DEATHS.

Mrs. Sallie Caldwell, wife of Mr. J. W. Caldwell, of Beth Eden section, died at her home on Friday last after a short illness of pneumonia, in the 47th year of her age. She leaves a husband and three children and many relatives and friends to mourn her death. Her remains were buried at Beth Eden cemetery Saturday afternoon at 4 o'clock.

On the College Diamond.

The game of ball between the Johnson Institute and Newberry College played Saturday afternoon resulted in a victory for Newberry by a score of 22 to 4. Another game was played by the same teams yesterday morning resulting in the defeat of the visitors by a score of 19 to 2.

SEATS OF OHIO, CITY OF TOLEDO, 1st LUCA COUNTY.

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, Ohio, and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 9th day of December, A. D. 1899. A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials free. F. J. CHENEY & Co., Toledo, O. Sold by druggists, 75c. Hall's Family Pills are the best.

VARIOUS AND ALL ABOUT.

Did you see—the eclipse?

The smoked glass was in evidence yesterday morning.

Mrs. Moore of Chesterfield is visiting at Mr. T. C. Pool's.

Mr. L. W. Kaminer of Little Mountain is in the city yesterday.

Mr. A. H. Kohn of Columbia was in the city a few hours on Monday.

Mr. J. H. M. Kinard of The Observer spent Saturday and Sunday in Augusta.

Col. George Johnstone went to Greenville yesterday on professional business.

Col. O. L. Schumpert left yesterday for Louisville to attend the Confederate reunion.

Dr. and Mrs. W. S. Harshman of Washington, D. C. are visiting Judge W. W. Hodges.

Mr. J. P. Chase of Spartanburg came down Saturday to see his grandfather, Mr. J. P. Pool.

The eclipse being over, all things else will now give way to the "sweet girl graduates."

Mrs. J. L. Aull, who has been on a visit to her sons in this city, returned to Dyson yesterday.

Miss Sallie Jones, after a pleasant visit to Mrs. E. H. Aull, has returned to her home at Dyson.

The excursion party from Columbia to Little Mountain to witness the total eclipse numbered about 400.

Prof. McKissick, superintendent of the Power Works at Pelzer, spent a few hours in the city yesterday observing the eclipse.

Mr. W. H. Harris is having the old house torn away at the end of Friend street, and will erect a dwelling for himself on the lot at an early date.

Our streets presented a lively appearance yesterday, so many visitors being here to view the strange phenomenon—the total eclipse of the sun.

Miss Mattie Leavell leaves today for Richmond, Va., whither she goes to attend the commencement of her alma mater, the Woman's College of that city.

The Carolina Manufacturing Company closed down yesterday until the noon hour. The operatives enjoyed the peep at the sun through smoked glasses.

Hon. Cole L. Blease spoke at Zarin, on the Abbeville-Anderson line, at the annual picnic Saturday. He spoke on the educational and liquor questions.

Misses Ophelia and Valencia Clinkscales of Anderson County have been on a visit for the past few days to Mrs. J. C. Goggans and other relatives in Newberry.

When the up train on the C. N. & L. passed here yesterday Engineer Land's wife was the throttle, where she presided with the ease and familiarity of an old engineer.

Miss Nannie McCaughrin came down with the party from Spartanburg to witness the eclipse. She is attending Converse College, and returned to her studies yesterday.

Mr. W. B. Aull, who has been attending the Theological Seminary in Charleston, stopped over in Newberry last week and spent a few days with the editor's family.

The early morning train on the ever accommodating Southern Railway yesterday stopped in Newberry long enough to allow the passengers and crew to witness the eclipse.

The lectures at the opera house Saturday night by the government scientists, Prof. F. H. Bigelow and Prof. Cleveland Abbe, were enjoyed by the large audience who was out to hear them.

Dr. McClintock has gone to Louisville to the reunion, and will attend the Young People's Convention there. There will be no services in Thompson street church Sunday on account of his absence.

