Editor County Record:—

A Good Roads Rally and Convention will be held in the city of Charleston on Tuesday, July 12, proximo, under the auspices of the Charleston Automobile Club, for the purpose of stimulating increased interest in the good roads movement and also to impart information on scientific road building. The convention will be composed of all good roads men, whether or not automobilists, from the territory situated below Columbia. After the adjournment of the convention a fish fry and clam bake will be given at the Isle of Palms and the day will be ended with a hop and concert.

Appreciating your great interest in this movement, which means so much for the material development of our State, we earnestly invite you to be present with us on July 12, so that we may be favored with your co-operation in making it a great success.

Pull for good roads!

Very truly,

JAMES COSGROVE.

Prospects for Large Attendance in Newberry at Annual Meeting.

Ten Things to Do this Month.

(1) Keep the cultivators going. Level, shallow, frequent cultivation is what the crops need at this season. Don't cut the corn and cotton roots by deep plowing.

(2) Plant cowpeas, soy beans, velvet beans, peanuts—some legume that will work twenty-four hours a day for you gathering nitrogen, making money and building up the land. Put in all stubble lands not otherwise employed as soon as the oat or wheat crop is taken off.

(3) Save all the crimson clover seed possible. If no clover huller is available the seed can be beaten out by hand and sown in the chaff.

(4) Get the mower in good running order. See that all bolts are tight, the knives sharp, the guards on straight and the bearings well oiled. A mower is a splendid weed killer as well as a necessity in the hay field.

(5) Plant late corn and potatoes. Keep up a succession of garden crops; beans, tomatoes, sweet corn and other vegetables should be planted this month. Fresh vegetables are cheaper and better than meat or store-bought foods.

(6) Spray the apple trees again with Bordeaux and Paris green, and the peach trees with lime-sulphur. Plow out the first-year strawberry beds and plow up the old ones.

(7) Look after the work stock. Cut out some of the corn these hot days and substitute cotton-seed meal, oats or peavine hay. See that there is enough shade and water as well grass in your pasture.

(8) Fix up a bath-room of some sort, so that you can free yourself from dust and perspiration at the close of the day. It will prove invigorating, add to your sense of dignity and enable you to do better work.

(9) Keep up the warfare against flies and mosquitoes and so help to ward off typhoid fever and malaria. Screen the doors and windows, drain the stagnant pools and look after the breeding places of the flies.

(10) Prepare for the Farmers' Institutes in your section, and if there no Women's Institutes in your State, keep after your officials until they are started.—*Raleigh (N C) Progressive Farmer and Gazette.*
