BRILLIANT SUNDAY SERMON BY DR. M. W. STRYCER, PRESIDENT FOF HAMILTON COLLECE.

Subject: Service.

Brooklyn, N. Y .- Dr. M. W. Stryker, President of Hamilton College, Clinton, Y., occupied the pulpit of the Hanson Place M. E. Church in the absence of Dr. Locke, the pastor. He preached the following sermon on "Service:"

My text is that verse in the twelfth chapter of the epistle to the Romans in which the apostle says that there are some things hard to be understood which the unlearned and the unstable wrest to their own destruction. It is true that Satan often hides in the dark passages of God's word. It is also true that the hardest things to understand are not those that the intellect has to unravel and explain, but the things that concern the deeds. For my part, whoever else may have found it hard, I have not found the ninth chapter of Romans as hard as the twelfth. Even if I did not do it very well it was easier to think straight than it is to be good. It is a wonderful thing that, after all these mighty, reverberating words, that search the very heights and depths of the plan of God that make this letter so compact up to this point, it all broad. ens out in the most natural fashion into administrative matters. I notice that the thing about the twelfth chapter is that it does not say apything about what we must not do always true that if you get light in darkness will go out. The way to keep our hearts empty of evil is to fill them up to the brim with good. We do not get the darkness out of this room with a broom, but with a match or a spark. Dr. Thomas Chalmers used to speak about the "expulsive power of the new affection." To many a man who never amounted to anything the honest, pure love of a true woman has been an incentive to him to make something of himself for her sake; and whenever the love of God comes into the human heart it drives out evil and seeks to clothe itself with living and loyal action; and if there is any one who thinks the deed is easy and the doctrine hard, that is not my experience.

I want to speak to-night upon this special admonition to service which Paul says is reasonable. God does not ask anything that is not rational. Christianity and Christian living can give account of themselves. There is nothing so silly as to be a sinner. It makes angels weep and devils laugh see a man trying to serve God and aself. That man is walking north ed south; it is a straddle. Now Paul says it is a reasonable service. He

said, try it, put it to the proof, and he was an expert who had tried it for thirty years. I am going to take one special line of analogy. You have often heard it said of a man of intense activity that he was a "perfect steam engine," and that would be said more often if there were mere men who were what they ought to be, "a perfect steam engine." I think there is a sermon in that, and I am going to try to get at it. You will help. You will think a great many things which I won't and preach a sermon to yourselves about being perfect steam engines. For our present purposes we will talk about that perticular style of steam engine, the railway locomotive. America is doing a great business in making these, and wherever they are sent-Africa or South America or Asia, every one of them is a kind of mission-ary force, a living testimony of that force and skill which are resident in free mankind. The call now is loud and clear for Americans who shall be more committed to teach the world manhood. The tide of time is rising and sinew and muscle are called into the service of God. This is no time for limping or loitering. Look out upon this world and see

rmes, Wallflower; Bacchante, Back it together. If we won't take our ant; Sutlei, Subtle J; Niobe, Nob-Gospel in the missionary ship, it shall go in the warship. Somehow men are going to be brought together. We are a conceited lot, we Americans, but we do not like to be told so. We have a good thing, and like to keep it. We say of the Chinese, "shut them out; put them aside." And perhaps of some others, also, "Don't let those good-fornothing Russians, Poles and Italians Bless your heart! Your great grandfather or grandmother was nothing but an emigrant-mine was a Dutchman, at that. We are all the children of immigrants; we are all intruders on this continent. The only Americans are not now citizens, but live on pensions. We have stolen everything they had that was in sight. You had better not talk about that. God's plan is to keep the races of this world marching and moving. Yet, somehow, some cannot get it through their thick heads, their gold-plated heads, their noddles, hard with cruel ambitions and paltry pride, that when the Scripture says, "He made of one blood all nations," it means what it says. If you won't learn it by peace you will learn it by war; if you won't learn it in Bibles, you will learn it by bullets; if you won't learn it in packed Europe and Asia and go there, God will bring those people here. Let them come. I laugh at all this talk about checking immigration. King Canute might just as well have tried to throw back the waves with his mandate. In a certain sense it is proper to say that God is a mighty utilitarian. It is a great time for service; we need to wake up, it was nearly daylight, it is dawn, Fadyen. great things are coming. Therefore, I think that our churches, colleges, schools and homes ought to engage in

the manufacture of locomotives. That wonderful, intricate enginewho made it? Did a baby locomotive grow up into that great machine? You say it is evolution. Evolution describes the way a thing is made, but never made anything. The process of making is evolution. If you ask me if I believe God made this world by process, I say yes. That is the way He makes everything. When He makes anything that can grow He gives it a chance to grow. His plans are made and I don't care where He began! I care more for where He ends. You say it took a long while. Yes, the larger the pattern, the larger the plan. Our steam engine is a fine instance of evolution. It is man's creation and it represents his Creator's idea and intention. It is a wonderful epitome of mind working for an intended end; of a purpose perfected by thought. And your bodies? They just happened? grave-where he wished his grave to The steam engine had to be made and | be made. you are an accident? A master mechanic and designer, he is a mere chance? Do not think it. our reason? God is back of this adaptation, this mighty thing that we call

And, second, your perfect steam enne is made with a purpose. The ranroad company owns it. They emplox an engineer to run it. Now in a sense it is his; it is his to use and control, but it is not his to sell. It is his to take care of and to get as much of but in no other way he can out if he takes a notion that he co

Our purposes are the service.