It seems that some people went to the opera house Saturday night not so much to hear the lecture as to disturb those who did. In the gallery there was a continual moving about and cracking of peanuts.

Mrs. F. A. Schumpert will leave tomorrow for Charlotte, N. C., to attend the commencement exercises of Elizabeth College, where her daughter, Miss Myrtle, will graduate in typewriting, stenography and bookkeeping.

The cotton mill closed down for a few minutes yesterday morning in order to allow the operatives to view the eclipse, and to keep the dense smoke from obscuring the sun from view. It was kind in President McCrary.

Col. W. R. Hunt, soliciting passenger agent of the Southern Railway, accompanied the firemen over to Charlotte last week on their special from Columbia, and looked to their comfort on the trip. He is a whole-souled fellow.

Miss Maggie Williams of Burgan, N. C., a very charming and talented young lady, who has been visiting Miss Mattie Leavell, leaves for her home today, going via Richmond, Va., to attend the commencement of the Woman's College.

On Thursday morning last Senator Mower returned to the city from Dorchester, where he had been attending court, and not from the Prohibition Conference as one of our reporters made it appear in last Friday's paper. We make the correction cheerfully.

Death at Maybinton.

Mr. James H. Kitchens of the Maybinton section died last Wednesday night, after a brief illness. He was a good neighbor and a devoted husband and father. His remains were interred at Ebenezer Thursday. He leaves a wife and two daughters, who have the sympathy of the entire community.

School Picnic at Beth Eden.

The friends and patrons of Beth Eden school enjoyed a most delightful picnic at Chandler's spring on Saturday last. The day was most pleasantly spent by the large crowd that was in attendance and no more ideal spot could have been selected for a picnic than this grove.

AN IMPORTANT MEETING.

The County Democratic Executive Committee to meet Saturday to decide the manner of nominating a Master and Magistrate.

County Chairman Bealbaugh has called a meeting of the County Executive Committee for next Saturday at 11 o'clock.

This will be one of the most important meetings of the campaign, and should be attended by every member, as questions of considerable importance is to be decided at this meeting.

The constitution of the party was so changed by the recent State Convention as to leave it discretionary with the Executive Committee of each county, to decide as to how to elect the Master and Magistrate of the county.

It has been customary in this county for the past several years to have these officers appointed by the Governor, on the recommendation of the representatives of the county.

Some think they should be elected by the primary plan, and to decide this question is what the executive committee is called together for on Saturday, and every member should be present and prepared to vote on the question.

To Telephone Subscribers. Telephone subscribers will please add to their list Newberry bottling works No. 131 and oblige J. W. Floyd.

A big lot of Misses & childrens Tan Sandals going at 18c. & 33c. former price \$1.25 & \$1.00 at Jamiesons.

A big lot of Misses & childrens Tan Sandals going at 18c. & 33c. former price \$1.25 & \$1.00 at Jamiesons.

CHILDREN'S DAY SERVICES.

Beautiful and Appropriate Services by the Children of the Sunday School of Johnstone St. Church.

Children's Day services were held at the Johnstone street Methodist church Sunday evening. The church was most beautifully and tastefully decorated with ivy, ferns, geraniums and roses, and the exercises were appropriate, instructive and entertaining.

Prof. W. H. Wallace, superintendent of the Sunday school, presided, assisted by the pastor of the church, Rev. W. I. Herbert.

The exercises opened with a song by the congregation, "O could I speak the matchless worth."

Prayer by the pastor.

Song—"We are singing on the way." Responsive reading.

The floral alphabet.

Song—"Tis so sweet to trust in Jesus."

The Recessional—Lullie Evans.

Song—"Jesus is calling the children."

Recitation—Dolly Huiett.

Recitation—Ben Mayer Matthews.

Recitation—Lucile Cavannah.

Recitation—Frances Herbert.

Song—"Praises to our King."

The Twentieth Century Movement and our educational work—Questions by the superintendent and responses by the children.

Song—"Sweet peace the gift of God's love."

Reading—Mabel Smith, Annie Laurie Tarrant, Alice West and Pauline Gilder.

