To Gin Owners.

This is to say, that we have had our Gins re-paired by Bourdine's Gin Saw Gummer and find it to be superior to the hand saw mode of sharpening, it frees the saws from lint, especially when ginning damp cotton, and adds greatly to the sample and facilitates the gin in feeding more in the same time over the hand file. It restores the tech to their original shape, making all alike, in doing so it lengthens the tooth as much as it is worn off at the point before needing repair again,
We would say it does all that it is claimed to do,
and would respectfully recommend our farmers
to give it a trial.

Having six counties to operate in, viz: Darling-ton, Marion, Chesterfield, Marlborough, Horry, and Georgetown, it will be impossible for me to attend to all who may wish repairs made on their Gins in the Fall seasons, in so large a scope of of country, therefore I would say to the Farmers of Darlington and adjoining Counties that should they need work, it will be to their interest to send in their orders now, and have their Ginsresend in their orders now, and have their Gibsrepaired for the coming season, as I expect to work entirely in the other counties the next season. Persons desiring my services will confer a favor by obtaining as many jobs in their section as possible for me I am prepared to sharpen Saws, fill Boxes and Brushes, and to put your Gins in splendid order. Orders will receive attention in due time, at your residences. Payment for work will be made easy. nent for work will be made easy.

I have two excellent second handed Gins for sale, in splendid order.
