RADWAY'S SARSAPARILLIAN RESOLVENT supplus the system, through the blood, urine, sweat, and structure-making constituents with Tissue making, Flesh making, Heat or Calorie-and Fat making elements.

reaking, Heat or Calorie and Fat making elements. All of its casalitaents are nourishing, purifying, and trenghening. It Repairs, Heats, Resolves, and drives out of the body the products of Doosy and Corruption. CONSUMITION, WHITE SWELLING, DROPSY, SYPHILLS, CANCERS, TUMORS, &c., are all of a secretainous disthesis, and as such, are within the curative range of the SARSAPARILLIAN RESOLVENT! range of the SARSAPARILLIAN RESOLVENT!

1. That Scrofula, by whetever name designated, is the result of deposits from the blood, induced or caused by Chronic indiamation. That these deposits take place when the blood is poor, seeak, watery, and incapable of holding in solution its proper constituents, or from the presence of some virus or poison in the blood, as Mercury, Calomel, Corrosive Sublimate, which is the Corrosive Chloride of Mercury or other agents, given in medicines and which enter fargely in the common advertised Sarsaravillas, NOF AESORBED OR CHANGED FROM THEFIX NATURAL CONDITION.

2. That unless the repairs or nutriments are greater than the wastes, that decomposition and decay will supervene, and the powers of life become exhausted.

3. That the dying body cannot be sustained on any freatment of medication that exhausts the system, or fails to nourth the blood, the only medium through which the wied forces are preserved, and on which the growth of the body depends. 4. That Radway's Sarsaparillian Resolvent supplies a want never before possessed or known to exist in medicine, that this new found principle in Chemical science, which has been brought to such a perfect system of cure is exhibited as follows:

1. Its great power in assimilating the food in its first stage of distillation in the process of digestion, as chyme and chyle with the nourishing elements of blood, seperating from these liquids refuse and inert qualities before they are taken up by the lastecals and are formed into blood. Here we see that by its wonderful power it charges the system with the very essence or

ities before they are taken up by the lastecals and are formed into blood. Here we see that by its wonderful power it charges the system with the very essence or principle that forms the vital powers of the body, and its chemical action on the blood in its primitive and complete condition, separates every atom of refuse material or element, out of which the viruq of disease is formed.

2. That, the blood thus prepared, and supplied with these nourishing properties becomes strong, rich and healthy, and holds in solution its proper constituents, through the Sarsapaprillian Resolvent, and repairs the wastes of the body with sound and healthy structures. Such its the wonderful power the Sarsapaparillian Resolvent exerts on the blood and puices of the system, that no virulent humors or poisons will exist by which deposits are made.

3. The rapidity which the Sarsaparillian enters the circulation, and communicates its curative powers through the Blood, Swaat, Urine, and other fluids, so cures the constituent secretions of each respective organ, establishing functional harmony throughout the system; through its action and power over the Secretions, the Liver secretes its matured or proper allutment of bic; the Sidneys urea; and the Lungs earbon; so that this wonderful medicine not only establishes health in the sick body, but preserves the system in health.

As we have shown the principle on which disease is

in health.

As we have shown the principle on which disease is formed, as well as the only sensible theory of cure we claim that the range of cure of the Satzaparillian Resolvent is unlimited, and that every disease that is of a Chronic, Scrotiplous or Organic Diathesis. is, properly within its special range. in this Medicine consists in the sales in this Medicine consists in the selection of ingredients containing curative and nourishing properties that supply the blood and general system with such constituents which, in a condition of disease and deprayity, it is deficient of, together with the combination of the several ingredients that form the SARSAPARILLIAN RESOLVENT.

If the constituent of Oxygen was exhausted from the atmospheric air, life would become extinct. So, when the blood becomes exhausted of its vital constituents, it deposits its tubercles and diseased humors in the body, and the elements of decay and decomposition supervene, Radway's Sarsaparillian Resolvent is to the blood and general system what Oxygen is to the the blood and general system what Oxygen is to the atmospheric air; it supplies the life principle, and Academy.

enables the blood to hold in solution all its natural con-DAILY CHANGES take place, for as the Sarsaparilian increases the strongth and purity of the blood, all deposits are diminished, and where there are tubercles formed in the lungs, the further deposits are arrested, and those that are established or forming dislodged, expelled, exhausted, or the portion of the diseased lung doutrized, and the consumptive, scrotulous subject receives good, if not sound, health.

#### With Moveable or Inserted TEETH!

E claim for our Patent Circular Saw the following advantages over all others: The shanks of the teeth are elastic, and exert uniform distension in the sockets. The stability of the plate is no way affected by serting new sets of teeth.

Each tooth independently, may be adjusted to the cutting line. No vivets, keys, or other objectionable appli-ances are employed in connection with the teeth which are as simple in construction, and as easi-ly used as a nut for a bolt.

In short, all the difficulties heretofore experienced in the use of movable teeth for saws, are fully met and obviated by this invention.
