BISMUTH.-M. Carnot reports the discovery of a bed of bismuth in the mountainous region which separates the departments of Bresse and Dordogne. The bed has been known to him for a considerable time, but not until recently has he found that it can be profitably worked. It occurs in combination with lead, antimony, iron and calcium; but Carnot has devised a process by which the bismuth may be extracted in a pure state. Already a tolerable quan-tity has been supplied to dealers in Paris. This discovery by M. Carnot is deemed a valuable one, as bismuth has lately brought a high price, owing to its increased use, and to the near exhaustion of the dearest in Special Control of the dearest in the dearest i

species of phenogamous or flowering plant, 875 of which occur in the northern states. Of the remainder, 234 extend to North Carolina, 113 to South Carolina, 108 to Georgia, 3 to Tennessee, 53 westward, and 15 to southern Florida. Of the 125 species which belong exclusively to Florida, only 9 have been found in the southern part of the state; and of the 1,511 species referred to Florida, 1,487 are not known to grow in the southern part. Only 37 species are as yet known to be peculiar to southern Florida, but 231 species are found within its borders which do not extend north of Tampa bay. But 8 species of West Indian woody plants occur in Florida, and but 6 in Key West. The interior of southern Florida has not yet been explored by botanists, and the distinctive characteristics of its vegetation are not known.

Photo-Engraving.-Material progress is made in the application of photography to various branches of engravgraphy to various branches of engraving. The arts of photo-lithography and
photo-plate printing have lately been
supplemented by certain processes,
which are called by those who employ
them "photo-graving." These operations, though their details are jealously
kent search may be action as it is a kept secret, may be safely said to de-pend largely upon producing, by means of bi-chromatized gelatin, from an ordi-nary glass negative of the drawing or engraving, a relief plate in metal, either an electrotype or stereotype, as may be desired. This may then be employed as usual in the printing-press. Origi-nal pen-drawings and copies from woodnal pen-drawings and copies from wood cuts, steel or lithographic engravings are reproduced with exquisite fidelity, and it is said very cheaply. The ability to employ a relief plate in the printing press of course greatly lessens the expense of subsequent printing as compared with other methods. Photo-engraving of the character here referred to is at present carried on in New York and Philadelphia,

STRENGTH OF METALS, WOODS, ETC .that iron, which is the most abundant material yielded by the earth, is also the strongest of all known substances. Made into the best steel, a rod one-fourth of an inch in diameter will sustain 9,000 pounds before breaking; made into soft steel, a rod of the same dimensions will sustain 7,000 pounds; into iron wire, 6,000; wrought iron 4,000; inferior bar iron, 2,000, and cast iron 1,000 to 3,000. A bar of copper wire of the same size will sustain 1,000 pounds; of silver, 2,000; gold, 2,500; tin, 300; cast zinc, 160; cast lead, 50, and milled lead, 200. Of wood, a bar of box and locust of equal size will sustain 1,200 pounds; of toughest ash, 1,000, elm, 800; beech, cedar, white oak, pitch pine, 600; chestnut and maple, 650; and poplar, 400. Wood which will bear a heavy weight for a minute or two will break with two-thirds the force acting a long time. A thirds the force acting a long time. A rod of iron is about ten times as strong as hemp cord. A rope an inch in diameter will bear about 2½ tons, but in practice it is not safe to subject it to a strain of more than about a ton. Decrease the rope in diameter one-half, and its strength will decrease three-fourths. Thus a rope half an inch in diameter will sustain one-fourth as much as a rope an inch in diameter.

Grasshoppers as Food.—In view of the famine which Minnesotians are suffering in consequence of the ravages of the grasshopper, the editor of tie Naturalist gravely advises the people to turn to and devour the pests that are devouring them. From his own personal knowledge, he states that the grasshopper makes a very palatable article of diet, when killed by boiling water and fried in butter. Care should be taken, however, to cook the beast thouse of the ravages of the famine which Minnesotians are suffering in consequence of the ravages of the grasshopper, the editor of tie Naturalist gravely advises the people to turn to and devour the pests that are devouring them. From his own personal knowledge, he states that the grasshopper makes a very palatable article of diet, when killed by boiling water and fried in butter. Care should be taken, however, to cook the beast with parasites that die hard—the hair snake, for instance, which, as we have heretofore mentioned, has a habit of occupying lodgings for a good portion of its life in the interior apartments of the grasshopper. In portions of Africa and Western Asia, and we may add Western Asia, and we may add Western Asia, and we may add Western America, the grasshopper is eaten with great gusto. The Arabs, the Hottentots and the Dakotas take theirs roasted whole, minus the legs, or made into cakes. Verification of the beast \$4.00; extra family, \$5; No. 1. \$5.75; fanoy, \$6.50. Wheat, dull and prices lower; superfine, \$4.00; extra family, \$5; No. 1. \$5.75; fanoy, \$6.50. Wheat, dull and prices lower; superfine, \$4.00; extra family, \$5; No. 1. \$5.75; fanoy, \$6.50. Wheat, dull and lower; red, \$90; ambor, \$1.00; white, \$1.05. Cora, dull and lower at 70@74c. Oats, 45@48c. Rye, higher at 95c. Mess pork quiet at \$23.50. from this course of dietetics would be the depletion of the hordes of voracious jumping jacks that are now 'carrying all before them, save the starvation which they leave in their track.