, Te do net own seemed to I We are the our bodiesne owners. My engineers, body is min I am to give a relative sense. for it. You say. hat he will with 'May not a his own?" if you own anything. Who the engine for? To r use. Is it made to be destroyed. If so it might just as well be made of wood and paint or a hromo engine. Some men are such they look like the real thing, but they do not act like it. You have seen a model engine under a glass case; that you wind up. The wheels go, but the engine does not. The wheels work easily because they don't touch the track. I have seen some men and I suppose there are some women, who are wound up with keys. The wheels buzz, but there is nothing done. There are people who sit in a theatre, and the tears run down their cheeks, and they think they are good because they can ery. They pay \$1.50 for the privilege of weeping. We all know how we smooth ourselves when a tear comes. We feel penitent and say, "We are not so bad as we thought." It is a toy engine, the wheels go, but it does not advance. A perfect engine is meant to do something in the world, and so are we if coupled to the task that God gives us. Some people don't want to pull, they want to be pulled. You always see a dead engine in the middle of a train. Which end of the train do you like, the front or somewhere in the middle? God give us the front. with all its dangers and perils and

Perfect engines get hold of the track. Orders come with lightning rapidity to the engineer, and they must be beyed without question. The responsibility for the orders is not with him, his responsibility is to execute them. God can run this world, but He has put it into your hands to run yourself. When you stop at the end of the road you can be perfectly certain that if the passengers are too busy to take notice of you, you will not be forgotten by the manager. Well, I have mixed The engineer and the engine to-

gether-that is the way we are. We are the engines? Yes. We are engineers? Yes. I said at the outset. "You preach the sermon." I think there is great analogy in it. I think there is a living parable for those who have eves and ears. Respoisibility? Yes, lot's of it. But, then, who will shirk that? Danger? Plenty, but you are a man. Work? Yes, but that is all you are for. We are not made for nothing. Covet the place. Ride with hand on the throttle, making the best time, within safety, that a man can make. Ride right over the driving wheel. There is where the best men have always sat. Then, by and by, when this engine is worn out, you will get a better one.

Morbus Sabbaticus. Morbus Sabbaticus, or Sunday sickness, a disease peculiar to church members. The attack comes on suddenly on every Sunday; no symptoms are feit on Saturday night; the patient sleeps well and wakes feeling well; eats a hearty breakfast, but about church time the attack comes on and continues until services are over for the morning. Then the patient feels easy and eats a hearty dinner. In the afternoon he feels much better, and is able to take a walk, talk about politics, and read the Sunday papers; he eats a hearty supper, but about church time he las another attack and stays at home. He retires early, sleeps well and wakes up Monday morning re-freshed and able to go to work, and does not have any symptoms of the disease until the following Sunday. The peculiar features are as follows: 1. It always attacks members of the

2. It never makes it appearance except on the Sabbath.

3. The symptoms vary, but it never nterferes with the sleep 4. It never lasts more than twentyfour hours. 5. It generaly attacks the head of

6. No physician is ever called.

7. It always proves fatal in the endto the soul.

S. No remedy is known for it except prayer.
9. Religion is the only antidote.

10. It is becoming fearfully prevalent and is sweeping thousands every year prematurely to destruction.

A Hard Lesson.

Of all the lessons that humanity has to learn in life's school, the hardest is to learn to wait. Not to wait with folded hands, that claim life's prizes without previous effort, but, having struggled and crowded the slow years with trial, seeing no result such as effort seemed to warrant-nay, perhaps disaster instead-to stand firm at such a crisis of existence, to preserve one's poise and self-respect, not to lose hold or relax effort, is greatness, whether achieved by man or woman .- Reformed Church Record.

The Past a Guarantee For the Future. If we would reassure our restless hearts that our future is in the hands of God we have but to scan our past. Can any man that is not altogether blind look over the way he has traversed without surprise and awe as he sees it marked everywhere by mysterious footprints of the living God? We thought we were going a way of our own, and all the time we have been on the King's highway,-J. E. Mc-

Looking For the Saviour,

Some people live looking within at their failures. Some live looking around at their hindrances. Some live looking for the Saviour-they face the sunny South .- Mark Guy Pearse.

