

# BY THE WAY...

By DORIS ARMFIELD

Washington, Oct. 16.—Except to mention the rain we had in Washington a couple of weeks ago, I don't believe I have commented on the atmosphere of the season. I am reminded of this because yesterday, someone said "in another three weeks we'll be having snow." I believe this part was just being pessimistic; I hardly think the snow will come that soon, but we are having chilly weather these days and the temperature forecast for last night in the suburbs was 38 degrees. Despite the fact that there hasn't been a frost in Washington, the leaves are beginning to change color on the campus of the school. After school one day this week, I went for a ride out to Mount Vernon. The Mount Vernon highway is beautiful any time of the year, but especially at this season, with many different colors in the scenery. Dogwood trees are as much favorite in this part of the country as they are at home, and their deep red foliage adds much to the autumnal beauty of both homes and wooded areas.

I made another sightseeing trip last Sunday, to Annapolis, home of the United States Naval Academy. I don't care for the town of Annapolis; like the Georgetown section of Washington, and Alexandria, Annapolis reminds me of Charleston in any place that reminds me of Charleston I don't care for. (I say this at the risk of being criticized for my judgment of the seaport city, but I lived there for two years; long enough to know that I don't like it.) The Naval Academy, however, is not only beautiful to see but interesting to visit. I had been there once before, but just for a drive through the grounds. Sunday, we went through some of the buildings, and on that particular day the seemed to be an air of awe-inspiring solemnity? What was boisterous laughter before one enters the building turned to hushed whispers; not because there were signs demanding quiet, but because the surroundings seemed to warrant it. I would suggest that anytime you are near Annapolis, you visit the Academy. I believe you will find it well worth your time.

Several years ago when I was in Washington, I worked in the office of Congressman William Rogers, who was chairman of the committee on Coinage, Weights and Measures, and whose favorite subject was the monetary system of the United States. I recall our former Congressman, Butler, telling me about a debate on the floor of the House, during which the gentleman from Idaho and others were making an attempt to explain said monetary system. Congressman Hare, in a speech from the floor declared: "I believe it was Will Rogers who said there are two kinds of crazy people in the world; those in the asylum and those who think they know all about money."

One day this week, our teacher at school dictated a lesson which began: "Mr. Chairman, I believe it was Will Rogers who said there are two kinds of crazy people in the world; those in the asylum and those who think they know all about money." He substituted "stenotypy" for "stenography" in the speech, but otherwise it was the same. Congressman Hare may have expected his speeches to be quoted in other places, but I imagine he would be surprised to know that his words are furnishing dictation practice for stenograph students. After I finished transcribing the speech, I sent Judge Hare my notes, so he could see how his speech looked in "stenotypy." I'm sure he would never recognize it!

**Navy Day To Be Observed Wednesday**

C. D. Coleman, Navy Day Chairman of Newberry announces that Wednesday, October 27th will be observed as Navy Day in Newberry.

Mr. Coleman says this year with ominous conditions abroad and numerous subversive elements in our midst, Navy Day is especially significant. The strength, the maintenance and the continued growth of our Navy is the concern of every patriotic citizen. It is showing our appreciation of our valiant Navy let us also get a clear understanding of it. It is not merely composed of surface ships—great though they may be—but it is also powerful in the air with naval planes, and invincible underwater with its great fleet of submarines.

"Navy Day will be as significant as the American people make it," stated Mr. Coleman.

"When is the only time a woman is justified in spitting in a man's face?"

"When his moustache is on fire."

The three ages of man are: school tablet, aspirin tablet & stone tablet.

## Negroes Rob & Exploit Worse Than Whites.

By David Lee, Negro Editor

The majority of the Negroes of this nation are victims of poverty, poor housing, inadequate hospitalization and recreation because of the greed and dishonesty of the more fortunate members of the race.

No race or nationality in this nation is actually robbed and exploited by its own members like the Negro race. The more fortunate members of the group has turned the ignorance and poverty of the masses into a profit making racket.

Some of these crooked exploiters for their criticism of my editorials. I have never claimed to be a leader of my people. In fact, I have no leadership aspirations. I have merely exercised my Constitutional right to express my opinion as I see it.

Some of the Negroes who are advocating civil rights legislation to force others to accept them as an equal by law, have tried to discredit my assertions by referring to the Telegram as a scandal sheet. Why of course it's a scandal sheet—it's a mirror in which the Negro can see himself as others see him.

The Telegram as opposed to filth, immorality and wrong. It seeks to raise the moral standards of our people. The Telegram seeks to build good will between the two races. Certainly this type of paper has as much right to exist as the Daily Worker, which is opposed to our way of life; as the other Negro papers that advocate the scrapping of the forms of race distinction and the complete amalgamation of the races.

The Telegram is opposed to any kind of program of force as a solution to the American race problem. But I am not narrow enough to resort to other fellow disagrees with my views. Instead of attempting to discredit me, which is not possible, the would be leaders and advocates of civil rights legislation should stop robbing the masses and clean up the filth, exploitation and immorality within the race.

The housing racket stinks to high heaven. Here in Newark a Negro will rent three or four houses at \$40 a month each. If the houses have 8 rooms each, he will turn all rooms into sleeping quarters, and charge hard working members of his own race \$10 a week per room. Thus each house which he rents for \$40 a month brings him \$320 a month.

If the 8-room house has large rooms, in many instances, partitions are built and then the 8 rooms become 16 rooms. This is not only true in Newark; this situation exists throughout the United States. These exploiters are heralded and regarded as real estate brokers by the advocates of civil rights legislation.

I have investigated one situation here in New Jersey where the landlord had 14 families living in a 12 room house. I reported it to the New Jersey State Board of Health.

Last winter over 200 Negro families were made homeless by fires in our city, and over 20 Negroes were trapped and (Continued on back page)
