**The Short Lived Yacht.**

Another instance of the rapid passing of a racing yacht's usefulness is that of the grand old Defender, the 1895 cup racer. It cost fully \$100,000 to build her—not to run her; just to put her aloft ready for racing. Those who designed the yacht thought that a bronze hull with aluminum topsides would slide through the water with greater celerity than any other combination of metals that could be devised for a hull. They so informed the syndicate that ordered her. But, they added, aluminum and bronze make a poor combination, and in course time the aluminum will rot where it joins the bronze, and the Defender will be useless. But what mattered that! She was to be built to defend the Cup; after she had defended it she might rot or not as she pleased.

**A MINISTER'S GOOD WORK.**

"I had a severe attack of bilious colic, got a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, took two doses and was entirely cured," says Rev. A. A. Power, of Emporia, Kan. "My neighbor across the street was sick for over a week, had two or three bottles of medicine from the doctor. He used them for three or four days without relief, then called in another doctor who treated him for some days and gave him no relief, so discharged him. I went over to see him the next morning. He said his bowels were in a terrible fix, that they had been running off so long that it was almost bloody flux. I asked him if he had tried Chamberlain's Colic, Cholera and Diarrhoea Remedy and he said, 'no.' I went home and brought him my bottle and gave him one dose; told him to take another dose in fifteen or twenty minutes if he did not find relief, but he took no more and was entirely cured."
