Tobacco selling is about over and those who cultivated the weed are wearing 2x4 smiles over the pile of money they made this year. The writer was not among the lucky ones who planted tobacco, but he expects to get in the band wagon next year, if nothing happens.

On account of the scarcity of hands cotton harvesting progresses slowly.

A short pea crop is anticipated from present appearances. Plenty of vines but not much fruit. Corn and potatoes are fairly good around Leo.

Lippincott's complete novel for October is "Fruit Out of Season," by Mary Moss. This is the first work in fiction to appear in any periodical by Miss Moss, and that she is given the place of honor as novelist of the number indicates the quality of her work. The story deals without gloves with a social situation that is new, yet as possible as an every-day passion.

OFFICE OF D. H. HARDY, Secretary of State, AUSTIN, TEX., Nov. 21, 1900.
I have found Dr. Moffett's TEETHINA a splendid remedy and aid for my teething children. When my oldest boy was a teething child, every succeeding day warned us that we would inevitably lose him. I happened upon TEETHINA, and began at once administering it to him, and his improvement was marked in 24 hours, and from that day on he recuperated. I have constantly kept it and used it since with my children, and have taken great pleasure in sending its praises to all mothers of young children. I found it invaluable even after the teething period was passed.