Recitation—Lola Lake.

Song—"Eternal source of every joy."

Collection—Flight, Lola Lake and Pauline Gilder; left, Sallie Beny Robinson and Annie Laurie Tarrant.

Song—"Just a little while."

Benediction.

Miss Fannie Nelson, who is on a visit to Rev. W. I. Herbert, did very effective work in the training of the children for this occasion.

A Frightful Blunder.

Will often cause a horrible Burn, Scald, Cut or Bruise. Bucklen's Arnica Salve, the best in the world, will kill the pain and promptly heal it. Cure Old Sores, Fever Sores, Ulcers, Rashes, Felons, Corns, all Skin Eruptions. Best Plaster on earth. Only 25 cts. a box. Cure guaranteed. Sold by all Druggists.

GLENN-LOWERY MANUFACTURING CO.

Whitmire's \$300,000 Cotton Mill—The Charter Has Been Obtained.

Whitmire's mill is now a certainty. The Secretary of State has granted a charter and Whitmire is to have a \$300,000 cotton mill. The new mill is to be called the Glenn-Lowery Manufacturing Company. The incorporators named are Mr. Coleman, of Charlotte, W. G. Childs, W. A. Clark and Robert W. Shand, of Columbia. The capital stock is to be \$300,000, and will be readily secured.

The Eclipse in Newberry.

THE ASTRONOMERS AND THOSE WHO CAME TO NEWBERRY PLEASANT WITH THE RESULT.

The Strange and Pretty Phenomena Witnessed by Eversheds—The Work of the Government Observation Parties in Newberry a Success—Visiting Parties—From Several Towns.—Prof. Bigelow Talks.

Cloudless skies met the eyes of the anxious multitudes yesterday morning as they began to bestir themselves early to make preparations to witness the strange, but beautiful phenomena—a total eclipse of the sun.

It was indeed a beautiful sight, one that will never be witnessed by those of us on this side of the globe again.

Newberry was favored on this occasion, first, by the observation parties from New York and Washington, a number of most pleasant gentlemen and ladies, whom we were glad to have as our guests, then there were quite a number of ladies and gentlemen from Due West, Johnston, Spartanburg, Greenville and other parts throughout the State, the visitors numbering probably 200 in all.

Prof. Bigelow and his party, with whom we talked, were delighted with their visit to Newberry, and felt proud that he had selected this place to make his observation.

Among the prominent visitors to Newberry on this occasion were Prof. and Mrs. F. H. Bigelow, Mr. and Mrs. Roberdeau Buchanan, Prof. Cleveland Abbe, Prof. James Page and Miss Eliza and Jane Wilkes and Miss Lindsay, of Washington; Prof. Garrett P. Serviss, Otis Wetles, Chas. Leimbke and Wallace Goad Levison, of New York; Prof. P. L. Grier, of Due West; Prof. Watson and Dr. Judson, of Greenville; Prof. Evans and others from Spartanburg.

The day was an ideal one, the sun rising on a bright, beautiful, cloudless blue sky, and every one was in waiting with the smoked glass to view the strange sight and get a glimpse of Mercury—the beautiful star which is so near the sun and is so rarely visible.

One of the government observation parties was stationed at the rear of Dr. Housal's residence, near the stadipe, the other near the residence of Mr. W. V. Fair, and still another in the field near Mr. J. J. Lane's residence.

The following facts concerning the eclipse and the work of these parties were kindly furnished us in an interview with Prof. Bigelow:

