THROUGHOUT THE COUNTRY.

The South.

D. H. Johnson, United States pension agent at Memphis, Tenn., was arrested on a United States warrant, charging him with unlawfully obtaining \$500 from an aged colored woman. Johnson claims that he borrowed the

A cyclone passed over Eutaw, Ala., Monday and did a great deal of damage. The Baptist church was demolished and the Presbyterian church and Female Academy were badly wrecked,

Jack Thomas, a negro who attempted an assault upon Mrs. Keene, a widow lady living in Suwanee county. Fia., Friday night, was taken from the sher-iff by a mob at Live Oak Monday, hanged to a tree and riddled with bullets. He made a full confession.

McKinley has declined the invitation to visit Atlanta on July 20th.

The North.

Congressman Robert J. Gamble is dying of meningitis at Yankton, S. D.

Sheriff W. V. Malloy was sentenced to jail for contempt of court at Westchester, N. Y., and will have to lock himself up.

Governor Theodore Roosevelt will leave New York city next Friday for Chicago, arriving in that city Saturday, and leaving the same night for Oklahoma City, where he will attend the re-union of his old regiment, the Rough Riders.

The revised list of those killed in Monday's wreck on the Chicago and Northwestern places the number at

Martin J. Russell, one of the proprietors and editor of the Chicago Chronicle, and for many years identified with the management of Chicago newspapers, died Sunday night at Mackinac Island, from a complication of diseases.

In the United States Circuit Court in St. Louis, Judge Elmer B. Adams issued a temporary mjunction restraining Wm. D. Mahon, president of the Amaigamated Order of Street Car Employes of America and others from in terfering with the operation of the mails over the lines of the St. Louis Transit Company. This injunction names over 100 men, most of whom are members of the association over which Mr. Mahon presides.

It is announced that Judge James P. Tarvin, president of the Ohio Bi-Metilic League, will be a candidate for the gubernatorial nomination before the Kentucky Democratic convention at Lexington, July 19th.

W. Bourke Cockran addressed the graduating class of the Yale Law School at New Haven Monday.

A convention to organize the Illinois Union Reform party, on the basis of direct legislation, will be held at Chicago on June 27.

Thomas S. Jackson, while ill with scarlet fever, fell in love with his pretty nurse, Mrs. Millicent Mayeng, at Stamford, Conn., and married her.

Finding her in the company of a number of boys at Brooklyn, N. Y., fifteen-year-old Lizzie Mc-Donald's father ordered her home, and was promptly thrashed by his daughter's beaux.

The Viceroy of India cables that frequent showers have faalen in the Deccan and elsewhere, but that heavy rains are wanted in order to enable the natives to engage in plowing and sowing the autumn crops.

The Paris correspondent of the London Daily Express says: "Four Russian ambassadors are here, by accident or design-Count Cassini, ambassadot to the United States; Count De Nelidoff, ambassador to Italy; Count Kapniv. ambassador to Austria-Hungary. and Prince Oouroussoff, ambassador to France. It is said that Count Muravieff's successor at the Russian Foreign Office will be one of these, and I am informed that Count Cassini stands the best chance.'

The British government has received dispatches from Ashanti indicating that the relief of Kumassi should be accomplished this week.

Generals Buller and Hamilton are seeking to occupy the railroad from Volksrust to Johannesburg, in the Transvaal, and cut off the Orange

river colony Boers. Heavy rains in Cuba have caused yellow fever to spread.

Dispatches from Ecundor say that war is threatened between that country and Colombia.

The rainy season, which has commenced in the Philippines, is interfering with millitary operations there.

The Secretary of the British Legation in Washington, Reginald, T. Tower, has sailed to accept appointment as British Minister at Pekin.

Miscellaneous.

The semi-millenial celebration of the birth of John Guttenberg, the inventor of printing, began on a grand scale at Mayence, Germany, recently.

Americans overrun the London S. C. hotels.

Liquid hydrogen is transparent. and the lightest as well as the coldest liquid known, a cork sinking in it like lead. A whitish substance seen at the bottom of the vessel on Professor Dewar's first exhibition was really solid air or air ice.

Flowering plants are not certainly known to reach a greater height than 17,000 feet in the Alps. At least half a dozen species, including a saxifrage, a mallow, a valerian and several composite-have been brought by Sir Martin Conway from heights of 18,000 to 18,500 feet in the Bolivian mountains.

Before a meeting of the Biological Society of Washington Mr. W. A. Orton described the result of experiments made to determine the cause of the flow of maple sap in the early spring. His conclusion was that the flow has a mechanical cause, being due to the increasing heat which expands the gases in the wood cells, and thus forcibly expels the sap. This contradicts the view that the flow of sap is due only to physiological action in the plant.

The peculiar condition of the atmosphere over southern England and western France on January 11th gave rise to extraordinary exhibitions of solar halos, or sun dogs, described in the scientific journals of both countries. The phenomena were very beautiful, the sun being surrounded with concentric circles and inverted arches, showing rainbow colors, while mock suns appeared among the halos. They were caused by clouds of minute ice crystals floating at a great eleva-

Recent observations tending to show that ants possess a sense of hearing have recently been described. Pro-fessor Metcalf of the Woman's College, Baltimore, adds some interesting testimony on the subject in a letter to Science. One of his students discovered that a colony of black ants was thrown into a state of great excitement by sounds of one particular pitch. Other sounds did not affect them, but when the peculiar note was struck, either on a violin or with a whistle, the ants would become excited, and if the sounds were continued would grow frantic, some of them falling into a water moat surrounding their nest. Ants of other species paid no attention to the sounds.

On a summer evening you may see Arcturus high up in the south or southwest in June or July, and further down in the west in August or September. You will know it by its red color. That star has been flying straight ahead ever since astronomers began to observe it at such a speed that it would run from New York to Chicago in a small fraction of a min-nte. You would have to be spry to rise from your chair, put on your hat and overcoat and gloves and go out on the street while it was crossing the Atlantic Ocean from New York to Liverpool. And yet if you should watch that star all your life, and live as long as Methuselah, you would not be able to see that it moved at all. The journey that it would make in a thousand years would be as nothing alongside its distance.

Under the present conditions the pres of the interior and Ungava Bay are useless owing to the lack of railway or other communication. The deposits on the islands of Hudson Bay lie immediately alongside of deep water, and so there would be no difficulty in loading on shipboad, but the long carriage through Hudson Strait and the shortness of the season of navigation, three and one-half months, are serious considerations ir connection with the profitable working of these deposits.

No coal exists about Hudson Bay or in Labrador, and the wood for cnar-coal would have to be transported from the southern part of Hudson Bay. The only supply of fuel in the neighborhood is found in the great masses of driftwood on the islands and shores of the bay, and it is doubtful if this would answer the purposes of smelting.

There are excellent water powers in the neighborhood, which might be used if a cheap method of electric smelting were discovered,-Engineering Magazine.

Worked by Electricity.

Canada boasts of one of the most wonderful farms in the world. Its peculiarity lies in the fact that everything is worked by electricity. Two waterfalls within the bounds of the farm, some sixty feet, and one hundred and eighty feet high, furnish the motive power, a central power being erected near, and the current is transmitted by wires to every available place on the farm.

Siberian Trolley.

In the line of general improvement planned in connection with the Trans-Siberian Railway, terminating at Vladivostock, the Russian Govern-ment will establish an electric railway and an electric light plant. The railway is to be twelve miles long.
