

THE RIGHT MAN IN THE RIGHT PLACE—NEEDS OF OUR SCHOOLS.

In my previous paper as an important point in fitness I noted that our law-makers must have a complete understanding of the needs of our schools.

One most essential remedy to be applied to the schools is the placing of a limit on the maximum work attempted by the teacher.

We need teachers who love to try life. Teachers who will instill love for the country into the souls of country boys and girls.

And we need patrons who see greater things for their children. Patrons who are determined to place greater opportunities into their keeping.

And finally our schools need men and Legislators. Men who believe in our schools; men who will make the next Assembly an educational campaign.

lets his hogs destroy his neighbors corn and potatoes, and yet lets the man go "scot free" whose children steal, burn property and murder his fellow man, ending their own existence by self destruction!

Teachers who will instill love for the country into the souls of country boys and girls. Teachers who realize that the country produces the cream of humanity; the great men of all ages.

Patrons who are determined to place greater opportunities into their keeping. Patrons who will require better equipped teachers, longer terms for the schools, a less amount but better work from the teachers, a human stock law, the consolidation of the small schools, a teacher who teaches the principles Christ taught; and patrons who will make possible all these by insisting that his representatives in the General Assembly shall secure more money for the development of our schools.

Men who believe in our schools; men who will make the next Assembly an educational campaign; men who will supply our needs; men who will place schools first, and whose motto shall be—more efficient schools—Better Equipped teachers.