Medical Maniacs.—There are numbers of medical men so wedded to the old formulas, that all changes seem to them like innovations. These medical maniacs are, fortunately, incapable of much mischief in this practical age. While the Vinegar Bitters are curing indigestion, nervous dobility, constipation, and countless other diseases that defy the remedies of the pharmaconcein defy the remedies of the pharmacoposia, it is impossible to thrust down the throats of intelligent invalids "heroic" doses of mineral poison, or to persuade them to take adulterated alcohol, imthem to take adulterated alcohol, impregnated with cheap astringents, as a "healing balm" or a "balsamic preparation." Vinegar Bitters, a pure botonical tonic, and alterative, guiltless of the curse of distilled or fermented liquor, is actually accomplishing what the mineral and alcoholic cure mongers have as increased by a promised by the second control of the curse have so incessantly promised but have never yet performed. Under these cir-cumstances it is no wender that this medicine has taken precedence of all those burning fluids mis-called tonics.

Fever and Ague, Chill Fever, Etc. deemed a valuable one, as bismuth has lately brought a high price, owing to its increased use, and to the near exhaustion of the deposit in Saxony, which has been one of the important sources of its supply. Of late the Bolivia mines have almost exclusively sustained the requirements of commerce in this line.

The Flora of Florida includes 1,511 greeies of phenogeness of meanurements of commend it to people as a remedy for so many different states of the was repeatedly urged to make known the wonderful virtues of the Discovery in the cure of ague and kindred discases. He always replied that it was not intended for a "cure all," and should he recommend it to people as a remedy for so many different properties. tended for a "cure all," and should he recommend it to people as a remedy for so many different forms and classes of discases, he feared those who had never tested its virtues would at once class it among the numerous humburgs of the day. This answer was satisfactory to no one; they argued that the whole country ought to know it at once, and expressed their astonishment at his indifference to the subject. His ear and heart being at all times open to the call of suffering humanity, he has at last, after having received testimony from hundreds who have been speedily sured by it, and many of them after quinia and all the usual means had failed, consented to make the matter known.

egar Bitters are a purely Vegetable preparation, made chiefly from the naive herbs found on the lower ranges of the Sierra Nevada mountains of Califoruia, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BIT TERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tont relieving Congestion or Inflammation . the Liver and Visceral Organs, in Bilious Diseases.

The properties of Dr. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretia Carminative, Nutritious, Laxative, Diurette Sedative, Counter-Irritant, Sudorific, Alter ive, and Anti-Bilious.

Grateful Thousands proclaim VIN-EGAR BITTERS the most wonderful Invigorant that ever sustained the sinking

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond

Bilious, Remittent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tenuessee, Cumberland, Arkan-sas. Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive de-rangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Bitters, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold

of a system thus fore-armed. Dyspepsia or Indigestion, Head. ache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Som Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitatation of the Heart, Inflammation of the Lungs, Pain in the region of the Kid neys, and a hundred other painful symp toms, are the offsprings of Dyspepsia One bottle will prove a better guarantee of its merits than a lengthy advertise-

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelus, Swelled Neck, Goitre, Scrofulous Intiammations, Indolent Inflammations, Mercurial Afctions, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Discuses, Walker's Vinegan Bittens have shown their great curative powers in the most obstinate and intractable ca

Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetr Or Skill Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples Pustules, Boils, Carbuncles, Ring-worms. Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Piscolorations of the Skin, Humors and Diseases of the Skin of whatever name or pattern are the still scalled by th or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelminities will free the system from worms like these Ritters. like these Bitters

For Female Complaints, in young or old, married or single, at the dawn of wo-manhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

C.eanse the Vitiated Blood when-

ever you find its impurities bursting through the skir in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and singgish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