Many would rather be in sin than out of style.

If the wishes of the American people had prevailed, Fitzhugh Lee would have been buried in the Campo Santo at Arlington, and a stately shaft would have risen there to his memory. But his own desire has prevailed, very rightfully, thinks the Hartford Courant. Years ago, as we now learn, he told his family he wanted to be buried in the Hollywood Cemetery at Richmond when the time came and on one occasion at least he pointed out the very spot-near Jefferson Davis's

Several Atlantic liners arrived in New York harbor within a single day, bringing to our shores 12,000 immigrants. The New York newspapers say the new arrivals are a sturdy lot, and that few or none of them will be sent back. The steamship companies closely scrutinize applicants for passage on the other side, and few deportations, therefore, become neces-

ris is to use automobile garbage carts in the future.

IS ONE AS NECESSARY AS THE OTHER?

Citizens of Large Cities Say It Is.

New York, June 13 .- In the recent agitation here about the price of gas, the demand for lower rates was supported by the argument that every resident is as dependent upon a supply of gas as upon a supply of good water.

It has come to pass that the day laborer uses gas as his only fuel for cooking, because of economy, and the rich man uses gas on account of its convenience. Gas for lighting, with modern improvements in burners, is cheaper, better and more satisfactory than any other kind of light. Gas sells at \$1.00 per thousand cubic feet in large cities, and from that to as high as \$2.00 in smaller towns.

The consumer of gas in the country uses Acetylene (pronounced a-set-alene), and each user makes his own gas and is independent of Gas and Electric Companies. Acetylene is a more perfect illuminant than the gas sold by the big gas companies in the cities, and the cost to the smallest user is about the equivalent of city gas at 85 cents per thousand.

Acetylene is the modern artificial light, the latest addition to the many inventions that have become daily necessities.

The light from an acetylene flame is soft steady and brilliant, and in quality is only rivaled by the sun's rays. If water and a solid material known as Calcium Carbide are brought into contact, the immediate result is the making of this wonderful gas. The generation of acetylene is so simple that experience or even apparatus is not necessary to make it. If it is desired to make it for practical lighting, and to keep it for immediate use, then a small machine called an "Acetylene Generator" is employed. There are many responsible concerns making acetylene generators. In practice this gas is distributed in small pipes throughout buildings, grounds or entire cities and towns in the same manner as ordinary city gas. Acetylene is the only satisfactory means of lighting isolated buildings located in the country or suburbs at a distance from city gas or electric plants.

Trivial Accident May Cause Death. The vibration caused by a passing elevated train jarring a small sharpedged mirror from the wall so that it fell across a rubber gas tube may cost the life of Daniel Meschien, who was found dying on the floor of the Iroquois hotel in New York, early the other morning. Meschien went to the botel one night, and next day the chambermaid smelled gas in his room. She summoned help. With an ax the door was broken down and the man found almost asphyxiated. He was carried to the fresh air and an ambulance summoned, which took Meschien to St. Vincent's hospital. Investigation showed that the small mirror had been jarred from the wall in such a n:anner that it severed the rubber tube connecting the gas jet with a small gas heater.

Tree's Strange Crop. There is a curious sight in the fork of an umbrella tree on Washington street, between Fourth and Fifth avenues. It is a fine growth of wheat almost ready to come out into head. The stecks are nearly two feet long and the blades broad and healthy looking. It was at first thought that this growth consisted of shoots from the tree, but on closer examination it was found to be wheat. It has no foundation of earth, or if there is any it is so hidden by the growth as to be invisible. The wheat grains in some way found lodgment in the crevices of the bark and have probably had no other earthy bed than that formed by dust which during the dust storms of the summer was blown there.-Arizona Republican.

It is the fashion to deride Russia and exhibit to the public every defect in her new penal system and social organization, and yet is is only fair to admit that under an autocracy. which is the abhorrence of all freeborn Americans. Russia has done what we could not do, decreed emancipation without a war and abolished capital punishment.

FEED YOUNG GIRLS. Must Have Right Food While Growing

Great care should be taken at the critical period when the young girl is just merging into womanhood that the diet shall contain all that is upbuilding, and nothing harmful.

At that age the structure is being formed and if formed of a healthy, sturdy character, health and happiness will follow; on the other hand anhealthy cells may be built in and a sick condition slowly supervene which, if not checked, may ripen into a chronic disease and chuse life-long suffering.