Temperature at 6.45 a. m. 68 degrees. It fell at 9.15 to 64 degrees, equivalent to a fall of 6 degrees from beginning of, to the middle of totality. Light wind at 8 o'clock, fell to a perfect calm at 8.30. The corona was seen in a most perfect manner and had the usual bright inner corona circle surrounding the disc of the moon and apparently about one-fifth of the radius of the moon. On north and south there were fine isolated polar rays similar to those surrounding the poles of a magnet. To the east and west along the ecliptic there was a broad sheet of bluish white light covered with striae, extending about two diameters, on each side of the moon's disc. The western side was broader than the eastern and spread out like a fish tail—two prominent points. On eastern side the wing tapered off to a cone shaped figure, the point being to the south of the line of the ecliptic. This figure corresponds very closely to the coronas which were observed in 1869, 1878 and 1889, and is characteristic of the corona at the time of the minimum of the sun's spots, that is to say when the sun's activity is the least developed and output of the energy apparently as little as possible. The corona, therefore, extended east and west probably five million miles or six diameters of the sun. It is probable that the strongest rays could be traced one or two million miles more on both sides. The inner corona was very bright, almost dazzling to the eye, and gave exactly the effect produced by the annular eclipse. The contrast between the inner and outer corona in the amount of light was enormous and made the object one which was exceedingly difficult to photograph. The brightness of the corona was such that it seemed to have destroyed the sharp edge of the shadow of the moon which is generally observed in an eclipse, and the effect was that the shadow which is so impressive an object in ordinary eclipses was hardly at all observed by any one at Newberry. The majority of persons reported that they could see no sharp edge to the oncoming shadow but that the darkness gradually increased up to the time of totality, and in fact it was difficult to assign the exact moment when the inner corona first appeared to view. The disappearance was much better defined and the length of the totality was apparently 85 seconds. At the beginning of the totality the shadow bands which usually covered the telescope and are objects very easy to observe were entirely missing so that no observation as to the duration of the bands and of the light spaces respectively could be made, and no determination regarding the velocity of their motion could be

Jamieson's Bargains!

MONEY SAVED IS MONEY MADE!

No Introduction

Is Needed to tell you about Our Store.

Suits.—We call them odds and ends—a trade expression—one that means some sizes of various lines. We cannot fit everybody, but those that we can fit can buy suits running from \$5 to \$16.50 at a discount of over 50% per cent. Just think of that, it means a \$15.00 suit for \$7.50, and a \$10.00 suit for \$5.00, etc. These suits cost us more, but we are bound to sell to provide room for new goods. You get the benefit.

Men's Tan Shoes.—The best buyer sometimes overbuys. Well, we did it in Men's Tan Shoes, and while we bought them away down, by buying a large lot we have more than we can afford to carry, and a \$4.00 shoe goes at \$2.65, a \$4.50 at \$3.50, a \$5.00 at \$3.65. This is our way of unloading; it has two advantages—you get the best goods at the price of inferior ones, and we get the room and your good will, which is, after

something that will make the boy proud, and you proud of him, call around and buy one of these suits, it will be a financial gain and a mental satisfaction.

Oxford Ties.—We have some excellent creations in Ladies' Footwear, and some not so elegant, but good and serviceable. Prices, well just as low as they can be made, and in fact a little lower.

Neckwear Changes. Ties bought in March or April are as much out of place now as winter suits in June; for in no domain does fashion reign more supreme than in neckwear. We pride ourselves in keeping up with his fickle highness fashion even in Neckwear, they are the "right thing"—no suspicion of "cheap work" about them, and if they could talk they'd say "the lassies that made us are as bright and happy as the men who buy us are manly and tasty."

Straw Hats. There is a freshness about our line of Straw Hats which nearly approaches daintiness. We have a hat at 25 cents, not much of a hat, granted, but not much of a price. You can go on up to \$2.00 and find some between these prices that are bound to please you.

Men's Tan Shoes.—The best buyer sometimes overbuys. Well, we did it in Men's Tan Shoes, and while we bought them away down, by buying a large lot we have more than we can afford to carry, and a \$4.00 shoe goes at \$2.65, a \$4.50 at \$3.50, a \$5.00 at \$3.65. This is our way of unloading; it has two advantages—you get the best goods at the price of inferior ones, and we get the room and your good will, which is, after

reached. At the ending of totality there was a better definition of the shadow bands which appeared as fine narrow ill-defined ripples very close together directed from the east 42 degrees towards the south. The motion was perpendicular to this direction so that they apparently came from the south 42 degrees west, which is practically the direction from which the general motion of the shadow was predicted to approach. It was not possible in this case either to count them or to determine the velocity of moving. There are two general theories regarding the origin of the shadow bands, one that they are caused by refraction in the light of the sun passing around the edge of the moon and then passing in the fraction rays upon the surface of the earth. The second theory is that they are formed by irregular currents or movements in the upper layers of the atmosphere and that the light passing through such unsteady strata receives an irregular refraction before they reach the surface of the ground. The fact that the atmosphere at the time of this eclipse was under the influence of a quiet anti-cyclonic area and apparently very still for a long distance above the ground and that under these circumstances the shadow bands did not appear, appears to favor the second or refraction theory regarding this formation and to disprove that they are due to the moon's defraction.

In 1880, Prof. Bigelow served in the United States eclipse expedition to West Africa and mounted the photographic lens of 40 feet focal length in a tube which pointed directly upward to the position of the sun. Previous to that time all attempts to use a lens of such great focal length were confined to placing the lens on a pier near the ground and reflecting the light by means of a moving mirror from the sun to the lens parallel with the ground into a dark room containing a photographic camera. The objection to that method of mounting, is that it is necessary to use a fine and moving mirror which tends to distort the light on the plate unless the work is done with extreme precision. By mounting the lens in the air the distortion is avoided and the result was to prove the pictures obtained by direct telescopic to be superior to those of horizontals. This method has since been adopted by astronomers. The principle was modified by fixing the lens in mid-air on a stage and moving the photographic plate on a special track to balance the motion of the sun. Several such forty foot telescopes were used this year on the line of the American eclipse. The difficulty of handling such a long telescope made it seem desirable to test the point whether equally good pictures of the inner corona could not be obtained by means of a short focus and enlarging the lens, mounted on the principle of a triangle which was

moved by appropriate slow motion and given the necessary steadiness. The result of the work at Newberry is to indicate that this is possible, as Professor Bigelow's pictures show the image of the inner corona nearly three inches in diameter and it was obtained with a telescope of only four feet focal length. These pictures show that there were nine well-defined prominences within the inner corona. It was found, however, much longer exposures were required in order to secure the necessary photographic impressions than when the plate is placed at the principal focus of the objective. It was also seen that great attention must be paid to the action of the slow motion, but it is believed that proper photographic effects can be obtained in this way which will give results quite comparable with those obtained with forty foot lenses.

Prof. Abbe paid special attention to the extension of the outer corona and mapped the figure of the equatorial rings by visual observation and found that certain rays appeared early in the totality and apparently changed position while other rays seemed to spring into greater effect at instants near the end of the totality.

Observatory stations of the United States Weather Bureau were stationed along the line of totality across the United States and observations taken every fifteen minutes throughout the day at which first-class instruments were used.

Smith's Greatest Need. Mr. R. P. Olivia, of Barcelona, Spain, spends his winters at Aiken, S. C. Weak nerves had caused severe pains in the back of his head. On using Electric Bitters, America's greatest Blood and Nerve Remedy, all pain medicine is what his country needs. All America knows that it cures liver and kidney trouble, purifies the blood, tones up the stomach, strengthens the nerves, puts vim, vigor and new life into every muscle, nerve and organ of the body. It weak, tired or ailing you need it. Every bottle guaranteed, only 50 cents. Sold by all Druggists.

There will be an election in School District No. 21, at Central school house May 31 from 5 to 7 P. M. for the purpose of levying a 1 mill tax for school purposes.

J. D. Shelly, W. S. Seybt, J. W. Riser Managers.

Winthrop College Scholarship and Entrance Examination. The examination for the award of vacant scholarships in Winthrop College, and for the admission of new students will be held at the County Court House on Friday, July 20th at 9 a. m. Applicants must not be less than fifteen years of age.

When scholarships are vacated after July 20th they will be awarded to those making the highest average at this examination.

The cost of attendance, including board, furnished room, heat, light and washing, is only \$3.50 per month.