A young lady says: "Coffee began to have such an effect on my stomach a few years ago, that I was compelled to quit using it. It brought en headaches, pains in my

muscles, and nervousness. "I tried to use ten in its stead, but found its effects even worse than those I suffered from coffee. Then for a long time I drank milk alone at my meals, but it never helped me physically, and at last it palled on me. A friend came to the rescue with the suggestion that

I try Postum Coffee. "I did so, only to find at first, that I didn't fancy it. But I had heard of so many persons who had been benefited by its use that I persevered, and when I had it brewed right found it grateful in flavor and soothing and strengthening to my stomach. I can find no words to express my feeling of what I owe to Postum Food Coffee!

"In every respect it has worked a wonderful improvement - the headaches, nervousness, the paius in my side and back, all the distressing symptoms yielded to the magic power of Postum. My brain seems also to share in the betterment of my physical condition; it seems keener, more alert and brighter. I am, in short, in better health now than I ever was before, and I am sure I owe it to the use of your Postum Food Coffee." Name given by Postum Co., Battle Greek, Mich.

There's a reason.

Remarkab

Representative Branch of Morgan county, the "military man" of the house, has had some unusual experiences. The fact that he is a chairman of the committee on military at fairs very often causes his colleagues to ask him for stories.

THE DOLLAR

"It was while attending a military school a good many years ago that I formed the habit of taking long walks before breakfast," said Branch to a group of friends. "One morning I happened to be strolling through the town near which the school was located, when I was 'touched' by an old fellow, whose tale of hard luck would have melted a stone.

"But, my good fellow," I said, "I haven't a cent with me this morning. I spent my last penny last night, and my check from home won't reach me until to-morrow.'

'The cld man wasn't satisfied.

"'Look through your pockets,' he begged, 'maybe you'll find something.' 'Well, if I've got any money in these clothes you can have every cent of it,' I said to him, and I began turning my pockets inside out just to show him that I was 'strapped.'

"Well, would you believe it, a silver dollar dropped out of one of my pockets and rolled on the sidewalk.

Delighted, the old man quickly grabbed it up and said, 'Thanks.'

"He was much bigger than I and said, 'Certainly; I am glad I can help you, but, really I didn't know it was there.' "All the way back to school I won-

red how that dollar came to be in m trousers." "And did you ever find out?" asked

another legislator. "Oh, yes; when I got back to my room my roommate told me that I was wearing his pants."-Indianapolis

Railway Rate Legislation.

the attention of the world.

At the biennial convention of the Order of Railway Conductors, recently held at Portland, Oregen, resolutions were unanimously a topted voicing their sentiments as to the effect of proposed railway rate legislation on the 1.300,000 railroad employes, whom they in part represented. These resolutions "indorse the attitude of President Roosevelt in condemning secret rebates and other illegalities, and commend the attitude of the heads of American railways, who, with practical unanimity, have joined with the President on this question." They then respectfully point out to Congress the "inadvisability of legislation vesting in the hands of a commission power over railway rates, now lower by far in the United States than in any other country," because such regulation would "result in litigation and confusion and inevitably tend to an enforced reduction in rates, irrespective of the question of the ability of the railroads to stand the reduction, especially in view of the increased cost of their supplies and materials." They further protesten against such power being given to the present Interstate Commission because "the proposed legislation is not in harmony with our idea of American jurisprudence, inasmuch as it contemplates that a single body shall have the right to investigate, indict, try, condemn and then enforce its decisions at the cost of the carriers, pending appeal, which is manifestly inequitable." The conductors base their demand

for only such legislation, if any, as would "secure and insure justice and equity and preserve equal rights to all parties concerned" on the ground that the low cost of transportation "is the result of the efficiency of American railway management and operation which have built up the country through constant improvement and development of territory, while at the same time recognition has been given to the value of intelligence among employes in contrast to foreign methods, where high freight rates and lowest wages to employes obtain,

In pressing their claim against legis-lation adverse to their inter sts, they point out the fact that "me freight rates of this country average only two per cent. of the cost of articles to the consumer, thus making the freight rate so insignificant a factor in the selling price that numerous standard erticles are sold at the same price in all parts of the country?"

HON, JOHN TIGHE. Assemblyman Tighe's letter should

ing a strenuous life. Hon. John Tighe, No. 98 Remsen St., Cohoes, N. Y., Member of Assembly from the Fourth District. Albany County, N. writes as follows:

"Peruna has my hearty indorsement as a restorative tonic of superior merit. At times when I have been completely broken down from excess of work, so that my faculties seemed actually at a standstill Peruna has acted as a healing restorer, starting the machinery of mind and body afresh with new life and energy. "I recommend it to a man tired in mind

Trecommend it to a man tred in mind and body as a tonic superior to anything I know oband well worthy serious consideration. J. Tighe.

Excest of work, so common in our country, crases impaired nerves, leading to catarrh and catarrhal nervousness—a disease that is responsible for half of all nervous troubles.

Peruna cures this trouble because it cure catarrh wherever located.

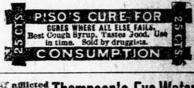

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice
